—Aug. 30. Danish excursion steamer Freya foundered off Hoejer, in hurricane; 200.
—Sept. 3. Fleet of seven U. S. destroyers, including the Delphy, S. P. Lee, Chauncey, Fuller, Woodbury, Nicholas, and Young, went on rocks in fog off Honda Point, 75 miles north of Santa Barbara, Cal.; 22.
1924—Jan. 10. British submarine L-24 sunk off Portland, England, in collision with British battleship, Resolute; 48.
—March 11. Ward Line steamship Santiago sunk by storm off Cape Hatteras; 25.
—March 19. Japanese submarine 43 sunk in collision off Sasebo, with Japanese battleship Tatsuta; 49.
—July 11. Irish freight steamer Lismore, off Wexford; 19.
—July 11. Japanese freight steamer Nippon Yusen Kaisha, in gale off Goto Island; 57.
—Dec. 12. Japanese special service ship Kwanto, in storm off Tsuruga; 100.
1925—March 12. Japanese steamer Uwajima Maru lost in gale off Takashima; 103.
—April 21. Japanese freighter Raifuku Maru, Philadelphia for Hamburg, sunk off Nova Scotia in storm; 38.
—May 8. U. S. Army Engineers' steamer Norman upset with excursionists aboard in Mississippi River, 16 miles south of Memphis; 22.
—May 23. Turkish coastal steamer foundered at entrance to the Bosporus; 44.
—Aug. 18. Excursion steamboat Mackinac, returning, on Narragansett Bay, from Newport to Pawtucket, boiler explosion; 47.
—Aug. 26. Italian submarine sunk in naval manoeuvres off Sicily; 50.
—Sept. 25. U. S. submarine S-51 sunk in collision with Amer. steamer, City of Rome, off Block Island, R. I.; 37.
—Nov. 11. British submarine, M-1, sunk in collision in English Channel; 69.
—Nov. 30-Dec. 5. Cargo steamship Cotopaxi vanished in storm on way from Charleston, S. C., to Havana, Cuba; 32.
1926—Jan. 26. British freight steamer Antinoe lost in storm in mid-Atlantic; crew rescued by the Pres. Roosevelt, which lost 2 of her life-boat men in the venture.
—Jan. 27. British freight steamer Laristan sunk in storm in mid-Atlantic; 24.
—Amer. freighter Suduffco left Port Newark March 13, for Pacific Coast, never heard from; 29
—March 22. Brazilian steamer Pas de Carvalh took fire and blew up on Solimoes River, near Manaos; 38.
—April 11. Oil tanker Gulf of Venezuela sunk by explosion at Port Arthur, Tex.; 33.
—April 27. Passenger steamer Chichibu grounded in storm off Horomushiro, Japan; 230.
—Aug. 28. Passenger steamboat Buryvestnik smashed into a river pier near Cronstadt, Russia, and sank; 300.
—Sept. 20. Steamship, sunk in storm off Sundarbans, India; 170.
—Oct. 16. Troop ship blown up in Yangtse River, at Kiukiang, China; 1,200.
—Oct. 20. British navy sloop, Valerian, sunk in storm south of Bermuda; 84. In this storm, over 50 lives were lost in sunken vessels on the Cuban coast. In the previous storm, Sept. 18, over 75 lives were lost among the shipping on the Florida coast.
—Dec. 20. Oil tug, Linseed King, overturned in Hudson River at New York City; 45.
—Dec. 24. French bark, Eugene Schneider, in storm off Portland, England; 24.
1927—Jan. 11. Steamer, John Tracy, off Cape Cod Mass.; 27.
—Feb. 16. Amer. steamer, Elkton, in Pacific, not heard from after date named; 37.
—May 26. Steamship, Negros, carrying native students, near Romblon off Philippine coast; 108.
—Aug. 1. Explosion on Japanese mine layer Tokiwz, ship not sunk; 38.
—Aug. 25. Japanese destroyer Warabi sunk and destroyer Ashi crushed in collisions with cruisers Jiutsu, and Naka, in night manoeuvers off Bungo straits; 129.
—Oct. 25. Italian steamship, Principessa Mafalda blew up and sank off Porto Seguro, Brazil; 314.
—Nov. 15. British Indian steamer, Tukaram, sank in storm off Bombay; 128.
—Dec. 17. U. S. submarine, S-4, sunk off Provincetown, Mass., in collision with Coast Guard destroyer Paulding; 40.
1928—May 7, U. S. Army dredge, Navesink, sunk in collision in N. Y. Harbor; 18.
—July 7. Chilean transport, Angames, wrecked in storm in Bay of Arauco; 291.
—July 17. French Indo-China steamer, Cap Lay foundered at mouth of Songtambo River; 40.
—Aug. 6. Italian submarine, F-14, sunk in collision with destroyer in Adriatic Sea; 31.
—Oct. 3. French submarine, Ondine, down in collision with Greek steamer, off Portugal; 43.
—Oct. 14. American molasses tanker, David C. Reid, sunk in storm near Azores; 45.
—Nov. 12. British steamer Vestris, N. Y. for Barbados and South America, sunk in gale 240 miles off Virginia Capes; 110, of whom 67 were passengers.
1929—Jan. 2. Steamship Malakoff (formerly the Pannonia, in Mediterranean; 40.
—Jan. 21. Chinese steamer, Hongchong (formerly the Sandakan) off East China, 40.
—Feb. 3. German steamer, Deister, in Douro River; 26.
—April 22. Japanese steamer, Toyo Kuni Maru, crashed on Rocky Cape Erino; 103.
—July 9. British submarine, H-47, hull torn open in collision with sister submarine L-12, sunk in 300 feet of water; 21.
—July 16. Chilean transport, Abato, sunk by storm off coast near Topocalma; 48.
—July 17. Russian passenger steamer, Volga, struck by floating World War mine in the Black Sea; 31.
—Aug. 4. Joseph III, excursion steamer, sunk in collision with the Knocke; 50.
—Aug. 18. Spanish steamer, Ogono, sunk in collision with British tug, Kings Cross, off mouth of River Humber, North Sea; 16.
—Aug. 30. Coasting steamer, San Juan, sunk in collision with Standard Oil Tanker, S. C. T. Dodd, off Santa Cruz, Calif.; 70.
—Sep. 7. Coasting steamer, Kuru, upset in gale in Gulf of Finland; 100, mostly children.

Note—The above list does not, with several exceptions, contain the data of combatant and merchant ships lost in the World War by America's foreign allies and by Germany and the other Central Powers.

The total lives lost on United States merchant vessels, Aug. 3, 1914 to Nov. 11, 1918, due to the war approximated 775.

Lives lost in the same period on British merchant ships totaled 15,313.

"S O S" IS SIMPLY A SIGNAL; LETTERS STAND FOR NO WORDS.

Deluged by letters from civilians after every storm took its toll of shipping in the North Atlantic as to the meaning of the radio distress call letters "S O S," U. S. Naval Communications explains that the letters had no meaning in themselves.

Citizens who thought the letters meant "Save Our Ship" or "Save Our Souls," it was stated, were in error.

The letters were selected by the Internationa Radiotelegraph Conference at London in 1912 because the combination of dots and dashes was so simple that even the most inexperienced radio operator would have little difficulty in detecting it.

As expressed in the dot-and-dash code, the S O S signal is . . . — — — . . . (three dots, three dashes, three dots).

Previously the distress call had been "C. Q. D."

THE SEVEN WONDERS OF THE ANCIENT WORLD.

The Pyramids of Egypt—These royal tombs, about 70 in number, lie on the west side of the River Nile, beginning at Ghizeh or Gizeh, opposite Cairo, and extending south for 60 miles or so. "They represent," says Director James H. Breasted of the Oriental Institute, University of Chicago (April 30, 1929), "1200 years of Egyptian history. The earliest of these great monuments was erected not long after 3000 B. C., and the latest a little later than 1800 B.C. The earliest superstructures of stone masonry now known, they represent the origins of architecture in stone, at a time when civilization elsewhere possessed no other architecture than that of wood and sun-dried brick.

"At the same time, a monument like the Great Pyramid of Gizeh, containing about 2,300,000 blocks of stone each weighing some 2½ tons, put together with surface joints almost equalling the accuracy of modern commercial optics, is the product, not only of technical and engineering skill, but is also the result and tangible expression of a social and governmental organization, able to converge all its resources of wealth, labor, mechanical skill, and administrative efficiency upon one supreme achievement, to which there is no suggestion of a parallel in Western Asia until two thousand years later, that is until after the beginnings of the Assyrian Empire in the Eighth Century B.C."

The **Pyramid of Cheops** is 461 feet high, 746 feet square at the base, and covers nearly 15 acres.

The **Sphinx**, near Gizeh, is a great wingless crouching lion hewn out of solid stone, 172.5 feet long, and 66 feet high. Between the two extended paws is a granite altar with inscriptions apparently indicating that it was built in the Fourth Dynasty, possibly 3750 B. C.

South of Luxor (ancient Thebes) is the tomb of King Tutankhamen, which was entered in 1924 and still is being explored.

The Gregorian Calendar had its origin in the calendar devised by the Egyptians. The Egyptian calendar was developed through years of study of the length and direction of the noonday shadows cast by the pyramids, which it is now thought were built for that purpose. As the land in Egypt capable of cultivation was limited to the delta area of the Nile and the two narrow strips on the bank which were inundated annually, the ancient Egyptians were forced to increase their crops by intensive cultivation.

This could only be done by locating and using the precise seasons required in raising the various crops. The range of the seasonal sunrise point from farthest north to farthest south is so narrow in Egypt that the use of this method for determining the seasons gave inaccurate results.

The seasons could best be determined by measuring the length of the shadows cast by the sun at noon. At first the shadow cast by an obelisk was used, but to give a longer shadow a pyramid was built.

The pyramids were made, one by one, higher and higher, in order to give longer shadows, and to give a more perfect slope, until finally the Gizeh Pyramids near Cairo were built. These pyramids were used by the Egyptian astronomers in devising their calendar and their astronomy, which was the beginning of the present astronomy.

The pyramids were used as tombs for the Pharaohs only after each pyramid had been superseded by a more perfectly sloped or higher one. The Great Pyramid has a height of 480 feet, and there is a difference of about four feet in the length of the noonday shadow on two consecutive days near the Equinox.

The Hanging Gardens of Babylon were near the Euphrates River, in the palace of King Nebuchadnezzar, 60 miles south of the present City of Bagdad, and not far from the eastern border of the Syrian Desert of Northern Arabia. The terraced gardens, planted with flowers and small trees, with fountains and refectories interspersed, were 75 to 300 feet above the ground. Water was stored in a reservoir on the top terrace and was piped down to the gardens. They date from about 600 B. C.

The Temple of Diana in Asia Minor, at Ephesus, an ancient but now vanished city on the east side of the Aegean Sea, south of Smyrna, was built in the Fifth Century B. C. by the Ionian cities, as a joint monument, from plans by the architect Ctesiphon. The building was of marble, 425 x 225 feet and the roof was supported by 127 columns of Parian marble each 60 feet high and each weighing about 150 tons. In 356 B. C., the temple was burned by Herostratus, a crank who wanted notoriety.

The Statue of Jupiter Olympus, in the valley of Olympia, province of Elis, 12 miles or so inland from the west coast of the southern peninsula of Greece, which anciently was called the Peloponnesus.

The statue, begun by the Greek sculptor Phidias after he had been banished from Athens in 432 B. C., was of marble encrusted with ivory and the draperies were of beaten gold. The bearded god was in a sitting posture, with an olive wreath on his head. In his right hand was the figure of Victory; in the left, a sceptre.

The Tomb of Mausolus, King of Caria, in Asia Minor, at Halicarnassus, on the eastern side of the Aegean Sea opposite Greece. It was built of marble about 352 B. C., by Queen Artemisia, the widow, was named **Mausoleum**, and was remarkable for its beauty and its magnificent interior. It was destroyed by an earthquake.

The Pharos of Alexandria, a white marble light-house or watch-tower on the island of Pharos, in the port of Alexandria, Egypt, was completed by King Ptolemy Philadelphus 265-247 B. C. The island had been joined by Alexander the Great to the mainland of Egypt by a causeway when he founded Alexandria. The structure cost $850,000. It was over 400 feet high. It was partly razed in the 5th Century, A. D., and was destroyed in 1375 by an earthquake.

The Colossus of Rhodes was a brass statue of the Greek sun-god Apollo 70 cubits (about 109 feet) high erected by Charles of Lindus at the port of the City of Rhodes on the island of Rhodes in the eastern part of the Mediterranean Sea off the coast of Asia Minor north of Alexandria. It took 12 years to build, cost 300 talents ($258.000), was completed about 280 B. C. and was thrown down 224 B. C. by an earthquake There it lay on the ground until 672 A. D. when the Turkish Government, the Saracens having seized Rhodes, sold the statue and it was broken up.

OTHER WONDERS OF THE WORLD.

The Great Wall of China, built in the Third Century B. C., extended along the Northern frontier of that country, from the northern part of the Gulf of Pechili, on the Yellow Sea, north of Peking, in a zigzag course, to Syning, on the border of Turkestan.

Professor Geil, who made a reconnaissance of the wall about 1908, visiting both ends of it and several intermediate points, estimates the total length of the Great Wall, including all known spurs, curves, and loops, at 2,550 miles. He also estimates that there were some 25,000 watch-towers built into the wall and some 15,000 detached watch-towers. The air-line distance between the point where the wall reaches the sea at Shanhaikwan and the western terminus, identified by Professor Geil on the Great White River west of Suchow in the pan-handle of Kansu Province, is 1,145 miles.

The wall which has crumbled into heaps in many places was, at Kalgan, (as measured in 1900 by Col. H. B. Ferguson), 17 feet, 6 inches, thick and 16 feet high, made of two face walls of large brick, filled between with earth and stones. On the Chinese side, the face wall is carried up to form a parapet 3 feet high, and on the Mongolian side the parapet is 5 feet high, cut down at frequent intervals with machicolations. These features are characteristic of the wall wherever it is fully preserved, and enable one to identify the enemy face from the Chinese face in photographs.

There is nothing formidable about the cross-section of the Great Wall. Compared with the many city walls of China it is a modest affair. The walls of the Tartar City of Peking, for example, are 40 feet high and 60 feet thick at the base.

The Tower of Babel, at the Chaldean City of Ur in lower Mesopotamia, has completely disappeared. The base of the tower was 300 x 300 feet, tapering through 7 stages to the Shrine at the top.

The height also was 300 feet.

The smaller sister of the Tower of Babel is the **Ziggurat** at Ur, which is 195 x 130 feet at the base and probably more than 150 feet high.

Stonehenge, an assemblage of huge shaped stones in 3 circles, one within another, on Salisbury Plain, 90 miles or so southwest of London, England. The outer circle is 100 feet in diameter, the next within is 75 feet in diameter, and the circle inside that one has a diameter of 40 feet. Extending around the outer circle is a deep trench 333 feet in diameter. The stones of the outer circle, originally about 30 in number, average 12 x 6 x 3 feet, fastened in couples by blocks fixed across the tops. The stones in the inner circles are smaller. The stones date back to Celtic-Cymric time. The name "stone henge" is a corruption of stan-hengest (stone stallion).

The Catacombs at Rome were the sepulchres of the early Christians, and consisted of more than 40 groups of labyrinths, or galleries and chambers, covering 615 acres, sometimes extending 5 stories (70 feet) below the surface of the ground.

The Circus Maximus, at Rome, built 605 B. C., by King Tarquin and rebuilt and enlarged by Julius Caesar some years before the birth of Christ, was

312 feet high, 1,875 feet long, and 625 feet wide. It then held 150,000 spectators, but the capacity was increased to 385,000 in the Fourth Century A. D. The place was used for games and for horse and chariot races.

The Coliseum, or Colosseum, at Rome, one of the largest amphitheatres in the world, was begun by the Emperor Vespasian and finished by the Emperor Domitian, 82 A. D. In 238 A. D. a fourth story was added. The ruins still stand. The building, elliptical, was 615 x 510 feet, and the floor of the arena was 281 x 176 feet. The walls were stone; the seats, marble; 50,000 persons could sit, 20,000 could stand. The cost was 10,000,000 crowns ($15,000,000). The work of construction was done by 12,000 slaves from Jerusalem. Wild animals were kept in dens under the floor. Thousands of persons, including early Christians, perished in combats with lions and tigers. Gladiators also fought there.

The Mosque of St. Sophia, at Constantinople, was built as a Christian Cathedral by the Roman Emperor Justinian, 531-538 A. D., in the form of a Greek cross, 269 x 143 feet with a flattened dome 180 feet high, set in a cluster of cupolas and minarets. The brick walls are lined on the inside with marble plundered from Greek temples. The Sultan of Turkey, Mohammed II., turned the cathedral into a mosque in 1453 A. D.

The Leaning Tower of Pisa is one of the so-called wonders of the middle ages. It is a round, 8-story bell-tower and was built of marble, in 1154 A. D.; it is 188 feet high, and the top is 16 feet out of the perpendicular. There are leaning towers at St. Moritz, at Ems, at Ulm, at Asinelli, and at Garisenda.

The Porcelain Tower of Nankin was built in that ancient capital of South China in the early part of the 15th Century. It was an octagonal 8-story tower, 261 feet high. The Taiping revolutionists destroyed it in 1853.

The Vatican at Rome is the largest residence in the world, containing several thousand rooms. It stands on the north side of the River Tiber and its nucleus was a house built in the time of the Emperor Constantine. It was enlarged from time to time and has been the only regular home of the Roman Pontiffs since they abandoned their palace at Avignon, France, in 1377.

The Cathedral of St. Peter, at Rome, the largest church in the world, begun in 1506 by Pope Julius, and completed in 126 years; covers 18,000 square yards and is 636 feet long, with a nave, or cross-section, 151 feet long. The top of the cross on the dome is 435 feet above the ground.

Angkor, a ruined City in Siam, the ancient capital of Cambodia, is an Asiatic wonder. Its true name is Nagara Thom. It is also known as Nakhon Thom. The walls of the city, which are 30 feet high, enclose an area 2 miles square. Several miles south of the place stand the ruins of a splendid temple (Angkor Wat, or Nakhon Wat) with 3 Javanese towers.

FAMOUS WATERFALLS OF THE WORLD.

Name and Location.	Hght in Ft.	Name and Location.	Hght in Ft.	Name and Location.	Hght in Ft.

The brink of Niagara Falls has moved seven miles west in 30,000 years; the present rate of erosion is 2¼ to 4 feet a year in the Horseshoe Falls.

Niagara at the lip of the precipice (including Goat Island) has a total width of about 5,300 feet. Victoria, (including Livingstone and Cataract Island), has a total width of about 5,700 feet. Iguassu (including the Island of St. Martin) has a width, estimated, of more than 10,000 feet.

Niagara, as the outlet of the four Western Great Lakes which constitute half of the fresh water of the world, has a volume of water almost unaffected by the seasons. The river below Grand Island is 2¼ miles wide, and descends 52 feet in the last mile. The chasm into which it drops is 1,250 feet wide at the falls, 800 feet wide two miles further down, and less than 300 feet at Whirlpool Rapids.

Charles Blondin, whose real name was Jean Francois Gravelet, crossed Niagara Falls on a wire tight-rope, in 1855, in 1859, and in 1860. Gilarma A. Farini (William Leonard Hunt) crossed on a tight-rope in 1864.

Anna Edson Taylor plunged over the Horseshoe Falls in a barrel Oct. 24, 1901—time in the barrel, 1 hour, 15 minutes.

Bobby Leach went over the Horseshoe Falls in a barrel, July 25, 1911—time in the barrel, 22 minutes. He also navigated the Whirlpool Rapids.

Jean A. Laussier, of Springfield, Mass., on July 4, 1928, went over the Horseshoe Falls in a 758-lb. rubber ball. Laussier started his trip from a point off Cayuga Island, three miles up the river, and traveled the distance including the drop in 50 minutes.

The ice bridge in the Niagara Gorge broke without warning, Feb. 4, 1912, and carried 3 persons to death.

Two men crossed on the ice bridge Feb. 12, 1928.

The Zambezi in flood is about two miles wide. The canyon below the Victoria Falls is from 200 to 300 feet wide and even narrower further down.

Iguassu carries the smallest volume of water of the three great falls. It is swollen tremendously in flood. The upper rapids narrow to one half mile in width just before spreading out, fanlike, for the drop. The Devil's Throat Chasm is more than 200 feet deep and short and narrow.

The Shoshone Falls are 950 feet wide and Montmorenci 150 feet wide.

The Grand Falls in Labrador, are in the course of the Hamilton river, which, in the course of 5 miles, drops 200 feet in tremendous rapids and then, with a roar audible 20 miles away, makes a final plunge of 316 feet into a circular basin.

BIRDS THAT HAVE CROSSED THE ATLANTIC.

(By Frederick C. Lincoln of the U. S. Biological Survey.)

Although most species of migratory birds confine their journeys to flights between northern and southern continents, there are a few that occasionally cross the ocean. These are almost entirely water birds, chiefly gulls and terns, and flights are known from both east and west.

The first American bird for which a definite crossing has been recorded is that of a common tern (*Sterna hirundo*) that was banded at Eastern Egg Rock, Me., on July 3, 1913, and found dead in August, 1917, at the mouth of the Niger River, West Africa.

Two other American terns are known to have made the crossing: An Arctic tern (*Sterna paradisaea*), banded July 22, 1927, on the Red Islands, Turnevik Bay, Labrador, was picked up near La Rochelle, France, on October 1, 1927.

Another Arctic tern, banded at the same place on July 23, 1928, was found dead on the beach at Margate, 15 miles southwest of Port Shepstone, Natal, South Africa, on November 14, 1928.

This last record represents the longest flight known for a banded bird.

A few birds banded in Europe have been recovered on the American side of the Atlantic, as follows: A black-headed gull (*Larus ridibundus*), banded at Rossitten, Germany, on the Baltic Sea, on July 18, 1911, was recovered near Bridgetown, Barbados, British West Indies, during November of the same year.

Another was retaken in February, 1912, near Vera Cruz, Mexico.

At least two kittiwakes (*Rissa tridactyla*) banded at islands off the coast of England have been recaptured on the American side, one on the coast of Labrador and the other in Newfoundland.

A Lapwing (*Vanellus vanellus*), banded in England in 1926, was killed in Newfoundland in the Fall of 1927.

Distances of the World.

TRAVELLING DISTANCES IN EUROPE.

(From the U. S. War Department's *Official Table of Distances:* mostly by rail, some by rail and water, the figures cover, in statute miles, the shortest generally-travelled routes.)

ALASKA DISTANCES.

(From the War Department's Official Table of Distances; statute miles.)

Fort Davis, to—*Cape Nome*, 4; *Dawson*, B. C., 1,725; *Dutch Harbor* (Unalaska), 757; *Ft. Egbert*, 1,594; *Ft. Gibbon*, 1,019; *Portland*, Ore., 2,928; *Rampart City*, 1,094; *San Francisco*, 3,700; *Seattle*, 2,745; *Ft. St. Michael*, 119; *Vancouver Barracks*, Wash., 2,918.

Fort Egbert, to—*Dawson*, B. C., 130; *Ft. Gibbon*, 575; *Seattle*, 1,811; *Skagway*, 695; *Ft. St. Michael*, 1,475; *Valdez*, 1,559.

Fort Liscum, to—*Dutch Harbor*, 935; *Fairbanks* (winter), 538; (summer), 2,412; *Juneau*, 752; *Portland*, Ore., 1,858; *Port Valdez*, 3; *Ft. St. Michael*, via Dutch Harbor, 1,741; *Seattle*, 1,675; *Seward*, 168; *Skagway*, 867; *Vancouver Barracks*, 1,848; *Ft. Seward*, 847.

Fort St. Michael, to—*Anvil City*, 115; *Barr's Harbor*, 310; *Boundary*, 1,500; *Cape Nome*, 115; *Cape York*, 221; *Cape Topok*, 102; *Circle City*, 1,330; *Dawson*, B. C., 1,605; *Dutch Harbor*, 806; *Eagle City*, 1,475; *Fairbanks*, 1,134; *Ft. Yukon*, 1,255; *Ft. Gibbon*, 900; *Kaltag*, 625; *King Is.*, 219; *Kokrines*, 800; *Koserefski*, 410; *Koyukuk*, 700; *Porcupine River's Mouth*, 1,245; *Nome*, 115; *Port Clarence*, 232; *Port Hamilton*, 1,035; *Postoltk* (mouth of Yukon River), 65; *Rampart City*, 975; *Rapids*, 935; *Russian Mission*, 320; *Seattle*, via Dutch Harbor, 2,794; *Selkirk*, B. C., 1,781; *Skaguay*, 2,170; *Tanana River* (mouth of), 900; *White Horse*, B. C., 2,058; *White River*, B. C., 1,686.

Skagway, to—*Bennett*, B. C., 41; *Cape Nome*, via Dawson, 2,285; *Circle City*, 840; *Ft. Davis*, via Dawson, 2,289; *Dawson*, 565; *Dutch Harbor*, via Valdez, 1,796; *Eagle City*, 695; *Ft. Selkirk*, B. C., 383; *Ft. Yukon*, 915; *Ft. Gibbon*, 1,270; *Juneau*, 115; *Ft. Liscum*, 867; *Portland*, Ore., 1,299; *Port Townsend*, *Wash.*, 1,068; *Rampart City*, 1,195; *Ft. St. Michael*, via Dawson, 2,170; *San Francisco*, 2,071; *Seattle*, 1,116; *Sitka*, 219; *Valdez*, 864; *Vancouver Barracks*, 1,289; *Ft. Seward*, 20; *White Horse*, B. C., 111; *Wrangell*, 365.

PORTO RICAN DISTANCES (STATUTE MILES).

Ponce, to—*Aguadilla*, 84; *Arecibo*, 122; *Arroyo*, 48; *Bayamon*, 163; *Cayey*, 43; *Coamo*, 20; *Nayaguez*, 54; *San Juan*, by rail, 175; by land, 81; by water, 149; *Santurce*, 78; *Vieques*, 92; *Yauco*, 21.

San Juan, to—*Aguadilla*, 91; *Aibonito*, 51; *Arecibo*, 53; *Arroyo*, 58; *Bayamon*, 7; *Caguas*, 24; *Camuy*, 62; *Carolina*, 14; *Cayey*, 38; *Coamo*, 61; *Faiardo*, 40; *Humacoa*, 43; *Lares*, 78; *Las Marias*, 118; *Manati*, 36; *Mayaguez*, 121; *New York City*, 1,559; *Rio Pedras*, 7; *St. Thomas*, W. I., 83; *San German*, 133; *Utuardo*, 73; *Vieques*, 57; *Yauco*, 154.

CUBAN DISTANCES (STATUTE MILES).

Santiago de Cuba, to—*Baracoa*, 167; *Batabano*, 576; *Cape Mayst*, 136; *Cienfuegos*, 399; *Guantanamo*, 69; *Havana*, 532; *Key West*, Fla., 636; *Kingston*, Jamaica, 198; *Manzanillo*, 198; *New York City*, 1,512; *Nuevitas*, 240; *Siboney*, 12.

DISTANCES IN THE PANAMA CANAL ZONE.

Colon, to—*Amador, Ft.*, 48; *Ancon*, 47; *Balboa*, 46; *Bas Obispo*, 50; *Bohio*, 18; *Caimito*, 26; *Corozal*, 44; *Culebra*, 45; *Darien*, 25; *Gamboa*, 30; *Gatun*, 7; *Gold Hill*, 36; *Las Cascadas*, 48; *Miraflores Lock*, 42; *New Culebra*, 35; *New Gatun*, 6; *Panama*, 48; *Paraiso*, 41; *Quebrancha*, 12; *Summit*, 44.

AUTOMOBILE TOURING DISTANCES IN THE UNITED STATES AND CANADA.

THE OLD OAKEN BUCKET

On a hot and dusty auto trip a drink of cool water from the old-oaken-bucket type of well looks attractive, but from a sanitary viewpoint such open and exposed water supplies are the ones to be shunned.

Investigation of these kinds of water supplies for the primary purpose of protecting automobile tourists was started in Ohio a number of years ago, when a "Seal of Safety" campaign was inaugurated.

Water supplies readily accessible to travelers on the main highways were examined, and those found or made satisfactory had attached to them a seal called "The Seal of Safety."

Since that time many other States have initiated this work, and now some device indicating suitable drinking water supplies may be found attached to pumps along most of the principal highways of the country.

AUTO TOURING MILEAGE IN EAST AND SOUTH

Motorists who wish to spend longer than 90 days in Canada must deposit $25 and sign a bond in approved form for double the amount of the estimated duties on the vehicle, or secure a special bond of an incorporated guarantee company authorized to do business in Canada.

American customs regulations do not require registration of automobiles owned in the United States entering Canada. Returning to the United States, the tourists' State registration card is accepted as establishing American ownership and origin of the car.

VELOCITY OF SOUND.

"How far away was that flash of lightning?" is a common question. The answer is that sound travels through hot summer air (100°) at 1,266 feet a second. In zero weather sound flies through dry air at 1,088 to 1,150 feet a second.

Speed of sound (feet per second) in other mediums—ice-cold vapor, 4,708; vapor at 60 degrees, 5,657; ice-cold water, 4,938; granite, 12,960; iron (hot), 15,480 to 17,390; steel, cast, 16,360; wood (oak), 12,620; brick, 11,980; glass, 16,410 to 19,690; clay rock, 11,420; gold, 5,717 to 6,890; silver, 8,658.

The distances in all of the auto touring routes are subject to slight variations on account of detours.

THE PARIS OF THE ROMANS.

(By George Slocombe in the New York Herald Tribune.)

The city which of all modern cities most frequently has been compared to the Babylon of the ancients is almost the youngest of the capitals of the Old World.

While the Greeks and the Egyptians were still marveling at the monuments bequeathed to them by a remote and magnificent antiquity the southern coast of Gaul lay bare indeed to the greedy gaze and ravishing hand of the Phoenicians. The ruddy coast, bathed by the familiar blue waters of that inland sea which washed the shores of all the charted world, tempted them to land, and land they did, from their dark galleys.

Their swarthy skins, their flashing eyes, may yet be identified in the people of the coast between Marseilles and Nice. But behind the smiling hills lay all Gaul, a land hidden with dark forests, a dim and murmurous unknown. And the adventure of piercing those secret places, of subduing the wild races that inhabited them, the Phoenicians left to the Romans. The traders retreated before a peril that the soldiers braved.

When Marseilles had long been a Roman city, and before it a Phoenician city, the Paris that the Romans later knew as Lutetia was but at most a collection of fishermen's huts near a ford on the Seine.

Provence was already a thriving colony of traders and cultivators, whose crops of wheat and oil and wine went annually by galley across the smooth and treacherous sea to Rome, or were stored in secret places, in silo or earthen jar, along the important new lines of communication rapidly extending northward along the Rhone, and northwestward along the Loire to Brittany.

In the shadow of the beautiful old castle of Amboise, in Touraine, a wine merchant will still show you the enormous brick-lined silos cut out of the rocky hill by the first Roman garrison.

They were entered from above, and the narrow aperture of each bottle-shaped granary was sealed and hidden in the paved floor of the fortress. The silos have served various and strange purposes in the twenty centuries since they were first constructed by a prudent garrison commander foreseeing a day of peril.

They have served as dungeons, into which a luckless man was lowered and forgotten. And more cheerfully as wine cellars. Even at this late day they are in perfect preservation.

When, in the course of the first century before Christ, the Romans came up the Marne to its confluence with the Seine, they found a settlement of Gauls already in existence on the narrow island in the Seine between the four hills of Montmartre, the Buttes, Chaumont, Montparnasse and Sainte Genevieve.

In the year 53 B. C. Caesar mentioned the settlement of Lutetia, whose inhabitants he described as Parisii. It was to the island city that he summoned the leaders of the Gaulish tribes to receive their submission.

And when in that year, the Parisii, true forerunners of the Parisians of the eighteenth and nineteenth centuries, rebelled against the domination of the alien armies, they were crushed by Caesar's general, Labienus, in a battle in which the protagonists, like Paris students 2,000 years later, struggled on the slopes of what is now the Boulevard Saint Michel.

For the curious history of the Boul' Mich' goes farther back than Murger.

The Romans, like the Gauls, at first confined their city to the narrow island which still bears that name, the Ile de la Cite. And there they built a palace which harbored several emperors and from which Julian set out to battle with Constantine. The island was then fortified with ramparts.

It contained, besides the palace of the emperors, the barracks of the garrison and the houses of the merchants, a temple to Jupiter, on whose altar traders and passing boatmen sacrified offerings of wine and corn.

For there was good wine grown in Paris then. The hillsides of Auteuil and Suresnes yielded a nectar that appealed even to the fine palate of the Emperor Julian, jaded perhaps with the heavy aromatic wines of the Capri or the Greek Islands, and the heavy, harsh wines of Rome.

At Suresnes to this day, on the hillside which contains the American Cemetery, a red wine is grown that the Mayor and Municipal Council offer with considerable pride to visitors. It is the last of the wines of Paris.

Under Constantine, Lutetia extended on the left bank of the Seine. The Roman legionaries, faithful to their passion for public games, built a large amphitheater, of which the relics may still be seen in the Arenes de Lutéce.

The rich traders and the Roman notables gradually deserted the little island fortress on the river for the clearer air and wider view to be enjoyed on the hill of Sainte Genevieve.

And their white villas, Roman in pattern like everything that they built, in their unescapable loyalty of the Roman in exile, rapidly covered the heights which looked northwards to the Temple of Mars, on the crest of what is now Montmartre.

For some notable or other, and legend has it for the Emperor Julian himself, the Romans or their enslaved Gauls built a great palace at the present junction of the Boulevards St. Michel and St. Germain. It was such a palace as had never been built in Gaul before or since, a palace with the magnificent baths of the Romans.

Of all that splendor only the ruins of the baths remain. Their blackened stones may be seen in the space adjoining the Cluny Museum.

Their discoloration bears tribute to the sacrifice that the sun loving legionaires made when they marched northward into exile out of the white cities of the Mediterranean into exile and the mists, the rain, the gray skies of the barbarian.

DISTANCES BY WATER FROM NEW YORK CITY.

The data used in the following table of distances by water from New York City to the ports named are compiled from the records of the United States Hydrographic Office, Navy Department.

TABLE OF DISTANCES FROM NEW YORK CITY (THE BATTERY) TO:

Place—Route and Season.	Miles. Naut.	Stat.
Aarhus, Den.—Winter; E. bound	3,654	4,208

Mail-time distances in the United States—These are subject to frequent changes owing to air-mail routes which are being extended in every direction, and also owing to different routings of train mail.

A letter by an all-rail route may go from New York City to San Francisco in 83 hours (3½ days). It can go by air route in half the time.

The all-rail mail time New York to Chicago is 21 hours; to St. Louis, 23 hours; to New Orleans, 39 hours; to Austin, Tex., 49 hours; to Vancouver, Brit. Col., 88 hours; to Halifax, Nova Scotia, 43 hours.

The famous dirigible balloon, Graf Zeppelin, in August, 1929, brought passengers, mail, and freight from Frederichshafen to Lakehurst, N. J., in 93 hours, or less than 4 days, by way of the Azores.

The same balloon took mail, etc., from Lakehurst to Frederichshafen, on the return trip, in 55 hours and 24 minutes, or considerably less than 3 days.

A letter by airplane and steamship in 1929 went from Berlin to New York City in 7 days.

IMPORTANT TUNNELS OF THE WORLD.

(For New York City Tunnels see elsewhere.)

UNITED STATES.

Baltimore—The first use of electric motive power on the railroads in this country was on the *Baltimore and Ohio Railroad* in 1895 at Baltimore, Md. The main line of this railroad passes under the principal business portion of the city in tunnels which were completed in 1894.

The main tunnel under Howard Street is over 7,000 feet in length and represents one of the pioneer efforts leading up to present subway systems. Methods were originated of supporting adjacent structures and of controlling quicksand and underground streams encountered during construction. Through the quicksand areas, the adjacent ground was solidified by forcing large quantities of cement grout into it.

Electrical motive power was adopted to eliminate objectionable smoke and gases in the tunnels. Power was, at first, supplied from overhead wires, but in 1902 this was replaced by a third-rail system.

The electrified section totals about seven miles in length.

The Pennsylvania Railroad has 2 tunnels under Baltimore: *Union Tunnel*, north of Union Station built by the Union Railroad Company of Baltimore in 1871; a two-track tunnel, 3,400 ft. long, located under the bed of Hoffman Street from Bond Street to Greenmount Avenue. *Baltimore Potomac Tunnels*, south of Union Station, built by the Baltimore and Potomac Railroad Company in 1873; two-track tunnels under Wilson Street from North Avenue to Pennsylvania Avenue, 4,960 ft. long and under Winchester Street from Fremont Avenue to Gilmore Avenue, 2,190 ft., a total length of 7,150 ft.

Big Bend—Drains the Feather River in California, 2 miles; opened 1886.

Bitter Root Mountains (Montana and Idaho)—10,100 feet long.

Busk-Ivanhoe Tunnel on the Colorado Midland R. R., 9,600 feet long, single track, under the Continental Divide, in Lake and Pitkin Counties.

Cascade Mountain—Through the Cascade Mountains in Washington, 41,142 feet; opened in 1929.

Catskill Aqueduct—92 miles to N. Y. City, and 35 miles of distributing tunnels deep down under the city itself; partly opened 1915, completely, 1917. The *Shandaken Tunnel*, a part of the Catskill water supply system, is used to deliver the water of Schoharie Creek to the Ashokan reservoir. It is 18.1 miles long, the longest tunnel in the world. It is concrete-lined, 10½ feet wide and 11½ feet high, with a capacity of 600,000,000 gallons a day; put in service Feb. 9 1924.

Croton Aqueduct—33⅓ miles to N. Y. City; opened 1888.

Cumberland—Under Cumberland Mountains, Tennessee, 8,000 feet long.

Detroit (Mich. Central Ry.)—Under Detroit River.

Gallitzin Tunnel, through the Alleghany Mountains at Gallitzin, 11 miles west of Altoona, Pa., is 3,600 ft. long; was built in 1854, for two tracks of the Pennsylvania Railroad. In 1904 a new single track tunnel was built parallel with the old tunnel, through which is operated one westbound track, another westbound track being operated through the old tunnel, replacing the original two tracks in order to give added clearance. The two eastbound tracks through the mountain use what is known as New Portage Tunnel, 1,610 ft. long, which was built by the State of Pennsylvania in 1855, and purchased by the Pennsylvania Railroad Company in 1857.

Gunnison—Southwestern Colorado, 6 miles; opened 1909.

Hoosac—Through Hoosac Mountain, Mass., 4¾ miles; opened 1873.

Moffat—This tunnel pierces the Rocky Mountains at the so-called Continental Divide, in Grand and Gilpin Counties, Colo. It is on the line of the Denver and Salt Lake Railway, with it's Eastern portal 50 miles west of Denver; and it shortens by 23 miles the traveling distance between those cities. The bore, 39,560 ft. long, begun in 1923 and holed-through on Feb. 18, 1927, was opened to train traffic in February, 1928. The tracks at the eastern end, near Tolland, are 9,198 ft. above sea level, and 9,085 feet at the western opening, near Irving. The dimensions of the main tunnel are 24 feet high by 16 feet wide. The bore carries a single track, laid with 110-pound rail on treated oak ties with rock ballast. The project was started by David H. Moffat, railway builder, who died in 1911.

Mt. Roberts—From Gastineau Channel at Juneau, Alaska, into Silver Bow Basin, 1 1-3 miles.

St. Clair—Under St. Clair River from Sarnia, Ont., to Port Huron, Mich., 2 miles; opened 1891.

Southern Pacific and Central Pacific Railroad tunnels: *Chatsworth Park*, through Coast Range Mountains, in Los Angeles County, Cal., 1.4 miles; *San Fernando*, through Spur 1.32 miles.

Strawberry—Through the Wasatch Mountains.

Sutro—Drains the Comstock Lode in Nevada, 4½ miles; opened 1879.

CANADA.

Connaught—Through Selkirk Mountains, under Rogers Pass, British Columbia; on Canadian Pacific Railway, double track, five miles long; completed 1916.

Spiral—The tunnels on the Canadian Pacific Railway, between Hector and Fields, B. C., consist of two spiral tubes, the westerly, 3,255 feet long, under Cathedral Mountain; and the easterly, 2,921 feet long, under Mt. Ogden, with the Kicking Horse River between.

EUROPE.

A tunnel under the English Channel, connecting Britain with France, and also one under the Strait of Gibraltar, between Spain and Africa, were proposed by European financiers in 1929. The Strait is 9 miles wide; the channel, 22 miles. The cost of a channel tube was estimated at $150,000,000:

Alps.—Alberg—Under the Alps at the Arl Mountains and extends from Langen to St. Anton, 6¾ miles; opened 1884.

Col. des Montets—On the narrow-gauge electric railway from Fayet, France, to the Swiss frontier; length, 1882 meters (about 1⅛ miles); opened in 1918.

Loetschberg—Through the Alps, in Oberland Switzerland, 47,685 feet; opened June 20, 1913, costing nearly $10,000,000.

Mont Cenis—Italy to France, under the Col de Frejus, 42,150 feet; opened 1871. The line is electrified between Modane and Culoz.

Mont d'Or—Between France and Switzerland, was bored through October 2, 1913. The tunnel pierces the Jura Mountains from Fresne to Vallorbe, and is 3¾ miles long.

Nice-Cuneo—Under the Alps; opened for rail traffic in 1928. There are 2 tunnels on the line; one of 5,939 metres, at the Col de Braus; one of 3,888 metres under Mont Grazian. The entire route is 76½ miles in length.

The French and Italian Governments arrived (1927) at an agreement to pierce a tunnel under Mont Blanc for the construction of a new railway line 32 miles long, from Aosta to St. Didier.

Samport—In the Pyranees Mountains, from Pau, France, to Canfranc, in Spain; over 4 miles; opened in 1928.

St. Gothard—Through the Alps, connects Goschenen with Airolo, in Switzerland, 48,927 feet; opened 1881; now electrified.

Simplon—Through the Alps, 64,971 feet; opened 1905; twin tunnel opened in 1921; both are electrified.

Wasserfluh—In the Alps, between Bunnadern and Lichtensteig, Switz., 2 miles, opened 1909.

England.—Blackwell—Under River Thames, England, 1⅓ miles; opened 1897.

Severn—From Monmouthshire to Gloucestershire, England, 4½ miles; opened 1886.

Totley—England, 3¾ miles.

Woodhead—Liverpool to Birkenhead, England, under the River Mersey, 11,380 feet (vehicular).

France.—Rove—The southern section of the Marseilles-Rhone canal in France. This piece of engineering, declared the largest accomplished since the building of the Panama Canal, was formally opened late in April, 1927, by the President of the Republic. The underground canal, which passes through a rocky ridge for a distance of 4½ miles, has cost about 135,000,000 francs. Its greatest width is 72½ feet, and the width of the water channel is 60 feet. The roof is 37½ feet above the water. Two 1,500-ton barges can pass it without difficulty. The "Tunnel du Rove" is only part of the 50-mile canal which is eventually to join the Rhone River (at Arles) to Marseilie. The canal will be at sea level throughout its entire length, except for a single lock at Arles.

OTHER TUNNELS.

Trans-Andine Ry. (South America) Tunnel—3,463 yards long, 10,512 feet above sea level and affords direct communication between Valparaiso and Buenos Ayres; opened April 5, 1910.

Khojak Pass—India, Quetta to Landsbar, 2 miles.

Otira—In New Zealand, 5½ miles.

*Under construction.

The Kingston, N. Y. bridge carries a reinforced concrete deck that provides a roadway 22 feet wide between curbs and two sidewalks each 5 feet wide. The roadway is designed for the heaviest motor trucks, that is to say, for the heaviest highway traffic. A clearance of 90 feet for a width of 200 feet over the channel of Rondout Creek is provided.

This structure forms a link, between Kingston and Sleightsburg, in the system of highways built by the State of New York adjacent to the west shore of the Hudson River. It is the first suspension bridge to be built by the State of New York and also the first of that type built since the completion, in 1909, of the Manhattan Bridge over the East River.

The International Peace (toll) Bridge over the Niagara River, from Fort Porter, at Buffalo, N. Y., to Fort Erie, in the Province of Ontario, Canada, was formally opened on Aug. 7, 1927.

The bridge, of steel with five granite covered concrete piers, is 4,400 feet long, with a vertical clearance of 100 feet above the river, and a horizontal clearance of about 345 feet above Black Rock Canal, which parallels the Niagara.

The Mid-Hudson Bridge, which is under construction, leaves the junction of Church and Union Streets, Poughkeepsie, and crosses the Hudson River to the Town of Lloyd, Ulster County.

The caisson on the east side was sunk 12 feet too far to the west, This discovery was made after months of work in righting it to a vertical position. The caisson then was 135 feet below the surface of the water.

To move this great weight of steel and concrete ten feet to the east through stiff clay was an impossibility, and any method of adding ten additional feet to the east side of the caisson would have required at least another year, with consequent inconvenience to highway traffic for that time and a loss of revenue to the State from tolls estimated at not less than $1,000,000.

It was finally agreed to move the east tower five feet to the west, so that the bridge could be completed with a saving in time of at least one year and the only structural change necessary would be the shortening by two and one-half feet of a few of the steel members at the center of the bridge and a slight change in the steel construction at the east abutment.

Total length of the structure—4,072 feet.

The main span is 1,500 feet clear between piers with a 750 foot approach span on each side.

Clearance above mean high water—135 feet.

Height of towers above mean high water—308.5 feet.

Diameter of cables—sixteen and three-quarter inches.

Estimated cost—approximately $6,000,000.

The corner stone was laid at Poughkeepsie by Gov. Smith, Oct. 9, 1925.

The only highway bridge across the Hudson River south of Albany is the one 3½ miles north of Peekskill, which extends from Anthony's Nose on the east side of the river to Bear Mountain Park on the west shore. It is a toll bridge and built by private capital.

Construction was begun in May, 1923. The span was opened to public traffic on Nov. 27, 1924. Total length, 2,257 ft.; length of span, 1,632 ft.; diameter of cables, 18 in. Width of roadway, 38 ft.; width of each sidewalk 5 ft.; number of wires in each cable, 7,252; height of towers, 350 ft.; clear height above river, 155 ft.; steel in bridge, 12,552 tons.

The highway bridge over the Delaware River, connecting Philadelphia, Pa., and Camden, N. J., was begun Jan. 6, 1922, and was opened to the public by the Delaware River Bridge Joint Commission of Pennsylvania and New Jersey on July 4, 1926. It is a toll bridge—the world's largest suspension bridge

In 1929 the State of New York completed a toll bridge over Lake Champlain, between Crown Point, N. Y., and Chimney Point, Vt. The structure, costing about $1,200,000, is 2,200 feet long, with 800 feet in approaches. It affords a direct link between the Adirondack and the Green and the White Mountains.

The suspension bridge over the Menai Straits, Wales, between the Isle of Anglesea and the Caernarvonshire coast, was commenced in 1819 and opened in Jan. 1826.

A chain-bridge was erected across the Tees, near Middleton, in Yorkshire, England, about the year 1741.

In 1796, a suspension-bridge was erected over Jacob's Creek, near Greensburgh, Westmoreland County, Penn., and this seems to be the first important bridge of this nature in modern times.

The first timber bridge in Europe was built by Julius Caesar.

The first iron bridge ever constructed was over the Severn, at Colebrook-dale in Shropshire, England. The metal for it was cast at the Colebrook-dale foundries by Abraham Darby in 1777. The chord was 100 feet, and the arch nearly a semi-circle, composed of five iron ribs.

A wooden bridge was built over the Rhine, at Schauffhausen, in 1758. It was 364 feet long and 18 feet wide. The French destroyed it in 1799.

The Roman Emperor, Trajan, built a stone bridge over the Danube, near Warhel, in Hungary. It rested on 20 piers and about 4,500 feet long.

One of the most ancient bridges of Modern Europe is that on the Rhone at Avignon. It was constructed by a religious society called "The Brethren of the Bridge"; which was established upon the decline of the second, and the beginning of the third, race of the kings of France, when the state fell into confusion, and no protection was afforded to travellers, especially in passing rivers. The bridge was commenced 1176, and completed in 1188. It consisted of 18 arches—the span of the largest arch was 110 ft. 9 in., and it was 45 ft. 10 in. high.

In the same year that witnessed the commencement of this bridge, was old London Bridge begun by Peter of Colechurch who was probably a member of the widely dispersed fraternity of the "Brethren of the Bridge." Previous to the erection of this structure, which was completed in the reign of John, A.D. 1209, a bridge of wood existed, built in the reign of Etheired II., between the years 993 and 1016. In 1163, it was rebuilt of timber.

The art of bridge-building was cultivated in Britain from an early period. The oldest structure of this kind is the Gothic triangular bridge at Croyland, in Lincolnshire; built, it is said, in 860.

Cost figures for the dams built by the U. S. Government for irrigation purposes include dam, spillway, and outlet works, but do not include auxiliary features, such as right of way, roads, etc.

MUSCLE SHOALS.

The installed power capacity at the Dam in August, 1928, was 260,000 horsepower, but the output was limited by the transformer capacity to 110,000 K. W. The ultimate capacity is to be 612,000 horsepower.

The installed horsepower at Keokuk Dam is 154,000; at Twin City, 19,200; at Hales Bar, 56,000.

BOULDER DAM PROJECT.

The Boulder Canyon Project Act, approved by the President on Dec. 21, 1928, was declared, by proclamation, effective on June 21, 1929, it having been approved by California, Colorado, Nevada, New Mexico, Utah, and Wyoming.

The advocates of Boulder Dam propose to locate it in Boulder Canyon, in the Valley of the Colorado River, on the Arizona-Nevada boundary, 90 miles north of Needles, Calif., near the big bend in the river.

It is asserted that enough water for irrigation purposes in the vast region below Boulder Canyon can be impounded without backing the river so as to flood the Grand Canyon of the Colorado.

The southern portion of the basin is relatively low in elevation, with a scanty rainfall and of great summer heat, 115 deg. to 120 deg. being not unusual temperatures over much of this southern area in the months of June, July, and August.

The General Land Office, U. S. Dept. of the Interior, has issued a statement saying:

"There are no lands immediately around or for many miles distant from Boulder Dam that have any agricultural value. The lands that lie in Nevada are too high to receive any water from the Boulder Dam reservoir.

"In California and Arizona no waters will carry to a height of more than 650 feet above sea level. The base of the proposed Boulder Dam is about 1,100 feet above sea level. The waters that are to be stored in the dam will be sent through turbines for the generation of hydro-electric power. The waters will then flow back into the channel of the river and be carried many miles below there and diverted for irrigation purposes.

"There are 7,000,000 acres of vacant government lands in the southern California land district, and it is safe to say that more than 90 per cent of this land will never be irrigated by waters from any stream or river."

ORIGIN OF SPEECH.

Primitive man, says Sir Richard Paget, anthropologist, would sing, grunt, or roar to express his emotions, just as animals did.

He would pantomime with his face and limbs to express his ideas to his fellows, and as he pantomimed with his hands his tongue would follow suit.

But as he came to occupy his hands more and more in his crafts he would have to rely more on gestures of his face, tongue, and lips.

Then it would come about that the pantomimic action would be recognized by sound as well as by sight, and speech was thus born.

THE HOUSTON SHIP CANAL.

The Houston, Texas, Ship Channel, 50 miles long, completed to 30 ft. depth September 1925; width of 250 feet across Galveston Bay, 25 miles and 150 feet wide from Morgan's Point up San Jacinto River and Buffalo Bayou to harbor at Houston.

Total cost, including public terminals, about $21,000,000; thirteen public wharves, berthing space for seventeen vessels; fifteen private wharves with berthing space for thirty-two vessels; additional terminals under construction.

The port is operated by the Navigation and Canal Commission of five members, R. S. Sterling, Chairman; B. C. Allin, Director of the Port.

Total commerce during 1928 totaled 12,979,826 short tons valued at $598,724,008.

POWER CANAL

On the Canadian side of the Niagara River there are three large hydro-electric developments at Niagara Falls: The plant of the Canadian Niagara Power Company, with a nominal operating capacity of 100,000 horsepower; the plant formerly owned by the Ontario Power Company, with an operating capacity of 180,000 horsepower, and the plant formerly owned by the Toronto Power Company, with an operating capacity of 125,000 horsepower.

The Ontario Power Company and its plant and the Toronto Power Company and its plant were subsequently purchased by the Hydro-Electric Power Commission on behalf of the co-operating municipalities of Ontario.

In addition to its two plants at Niagara Falls which utilize only the head available in the immediate vicinity of the falls, the Hydro-Electric Power Commission has constructed what is known as the Queenston-Chippawa power development.

This development—the largest single hydro-electric development in the world—utilizes a head of 305 feet, the maximum effective head developable from the fall of 327 feet in the Niagara River between lakes Erie and Ontario.

The main canal is 48 feet wide and lined with concrete. The depth of water is from 35 to 40 feet.

The power house, situated in the gorge, contains nine units with an aggregate capacity of about 550,000 horsepower; total cost, $80,000,000.

The Suez Canal has no locks. It was originally 26 feet deep, and now is being deepened to 40 feet. The width of the bottom (at a depth of 32 feet 10 inches) is to be increased at least to 200 feet.

The surface width now varies from 350 to 500 feet. The minimum surface width is to be 400 feet.

There are four towns along the canal—Port Fuad and Port Said, on the shore of the Mediterranean, population 100,000; Ismailia, situated near the mid-length of the canal; and Port Tewfik, at the Red Sea outlet and two miles from the town of Suez. Port Said is the industrial centre of the canal zone; Ismailia is the seat of administrative headquarters.

Marseilles-Rhone Canal. The Canal's length, from Arles to the Mediterranean is 51 miles. The normal width, outside the Tunnel du Rove, is 81¼ feet and the depth 9⅞ feet from Marseilles to Port-de-Bouc, and 8⅛ feet thence to Arles. The dimensions of the Tunnel du Rove, which are the limiting measurements for the Marseilles-Rhone Canal are: length 4½ miles, depth 60 feet, width 72½ feet, cost 135,000,000 francs.

Mittelland Canal in Germany leaves the Rhine at Ruhrort and runs in a northeast direction to the Eeser and thence to Hanover. Ultimately it will connect with the canal systems farther east.

Ludwig Canal, together with several small rivers, connects the Danube with the Rhine, thus bringing together the east and the west of Europe, the north and the south, the Black Sea and the North Sea. Work is in progress on the $100,000,000 Rhine-Main-Danube Canal System, of which this is a part.

The general scheme is to link the navigable Rhine at its junction with the Main, with the Danube at Kelheim just above Ragensburg, and form a water route across Europe from the North Sea to the Black Sea capable of taking 1500-ton barges.

It is estimated that it will take about 23 years to complete the entire system.

The 1927 traffic on the Rhine approximated 66,000,000 tons.

Some of the Roman Emperors attempted to cut through the isthmus which connects the Peloponnesus or Morea with the rest of Greece. In Boeotia traces of canals are found, originally cut for the purpose of carrying off the water from the flooded lands. The aqueducts of the Romans were a species of canal; and they also had many canals for drawing off the water from flooded lands.

There was also a canal between the Nile and the Red Sea, commenced by Necos, and continued by Darius; but a fear arose that all Egypt would be inundated, and the plan was abandoned. The second Ptolemy proceeded with the undertaking, and completed it.

THE PANAMA CANAL.

(Opened for Navigation Aug. 15, 1914. Headquarters, Balboa Heights, C. Z.)

The Panama Canal was built between latitude 8 and 9 N. across the Isthmus of Panama at its narrowest part but one. The saddle through which it crosses the continental divide was originally 312 feet above sea level. Gold Hill, the highest point immediately alongside the channel of the Canal, rises 662 feet above sea level. The Canal has a length of 44.08 nautical miles or 50.45 statute miles from deep water in the Atlantic to deep water in the Pacific. The Canal extends at sea level from its starting point in Limon Bay to Gatun, 6¾ miles. At Gatun the sea level section ends in a flight of three pairs of locks, forming the steps to Gatun Lake, with its normal elevation 85 feet above the sea.

Gatun Lake was formed by damming the Chagres Valley, and excess water, wasted through the spillway, finds its way to sea through the old course of the Lower Chagres. The Canal proceeds up the valley of the Chagres 23¾ miles to Gamboa, and in this section relatively little excavation was required. At Gamboa begins the real drive through the divide, the famous Culebra Cut. It is 8 miles long, 300 feet wide at bottom, and extends to Pedro Miguel lock and dam, on the Pacific slope of the divide. Here one lock lowers the ship to Miraflores Lake, a small body about a mile long, with its surface 55 feet above the sea. At the south end of this lake are Miraflores locks, which, in two steps, lower the ship to the Pacific. A sea level channel 8 miles long carried past Balboa and out into the Pacific.

The minimum depth of the channel is 41 feet, and in parts of Gatun Lake it is about 80 feet deep. The lock chambers have a clear width of 110 feet and length of 1,000 feet, giving ample handling room for the largest ship yet built. Gatun dam, by which Gatun Lake was formed, is a big, gently sloping mound, built by pumping sand and clay into the space between two ridges of rock and earth. It is 1½ miles long and ½ mile wide at its base. Its crest is 105 feet above sea level and the width of the dam at the top is 100 feet.

The Panama Railroad extends between Colon and Panama on the eastern side of the Canal.

The Canal Zone is the strip of land extending five miles on either side of the axis of the Canal, but not including the cities of Panama and Colon, which remain within the Republic of Panama. It has an area of 553.9 square miles, including land and water It was granted to the United States by the treaty made with Panama, February 26, 1904. The United States paid $10,000,000 for the Zone, and makes an annual payment in addition of $250,000.

Some years ago a part of the total cost of constructing the Panama Canal was written off to national defense.

The total thus written off, which now stands at $113,127,338 (June 30, 1929) represents the cost of features and additional facilities (not including fortifications, military posts, submarine base, etc.) included in the design of the Canal for military or naval reasons, which might have been omitted if there had been none but commercial interests to serve. It includes $40,000,000 paid to the French.

This leaves a balance of $237,751,564 as the investment in the Canal proper (Canal fixed property), and an additional sum of $6,336,147 invested in equipment (Canal transit equipment).

There is also $32,620,286 invested in auxiliary business enterprises other than those conducted with funds of the Panama Railroad Company.

In 1929 (fiscal year) the net income of the Panama Canal from tolls, taxes, licenses, fees, fines, postal receipts, etc., was $17,729,775, and the net profit on auxiliary business operations was $737,850.

In the year ended June 30, 1929, in addition to the above, 553 U. S. Government vessels transited the canal, and also 40 ships for repairs, 21 Panama Government vessels, 2 Colombian Government vessels, and 167 launches, each under 20 tons net—a total of 7,196 ships and a total of $27,128,889 in tolls.

The non-commercial ships carried 119,369 long tons of cargo, which made the total canal cargo tonnage 30,782,375.

CANAL TRAFFIC FROM DATE OF OPENING TO JUNE 30, 1928.

The Canal from Aug. 15, 1914, to the close of business, June 30, 1929, transited 53,246 commercial toll-paying vessels, on which a total of $220,435,105 in tolls was paid.

The aggregate net tonnage of these vessels was 233,975,382 tons. Panama Canal measurement, and, the total cargo carried was 245,949,205 long tons.

In addition to the commercial traffic listed above a total of 4,714 vessels, operated by the United States Government, exclusive of craft in the service of the canal, were passed through the canal without payment of tolls.

CANAL TRADE EAST AND WEST.

Ships *broken up* in 1928, as distinguished from those *lost*, numbered 296, of 735,547 gross tons.

Figures for the United States do not cover losses on the Great Lakes.

MANKIND OF THE FUTURE.

Dr. Hrdlicka, in an address in 1929 before the American Philosophical Society, said that the infancy of the human race covers 300,000 of the 350,000 years of man's past existence on earth, and that he arose from the nearest sub-human forms and under the exciting influences of environmental conditions.

Up to the end of the last main glaciation, man progressed evidently but very slowly in numbers. In general he did seemingly but slightly better than to sustain himself. His spread was slow and sparse. But after the main part of the last glacial invasion he begins to multiply much more effectively and as his numbers increase there follows gradually a spread all over the habitable earth, with an accentuated differentiation of types and races.

The latter all proceeded, according to the best evidence, from but one human species, and those now living date all from the later, post-glacial, parts of human prehistory: earlier strains, such as doubtless there were, can no more be traced among living men.

The man and woman of the future will be handsomer, they will have thinner skulls, with wider and higher heads, handsomer faces, eyes deeper set, bigger and narrower noses, more pominent chins, smaller and fewer teeth, less hair, smaller appendixes, a more rapid pulse and respiration, higher temperature of the body, and a greater tendency to mental derangements. The feet will trouble.

Due to prolonged life, heart troubles, apoplexies, cancer, and senile weaknesses of all sorts, will tend to be more commonon, until mastered by medicine.

The stature of the human race is increasing.

FAST OCEAN PASSAGES.

A nautical mile = American, 6,080.27 ft.; British, 6,080 ft.; German, 6,076 ft. A statute mile, commonly called a land mile, = 5,280 ft.

Sailing Ships—Columbus, in 1492, sailed from Spain (Palos) to the Gulf of Mexico in 70 days, Aug. 3 to Oct. 12. His second voyage, in 1493, from Cadiz, Spain, to Dominica, in the West Indies (Sept. 25-Nov. 3) was made in 40 days; his third, to Trinidad (May 30-July 31), in 1497, in 62 days, his fourth and last, to Honduras, in 1502 (May-July) in about 62 days.

The American-built clipper, the Lightning, of the Black Ball (British Australian Line, on March 1 1854, sailed 435 nautical miles, on way from Boston to Liverpool, on her maiden voyage. A gale was blowing and the ship's log showed a speed as high as 18½ miles an hour. The clipper Donald McKay, Black Ball Line, on Feb. 25, 1855, sailed 421 nautical miles on maiden voyage from Boston to Liverpool.

The fastest day's record of a clipper ship on any sea—437 miles—was made by the Sovereign of the Seas, on a passage from New York to San Francisco. She was 258 feet long, 44 feet wide, of 2.421 tons. The Flying Cloud made 433½ miles in one day, New York to San Francisco.

The quickest passage of a clipper ship across the Atlantic was made from New York to Queenstown, Ireland, in 9 days, 17 hours, by the Dreadnaught. The clipper Red Jacket, built at Rockland, Me., sailed from Sandy Hook, N. Y., to Liverpool in 13 days 1 hour 25 minutes.

The packet ship, Yorkshire, in Nov., 1846, sailed from Liverpool to New York in 16 days.

The fastest trans-Atlantic yacht voyage is that of the Atlantic, which, in the race for the German Emperor's Cup, in 1905, sailed from Sandy Hook to the Lizard, England, in 12 days 4 hours 1 minute and 19 seconds, 3,013 nautical miles, average speed 10.31 knots. The best day's run was 341 nautical miles.

Steamships—The first steamship to cross the Atlantic was the Savannah, 350 tons, built at New York City, which left Savannah, Ga., on May 24, 1819, and reached Liverpool in 26 days, during eighteen of which she used her side-paddles.

The Great Western, on her maiden voyage, from Bristol, England, to New York, covered the distance in April, 1838, in 15 days.

The Sirius, in April, 1838, went from England to New York in 18½ days.

The Britannia, first Cunard liner, in July, 1840, came from Liverpool to New York in 14 days 8 hours. The Great Western's best record across the ocean was 10 days 10 hours 15 minutes.

In May, 1851, the Pacific reduced the Atlantic record to 9 days 19 hours 25 minutes.

The Persia, in 1856, did it in 9 days 1 hour 45 minutes; the Scotia, in 1866, in 8 days, 2 hours 48 minutes; the City of Brussels, in 1869, in 7 days 22 hours 3 minutes; the Baltic, in 1873, in 7 days 20 hours 9 minutes; the City of Berlin, in 1875, in 7 days 15 hours 48 minutes; the Arizona, in 1880, in 7 days 7 hours 23 minutes; the Alaska, in 1882, in 6 days 18 hours 37 minutes; the Etruria, in 1888, in 6 days 1 hour 55 minutes; the Majestic, in 1891, in 5 days 18 hours 8 minutes; the Lucania, in 1894, in 5 days 7 hours 23 minutes; the Lusitania, in 1908, in four days 15 hours; the Mauretania, in 1910, in 4 days 10 hours 41 minutes. at the rate of 26.06 knots an hour.

The foregoing records, since and including 1856, are between New York and Queenstown, 2,780 miles.

The Hamburg-American liner, Fuerst Bismarck, in April, 1892, went from Southampton to New York in 6 days, 11 hours, 44 minutes.

The Deutschland, in Sept., 1900, went from Sandy Hook, New York, to Plymouth, England, in 5 days 7 hours 38 minutes.

The Leviathan, Oct. 4-10, went from New York to Cherbourg in 5 days, 6 hours, 21 minutes, at an average speed of 24.67 knots.

The Bremen, of the North German Lloyd Line, on her maiden voyage, went in 1929 (July 18-22) from the Breakwater at Cherbourg, France, to the Ambrose Channel Lightship, New York Harbor (approximately 3.163 nautical miles) in 4 days, 17 hours, 42 minutes, at an average speed of 27.83 knots, or nautical miles, an hour. Her days' runs were, in knots, 687, 704, 705 and 713. Her average speed, in statute miles, was over 32 per hour. Going from New York, east, she made Eddystone Light, Plymouth, England, in 4 days, 14 hours, 30 minutes. She went, later, from N. Y., to Cherbourg in 4 days, 14 hours.

The Mauretania in Aug., 1929, went from New York to Plymouth in 4 days 17 hours 49 minutes.

In May, 1928, the Nova Scotia of the Furness Line, steamed from Liverpool to St.Johns, N.F., in 5 days, 13 hours.

The quickest run from New York to San Francisco, via Straits of Magellan, was made by the Santa Catalina, an oil burner, in 1914, in 45 days 21 hours 50 minutes.

The light cruiser Omaha, of the U. S. Navy, in 1923 (May 8-11), steamed from Diamond Head, Oahu, Hawaii, to the San Francisco Light Vessel, a distance of 2,091 miles, in 3 days 3 hours 40 minutes 40 seconds. The average speed was 27.76 miles an hour.

The U. S. S. Saratoga, naval airplane carrier, in Dec., 1928, in her acceptance trial, off the California coast, averaged 34.99 nautical miles an hour. Her sister ship, the Lexington, had averaged 34.8 nautical miles an hour. The Saratoga developed 213,000 horsepower.

The power boat, Miss America VII, at Miami, Fla., in March, 1929, covered a one-mile course in Indian Creek, at a speed average of 93.123 miles an hour. In one of the heats the speed reached 94.12 miles.

The dirigible balloon, Graf Zeppelin, in Aug., 1929, flew from Lakehurst, New Jersey, to Friedrichshafen, Germany. 4,200 miles, in 55 hours, 24 minutes.

CARLOAD WEIGHTS OF VARIOUS COMMODITIES.

The following table, compiled by the Interstate Commerce Commission, gives the average weight of a carload of each commodity.

Commodity.	Aver. per Car.
	Short Tons.
PRODUCTS OF AGRICULTURE.	
Wheat	40.93
Corn	37.31
Oats	32.00
Flour and meal	24.42
Hay, straw, alfalfa	12.54
Tobacco	10.68
Cotton	11.15

Sewer pipe and drain	17.36
Agric. impiements and vehicles, excl. auto	14.85
Auto. and autotrucks	8.38
Household goods and old furniture	9.82
Furniture (new)	8.80
Beverages	19.03
Ice	25.68
Fertilizers (all kinds)	23.28
Paper, print, books	24.14
Chem. and expl	30.27
Textiles	11.74
Canned goods	23.02

RAILROAD TRAIN SPEED.

The year 1929 brought a revolution in travel—a combination or alternation of railway trains and airplanes in covering long distances by land. Thus, the time between New York City and the Pacific Coast was shortened, in July, that year, to 48 hours.

Before the airplane-train mode of travel was inaugurated, the quickest special train time between the two coasts was made by Mrs. Alfred H. Smith, wife of the President of the New York Central Lines, who left Los Angeles on March 9, 1924, in a special train on the Santa Fe system and arrived at Chicago in 49 hours and 17 minutes. Another special train took her 961.5 miles to New York City in 19 hours 54 minutes. The cross-continent record run thus was made in 69 hours 7 minutes.

The Jarrett and Palmer special theatrical train, Jersey City to Oakland (San Francisco), 3,311 miles, May 31-June 4, 1876, 83 hours 45 minutes; average speed, 39.53 miles per hour.

In May, 1906, the "Harriman Special" train made the run from Oakland, Cal., to N. Y. City in 71 hours 27 minutes.

The record time between Los Angeles and Chicago, via the Santa Fe Lines, 2,230 miles, is 44 hours and 54 minutes (46 miles an hour) made by the "Scotty"-the-Miner special in July, 1905.

In November, 1925, an oil electric engine-car on the Canadian National Railways ran from Montreal to Vancouver, 2,937 miles in 67 hours, without a stop, averaging 43.50 miles per hour.

On Nov. 16-17, 1925, a Penn. Railroad Special carried Guy Waggoner from St. Louis to N. Y. City in 20 hours 26 minutes.

On June 28-29, 1926, a Penn. Railroad Special carried Mrs. Cyrus H. McCormick from N. Y. City to Chicago in 16 hours 55 minutes.

One of the fastest long-distance runs less than 440 miles was on the New York Central R. R., Sept. 11, 1895, from New York to Buffalo, 436½ miles, in 407 minutes actual time. Average speed, 64¼ miles an hour, with two stops and 28 slow-ups, and on Jan 1, 1903, from Albany to Buffalo, 302 miles, in 295 min.

FAST RECORDED TRAIN RUNS FOR SHORT DISTANCES.

May, 1928	London & Northeastern	London-Edinburgh (Fly'g Scotsman)	392.5	8 3	49.1

The June, 1927, train (see above table) from Washington to New York carried Lindbergh films which were developed on the way. The time includes 7 minutes stoppage. From Holmesburg Junction, Pa., to South St., Newark, N. J., 66.6 miles, the speed was 85 miles an hour.

The Flying Scotsman trains began in May, 1928, non-stop runs between London and Edinburgh.

On Sept. 8, 1927, a Pennsylvania Special, ran from New York City terminal to Atlantic City, 143 miles in 165 minutes. It made the 60 miles from Camden to Atlantic City, in 53 minutes.

First-class German and French trains now average between 50 and 60 miles an hour over runs covering several hundred miles.

ALL'S WELL THAT ENDS WELL.

A friend of mine was married to a scold;
To me he came, and all his troubles told.
Said he, "She's like a woman raving mad."
"Alas! my friend," said I, "that's very bad!"
"No, not so bad," said he; "for, with her, true
I had both house and land, and money, too."
"That was well," said I;
"No, not so well," said he;
"For I and her own brother
Went to law with one another;
I was cast, the suit was lost,
And every penny went to pay the cost.
"That was bad," said I;
"No, not so bad," said he;
"For we agreed that he the house should keep.
And give me foursome of Yorkshire sheep,
All fat, and fair, and fine they were to be."
"Well, then," said I, "sure that was well for thee?"
"No, not so well," said he;
"For, when the sheep I got,
They every one died of the rot."
"That was bad," said I:
"No, not so bad," said he;
"For I had thought to scrape the fat
And keep it in an oaken vat;
Then into tallow melt for winter store."
"Well, then," said I, "that's better than before?"
"'Twas not so well," said he;
"For, having got a clumsy fellow
To scrape the fat and melt the tallow;
Into the melting fat the fire catches,
And, like brimstone matches,
Burnt my house to ashes."
"That was bad," said I;
"No, not bad," said he; "for, what is best,
My scolding wife is gone among the rest."

HIGHEST LATITUDES REACHED IN POLAR EXPLORATIONS.

(Tables Prepared by Nat'l. Geographic Soc., Washington, D. C., Gilbert Grosvenor, L.L.D.)

ARCTIC EXPLORATION (*Represents new records.)

Commander.	Date.	No. Lat.	Locality.	Nationality.
*John Davis	1587	72° 12′	West Greenland	Great Britain
*William Barents	1596	79° 49′	Spitsbergen and Greenland Sea	Holland
*Henry Hudson	1607	80° 23′	Spitsbergen and Greenland Sea	Holland
*Henry Hudson	1616	77° 45′	Ellesmere Island	Great Britain
*Capt. J. C. Phipps	1773	80° 48′	Spitsbergen and Greenland Sea	Great Britain
*Scoresby the Elder	1806	81° 30′	Spitsbergen and East Greenland	Great Britain
*Sir William Edward Parry	1827	82° 45′	North of Spitsbergen	Great Britain
Wm. Morton, E. K. Kane Expedition	1854	78° 45′	Cape Constitution	United States
Sir Edward A. Inglefield	1859	78° 28′	Smith Sound	Great Britain
Dr. Isaac I. Hayes	1861	81° 35′	Cape Lieber, Grinnell Land	United States
Baron Nordenskiold	1868	81° 42′	Spitsbergen	Sweden
Capt. Charles F. Hall	1871	82° 11′	Near Thank God Harbor	United States
J. Payer	1873	81° 50′	Franz Josef Land	Austria
*A. H. Markham, Nares Expedition	1875	83° 20′	Northeast Grinnell Land	Great Britain
*J. B. Lockwood and Gen. D. L. Brainard, Gen. A. W. Greely Expedition	1882	83° 24′	Greenland Coast	United States
*Admiral Robert E. Peary	1892	83° 27′	Greenland Coast	United States
*Fridtjof Nansen	1893–5	86° 14′	North of Franz Josef Land	Norway
Frederick G. Jackson	1894–7	81° 20′	Franz Josef Land	Great Britain
*Capt. Cagni, Duke of Abruzzi's Exped'n	1900	86° 34′	North of Franz Josef Land	Italy
Admiral Robert E. Peary	1902	84° 17′	Grinnell Land	United States
Ziegler Polar Expedition	1904	82° 4′	Franz Josef Land	United States
*Admiral Robert E. Peary (Apr. 21)	1906	87° 6′	North of Greenland	United States
*Admiral Robert E. Peary (Apr. 6)	1909	90°	The North Pole	United States
Capt. Roald Amundsen (June 15)	1925	87° 44′	North of Greenland	Norway
Lieut. Com. R. E. Byrd, Jr., U. S. N. Ret. (By airplane, May 9)	1926	90°	Spitsbergen and return	United States
Amundsen-Ellsworth-Nobile Expedition (By dirigible, May 12)	1926	90°	Spitsbergen to Alaska	
Capt. Sir George H. Wilkins (By airplane, April 15)	1928	84°	Point Barrow to Spitsbergen	United States
Gen. Umberto Nobile (By dirigible, May 23)	1928	90°	Spitsbergen to North Pole	

Roald Amundsen and Rene Guilbaud left Tromso in a seaplane June 18 to go to Nobile's aid but never have been heard from.

In the afternoon of Sunday, July 11, 1897, the Swedish aerial engineers, Andree, Strindberg, and Fraenkel, departed from Virgo, Spitsbergen, on board the balloon Ornen for the North Pole. Whatever their fate they were never seen.

Two soundings taken at latitude 87°41′ north, longitude 10° 20′ west, by Amundsen and Ellsworth in 1926, revealed that the depth of the Polar Sea there was 12,375 feet.

ANTARCTIC EXPLORATION.

Commander.	Date.	Latitude.	Longitude.	Nationality.
Capt. James Cook (Jan.30)	1774	71° 10′ S.	106° 54′ W.	Great Britain.
James Weddell	1823	74° 15′ S.	34° 17′ W.	Great Britain.
Admiral Charles Wilkes Expedition	1839	70° S.	105° W.	United States.
Capt. James Clark Ross (Feb. 22)	1842	78° 10′ S.	161° 27′ W.	Great Britain.
Carstens E. Borchgrevink (Feb.)	1900	78° 50′ S.	165° 50′ W.	Great Britain.
Capt. Robert F. Scott (Dec. 30)	1902	82° 17′ S.	163° E.	Great Britain
Sir Ernest Shackleton (Jan. 9)	1909	88° 23′ S.	162° E.	Great Britain.
Roald Amundsen (Dec. 14)	1911	90°		Norway.
Capt. Robert F. Scott (Jan. 18)	1912	90°		Great Britain.

Admiral Charles Wilkes first saw the Antarctic Continent on January 16, 1840, at 158° E. longitude.

THE GREAT LAKES.

(Revised by United States Lake Survey Office, War Department.)

	Superior.	Michigan.	Huron.	Erie.	Ontario.
Length in miles	350	307	206	241	193
Breadth in miles	160	118	101	57	53
Deepest soundings in feet	1,180	870	750	210	738
Area (sq. miles) water surface—U. S.	20,710	22,400	9,110	4,990	3,560
Can.	11,110	.....	13,900	4,950	3,980
Total	31,820	22,400	23,010	9,940	7,540
Area (sq. miles) entire drainage basin—U. S.	37,570	69,040	24,850	23,570	18,710
Can.	43,330	.....	47,570	11,110	15,920
Total.	80,900	69,040	72,420	34,680	34,630
Mean surface above mean sea level in feet	602.22	580.94	580.94	572.42	246.09
Latitude, north	46° 25′	41° 37′	43° 00′	41° 23′	43° 11′
	49° 00′	46° 06′	46° 17′	42° 53′	44° 15′
Longitude, west	84° 22′	84° 45′	79° 43′	78° 51′	76° 03′
	92° 06′	88° 02′	84° 45′	83° 29′	79° 53′
Boundary line in miles	282.8	None	260.8	251.5	174.6
United States shore line in miles	1,182	1,304	581	404	303

Figures for mean surface above mean sea level are the average for 68 years—1860-1927.

In April, 1929, the Great Lakes were unusually high above sea level—Superior, 602.60 ft.; Michigan-Huron, 581.39 ft.; Erie, 573.56 ft.; Ontario, 247.28 ft.

Maximum and minimum elevations of the surface of the Great Lakes above sea level—

Superior, 604.08 ft. (Sep., 1869); 599.99 ft. (April, 1926).

Huron, 583.66 ft. (July, 1876); 577.44 ft. (Feb., 1926).

Erie, 574.80 ft. (July, 1862); 569.73 ft. (Feb., 1926).

Ontario, 248.83 ft. (May, 1870); 243.34 ft. (May, 1895).

Montreal Harbor, 40.22 ft. (Jan., 1886); 18.34 ft. (Oct., 1911); mean level (1860-1928) 26.81 ft. In the season of navigation at Montreal (May-Nov., inclusive), the mean level (1860-1928) is 23.42 ft.

Average annual total rainfall on the Great Lakes—Superior, 28 in.; Huron, 30 in.; Erie, 34 in.; Ontario, 33 in.

The level of Lakes Erie and Ontario usually starts to recede in July, Lake Huron in August, and Lake Superior in August or September.

The level of the St. Lawrence River to Lake St. Louis conforms with Lake Ontario.

In Montreal harbor high water occurs in the early part of the year due to the ice conditions, and on the clearing thereof the elevation of the river steadily lowers, being checked somewhat by the flood conditions in the Ottawa River about the end of May, reaching a minimum in September or October.

This condition of affairs extends to Tidewater.

The higher the elevation of the water in the Great Lakes, the greater the discharge, and therefore the greater the effect upon the St. Lawrence Tidewater.

GREAT INVENTIONS.

AMERICAN.

Invention.	Inventor.	Date.
Lightning rod	Franklin	1752
Steamboat	Fitch	1784
Steamboat	Fulton	1793
Nail machine	Perkins	1787
Cast-iron plough	Newbold	1797
Cotton gin	Whitney	1793
Carding (textile) machine	Whittemore	1797
High-pressure steam engine	Evans	1799
Screw propeller	Stevens	1804
Tack machine	Blanchard	1806
Electro-magnet	Henry	1828
Revolver (pistol)	Colt	1835
Electric telegraph	Morse	1835
Phosphorus friction match	Phillips	1836
Vulcanized rubber	Goodyear, Chas.	1839
Sewing machine	Howe	1846
Electric locomotive	Vail	1851
Monitor (warship)	Ericsson	1861
Machine gun	Gatling	1861
Block signals (railway)	Hall	1867
Refrigerator r'y freight car	Davis	1868
Airbrake	Westinghouse	1869
Celluloid	Hyatt	1870
Welt machine	Goodyear	1871
Automatic car-coupler	Janney	1873
Typewriter	Sholes	1873
Quadruplex telegraph	Edison	1874
Water gas	Lowe	1875
Mowing machine (differential gear)	Eickemeyer (R.)	1876
Telephone	Bell	1876
Talking machine	Edison	1877
Incandescent lamp	Edison	1878
Arc lamp	Brush	1879
Gasoline motor (auto)	Selden (Pat'd)	1879
Automatic knot-tying harvester machine	Appleby	1880
Chrome tanning	Schulz	1884
Trolley car	Van Depoele & Sprague	1884-87
Type-bar casting (linotype)	Mergenthaler	1885
Electric furnace reduction	Cowles	1885
Split-phase induction motor	Tesla	1887
Single-type composing machine	Lanston	1887
Rotary converter	Bradley	1887
Recording adding machine	Burroughs	1888
Transp'rent photograph film	Eastman	1888
Calcium carbide	Willson	1888
Electric welding	Thomson	1889
Electrolytic alkali prod'ction	Castner	1890
Carborundum	Acheson	1891
Harveyized armor plate	Harvey	1891
Alternate-current motor	Tesla	1892
Motion-picture machine	Edison	1893
Dry-air process, blast furnace	Gayley	1894
Disk ploughs (modern type)	Hardy	1896
High-speed steel	Taylor & White	1901
Aeroplane	Orville & Wilbur Wright	1903
Hydro-aeroplane	Glenn H. Curtiss	1911
Gas engine (compound)	Eickemeyer (C.)	1921

Smithsonian Institution officials say the principle of the telephone was discovered on June 2, 1875; the first conversation over the telephone was held on March 7, 1876; the patent was granted on March 10, 1876.

In March, 1898, at N. Y. City, at the Centenary dinner of the American Institute, Dr. Thomas A. Watson, the associate of Alexander Graham Bell, displayed the original telephone which he had constructed in accordance with the instructions of Mr. Bell in 1875 and used it to transmit to the audience the first voice ever carried by wire—Alexander Graham Bell's: "Mr. Watson, come here; I want you."

On Jan. 28, 1928, a bronze tablet was unveiled at New Haven, commemorating the fiftieth anniversary of the opening, there, of the first commercial telephone exchange in the world.

In 1879, Carl Benz, of Germany, invented the 2-stroke motor, and in 1886 he drove the "world's first motor car" through the streets of Munich—a 3-wheel vehicle now in the Museum at that city. His first auto was built at Mannheim. Benz died April 3, 1929.

In 1892 (April 19), the first gasoline automobile in the U. S. was operated by its inventor, C. A. Duryea, who also won the first American contest, in Chicago, Nov. 1895.

On July 4, 1894, Elwood Haynes drove at Kokomo, Ind., a gasoline automobile of his own invention. Both machines are on exhibition at the Smithsonian Institution, Washington, D. C.

"1896. May 6. Flight of Langley Model. Aeroplane No. 5, a tandem monoplane, flew and maintained automatic equilibrium for more than a half mile over the Potomac River at Quantico, Va., at a speed of 20-25 miles an hour. The model, of steel tubing, weighed about 30 pounds. The machine was launched by a catapult system from the roof of a houseboat. This was the first sustained flight ever made in the world's history with self contained power plant other than one of rubber bands."—*From a 1929 bulletin of the U. S. Dept. of Commerce.*

In 1878 an arc light, operated without mechanism, invented by Paul Jablochkoff, was placed in use on the streets of Paris, France.

In 1891 Clement Ader is said to have made, in France, a flying machine in secret. "No definite information concerning it, however, is available," says Secretary Charles D. Walcott of the Smithsonian Institution, "nor did he continue his work after his initial efforts in 1891.

"In 1896 Prof. S. P. Langley of the Smithsonian Institution made the first extended flights of heavier-than-air experimental flying machines propelled by their own power.

"Many consider that he was the first to design and build a machine capable of carrying a man, and that the Wright Brothers were the first to design, build and fly a machine which carried a man."

In the United States National Museum at Washington, there is a model of an electric motor and car invented in 1847 by Moses G. Farmer.

FOREIGN.

Invention.	Date	Inventor.	Nationality.
Printing (block)	593	Unknown	Chinese
Flying shuttle	1733	Kay	English

Depth bomb	1903	W. T. Unge	Swedish

Movable types were invented in China in the tenth century; by Coster, in Europe, in 1438. Cut metal types were invented by Gutenberg, German, about 1450.

Xylographic printing, long believed to have been discovered in Germany during the fifteenth century, had existed in China during the seven previous centuries, according to the address delivered by M. Pelliot before the French Academy of Inscriptions at Paris, Feb. 17, 1928.

This method owed its origin to the use of seals, rather than to development from prints, according to the French savant. He placed the making of the first paper in the year 105 A. D. and the discovery of ink about the year 500 A. D. Classical texts, he said, were produced in printed form in China in the year 932 A. D., but various printed manuscripts, chiefly magic Buddhist formulas, were printed as early as 764 A. D.

The invention of gunpowder cannot be definitely attributed to one man. It is claimed for Berthold Schwartz, a German monk, in 1320-1354; he is generally credited with having invented the first firearms.

AVERAGE HEIGHT AND WEIGHT OF MEN AND WOMEN.

COMPILED BY THE ASSOCIATION OF LIFE INSURANCE MEDICAL DIRECTORS AND THE ACTUARIAL SOCIETY OF AMERICA.

The weights are for persons with shoes on, and without coat and vest, which weigh from 3 to 7 pounds, depending on height of individual and season of year.

WEST POINT CADET MEASUREMENTS.

The authorities at the United States Military Academy, at West Point, N. Y., have decided that cadets, at seventeen years of age, whose range in height varies from 64 to 71 inches should weigh from 110 to 128 lbs.; their chest measure should be from 29 to 30¾ inches, and the chest expansion should range from 2 to 2½ inches.

At other ages, the ranges are:

Eighteen years—Height, 64 to 72 inches; weight, 117 to 136 lbs.; chest measure, 30¾ to 32 inches; chest expansion, 2 to 3 inches.

Nineteen years—Height, 64 to 73 inches; weight, 121 to 149 lbs.; chest measure, 30¾ to 32¾ inches; chest expansion, 2 to 3 inches.

Twenty years—Height, 64 to 74 inches; weight, 121 to 154 lbs.; chest measure, 31 to 33¼ inches; chest expansion, 2 to 3½ inches.

Twenty-one years—Height, 64 to 75 inches; weight, 121 to 167 lbs.; chest measure, 31¼ to 33¾ inches; chest expansion, 2 to 3½ inches.

Twenty-two years—Height, 64 to 76 inches; weight, 123 to 174 lbs.; chest measure, 31½ to 34¼ inches; chest expansion, 2 to 4 inches.

HOW TO WRITE BILLIONS, TRILLIONS, ETC.

(From Commerce and Finance.)

The strain on the Arabic notation that is involved in writing the enormous figures of European currency circulations and debts has driven many writers to fall back on "plain English" in writing round numbers, as, for instance, we ourselves last week described the German mark circulation as having increased to "496.5 quintillions."

Of course we used the word "quintillion" in its American sense, which happens to be also its French sense, but in Great Britain and the other European countries the word has a very different meaning.

We set down herewith the numerals and their nomenclature in this country and France on the one hand and in Great Britain and the rest of Europe on the other, which it were well to keep in mind:

	U. S. and France.	Gt. Britain & Rest of Europ.
1,000,000	million	million
1,000,000,000*	billion	1,000 millions
	milliard	milliard
1,000,000,000,000	trillion	billion
1,000,000,000,000,000	quadrillion	1,000 billions
1,000,000,000,000,000,000	quintillion	trillion

* Our billion is called a milliard all over the European Continent. In Great Britain it is called indifferently a milliard or a thousand millions.

Thus while in France and this country the notation advances in periods of three figures, in Great Britain and the rest of Europe it advances in periods of six, our sextillion being there a thousand trillions, and so on.

CLASSIFICATION OF ROCKS AND DIVISIONS OF GEOLOGIC TIME.

(Prepared by the U. S. Geological Survey.)

The rocks composing the earth's crust are grouped by geologists into three great classes—igneous, sedimentary, and metamorphic.

The igneous rocks have solidified from molten state.

Those that have solidified beneath the surface are known as intrusive rocks.

Those that have flowed out over the surface are known as effusive rocks, extrusive rocks, or lavas.

The term volcanic rock includes not only lavas but bombs, pumice, tuff, volcanic ash and other fragmental materials thrown out from volcanoes.

Sedimentary rocks are formed by the accumulation of sediment in water—aqueous or eolian (wind-borne) deposits.

The sediment may consist of rock fragments or particles of various sizes (conglomerate, sandstone, shale); of the remains or products of animals or plants (certain limestones and coal); of the product of chemical action or of evaporation (salt, gypsum, &c.); or of mixtures of these materials.

A characteristic feature of sedimentary deposits is a layered structure known as bedding or stratification.

Metamorphic rocks are derivatives of igneous or sedimentary rocks produced through mechanical or chemical activities in the earth's crust.

The unaltered sedimentary rocks are commonly stratified, and it is from their order of succession and that of their contained fossils that the fundamental data of historical geology has been deduced.

Era and Length in Years.	Period and length in Years.	Epoch.	Characteristic Life.
Cenozoic (Recent Life.) 2,100,000 to 93,400,000 yrs.	Quaternary. 100,000 to 1,500,000 yrs.	Recent. Pleistocene, or Glacial.	"Age of man." Animals and plants of modern types.
	Tertiary. 2,000,000 to 63,500,000 yrs.	Pliocene. Miocene. Oligocene. Eocene.	"Age of mammals." Possible first appearance of man. Rise and development of highest orders of plants.
Mesozoic. (Intermediate Life.) 6,300,000 to 191,500,000 yrs.	Cretaceous. 3,800,000 to 85,000,000 yrs.	Upper Lower	"Age of reptiles." Rise and culmination of huge land reptiles (dinosaurs). First appearance of birds and mammals; and palms and hardwood trees.
	Jurassic. 800,000 to 72,600 yrs.	Upper Middle Lower	
	Triassic. 1,700,000 to 87,500,000 yrs.	Upper Middle Lower	
Paleozoic. (Old Life.) 12,480,000 to 470,000,000 yrs.	Carboniferous. 4,700,00 to 140,000,000 yrs.	Permian. Pennsylvanian. Mississippian.	"Age of amphibians." Dominance of tree ferns and huge mosses. Primitive flowering plants and earliest cone-bearing trees. Beginnings of backboned land animals. Insects.
	Devonian. 1,900,000 to 125,000,000 yrs.	Upper. Middle. Lower.	"Age of fishes." Shellfish (mollusks) also abundant. Rise of amphibians and land plants.
	Silurian. 1,500,000 to 56,000,000 yrs.		Shell-forming sea animals dominant. Rise of fishes and of reef-building corals.
	Ordovician 1,700,000 to 130,000,000 yrs.	Upper. Middle. Lower.	Shell-forming sea animals. Culmination of the buglike marine crustaceans known as trilobites. First trace of insect life.
	Cambrian. 2,600,000 to 110,000,000 yrs.	Upper. Middle. Lower.	Trilobites, brachiopids and other sea shells. Seaweeds (algae) abundant. No trace of land animals.
Proterozoic. (Primordial Life.) 27,500,000 to 710,000,000 yrs.	Algonkian 17,500,000 yrs.	Keeweenawan Huronian	First life that has left distinct record. Crustaceans, brachiopods and seaweeds.
	Archean. 10,000,000 yrs.	Crystalline Rocks	No fossils found.

Estimates of the age of the earth range from the Scriptural, of less than 6,000 years, to 1,710,000,000 years; a guess put forth by Barrell, based on radioactivity.

A composite of the geologic estimates of Williams (1893), Schuchert (1910), and Matthew (1914) fixes the age at 48,380,000 years to 94,110,000 years.

How long has man existed on the globe? The geologists say from 100,000 to 1,500,000 years, provided he did not appear before the Quaternary Period of the Cenzoic Era.

The late John M. Clarke, New York State Geologist, in an article prepared for the Almanac and printed on page 772 of the 1928 issue, estimated the age of the earth at 1,497,000,000 years. Of this span 667,000,000 years represented the period of the unchanged rocks. His argument is as follows—

Life began in simple unicellular expressions: out of such initiative expressions have come, by combination and adjustment, all subsequent and consequent multi-cellular animals and plants. The earliest records of the rocks should show a preponderance of the elementary forms of life, so far as the sediments making those rocks have been competent to preserve them.

Terrestrial life, both animal and plant, came out of the sea. It is the opinion of paleobotanists that the plant life which emerged from the sea to the land, "the flora of transmigration," made its trek in days before the Cambrian time, and that these plants were algae of a higher order in respect to perfection of reproduction organs than any of the modern algae now living.

The molecular disintegration of the minerals of uranium and thorium results in producing lead, which, derived from these sources has a specific gravity different from that of ordinary lead.

If then, a mineral deposit known to be of Devonian age contains a uranium mineral accompanied by lead which has been derived from it, the length of time from the formation of that mineral-bearing Devonian bed to the present is at least as long as the time required for the change from the uranium molecules into lead.

This rate of change has been measured and it is known that in one year a gram of uranium would generate 1.25 x 10-10 grams of lead, and at this rate one gram of lead would be produced in 8,000 million years.

On the basis of such evidence, the length of time represented by the entire body of the unchanged rocks of the earth is 667 million years, and if to this be added the time necessary for the accumulation of the rocks of the Pre-cambrian age, some of which are sedimentary and some igneous, the figure rises to 1,497 million years.

THE ALTITUDES OF THE GLOBE.

(The elevation at the South Pole, as noted by Scott, was 9,070 feet.)

HIGHEST AND LOWEST CONTINENTAL ALTITUDES.

CONTINENTS.	Highest Point.	Elevation (Ft.)	Lowest Point.	Below Sea Level (Ft.)
North America	Mount McKinley, Alaska	20,300	Death Valley, California	276
South America	Mount Aconcagua, Chile-Argentina	22,834	Sea level	....
Europe	Mount Elbrus, Caucasus	18,465	Caspian Sea, Russia	86
Asia	Mount Everest, India-China	29,141	Dead Sea, Palestine	1,293

Pico de Teide, Teneriffe	12,200
Kosciusko, Australia	7,328

In 1928 the higher of the two Kilimanjaro Mountains, which the African natives formerly believed had a solid silver cap because of the gleam of the snow cap in the sun, was climbed by a Swedish officer, Capt. P. Möller. He ascended in six days. These two peaks are about half way between Victoria Nyanza and the coast. The lower one is an extinct volcano, capped with a crater.

VOLCANOES ACTIVE WITHIN THE LAST CENTURY.

(Prepared for The World Almanac by the American Museum of Natural History.)

The more commonly known volcanoes which have been active within the last hundred years are given herewith.

The limitation to those which have been active during the last hundred years excludes many well known volcanoes. The great Fuji would have been excluded excepting for the activity of parasite cones on its flanks. Among the giants which had to be excluded are: Orizaba, Popocatepeti, Sahama, Ixtaccihuatl, Sorata, Pomarepe, and Teneriffe.

THE PRINCIPAL LANGUAGES OF THE WORLD.

(By Dr. Frank H. Vizetelly, Managing Editor of the Standard Dictionary.)

There are said to be 3,424 spoken languages and dialects in the world, distributed as follows: America, 1,624; Asia, 937; Europe, 587; Africa, 276.

The actual number of languages recently computed by officers of French Academy is put at 2,796.

The English language is spoken by more than 180,000,000 of people and it is understood and used by nearly 60,000,000 more who do not consider it their native speech.

Danish is spoken by 4,000,000 of people and understood and used by 2,000,000 or more of the Scandinavian race.

Dutch is the speech of 15,000,000 people.

German is spoken by more than 90,000,000 and understood by 20,000,000 more.

Russian is spoken by 90,000,000; French by 60,000,000, but it is understood and spoken by at least 50,000,000 more; Spanish, by 55,000,000; Italian, by 45,000,000; Portuguese, by 30,000,000.

Turkish, once spoken by more than 30,000,000 of people, is the speech of nearly 15,000,000 natives and is understood by nearly as many more. Recent investigations claim that 24,000,000 use it, despite population statistics which show that Italian has superseded it in northwestern Africa, and Greek in southeastern Europe.

Although the war has added some few words to the English language, the number is less than 10,000.

The reputable English language contains approximately 700,000 words. Possibly 300,000 more terms may be stigmatized as nonce, obsolete, vulgar, low, etc., and therefore seldom or never sought in dictionaries designed for the home.

Of the bulk—700,000 terms—nearly one-half consists of scientific terminology seldom met outside of textbooks and of archaic, obsolescent or obsolete terms.

Various estimates of the sources of English words have been made at different times. On the basis of the Lord's Prayer, George Hickes calculated that nine-tenths of our words were of Saxon origin. Sharon Turner's estimate was that the Norman were to the Saxon as 4 to 6. Trench computed 60 per cent. Saxon; 30 per cent. Latin, including those received through French; 5 per cent. Greek, and 5 per cent. other sources. Prof. W. W. Skeat in the recently published fourth edition of his dictionary, which contains approximately 20,000 words, shows the following sources:

Anglo-Saxon and English, 3,681; Low German, 126; Dutch, 207; Scandinavian, 693; German, 333.

French from Low German, 54; French from Dutch or Middle Dutch, 45, French from Scandinavian, 63; French from (1) German, 85, French from (2) Middle High German, 27; French from (3) Old High German, 154; French from (4) Teutonic, 225; French (Romance languages), 297; French from Latin, 4,842; French from Late Latin, 828; French from Italian, 162.

Celtic, 170; Latin (direct), 2,880; Provencal, from Latin, 25; Italian, 99; Spanish, 108; Portuguese, 21.

Greek direct or through Latin, Late Latin, French or other sources, 2,493; Slavonic, 31; Lithuanian, 1.

Asiatic: Aryan languages, including Persian and Sanskrit, 163; European non-Aryan languages, 20. Semitic: Hebrew, 99; Arabic, 272.

Asiatic: Non-Aryan, not Semitic, including Malay, Chinese, Japanese, Tatar, Australian, 135; African languages, 32; American, 102; hybrid, 675; unknown, 12. Total, 19,160.

The vocabulary of the New Standard Dictionary of the English Language aggregates approximately 455,000 words. If the dead words of our speech be added, the total, as shown by the New English Dictionary on Historical Principles, would reach 700,000 words for the English tongue, living and dead.

The latter work admits to a vocabulary of 418,825 terms in use in the literary language. It has not specialized in scientific terminology.

The German word-book (Kurschner's Universal-Konversations-Lexikon) contains not more than 300,000 words, including personal names.

Grimm's Dictionary of the German Language contains approximately 150,000 words; Littre's Dictionary of the French Language, 210,000 words; Dahl's Dictionary of the Russian Language, 140,000 words; Carlos de Ochoa's Dictionary of the Spanish Language, 120,000 words; Petrocchi's Dictionary of the Italian Language, 140,000 words.

"UNIVERSAL" LANGUAGES.

The chief artificial, "international" or "universal" languages are, in the order of their appearance, with the names of their inventors, when known—

Volapuk (1879) Johann M. Schleyer, Germany.
Esperanto (1887) Dr. L. L. Zamenhoff, Warsaw.
Spelin (1888) and Myrana (1889) J. S. Kempten, Germany.
Mondolingue (1890).
Universala (1893) Eugene Heintzeler, Germany.
Kosmos (1894) Eugene A. Landa.
Novilatin (1895) E. Beerman, Leipsic, Germany.
Idiom Neutral (1902) M. Rosenberger, Leningrad.
Ro (1906) Rev. E. P. Foster, Marietta, Ohio.
Spatari-Radio-Code a universal language without grammar or vocabulary based on the seven notes of the musical scale Do, Re, Mi, Fa, So, La, Si. Designated for international broadcasting and featured in Broadcasting 1928. Invented by Prof. Carlo Spatari, of New York.

600 LANGUAGES IN AFRICA.

There are about 600 languages, and they and their dialects can be grouped anthropologically, according to an authority in the London Times.

These groups are not conterminous, but it seems likely that they are related.

The three racial groups are the pygmies, the negroes and the Hamites.

The pygmies include the bushmen of South Africa. They have a light skin, are small in stature and primitive in their habits. They are thought to be the original inhabitants of the continent.

The negroes are a taller and stronger race. Their characteristics are a dark skin, projecting cheekbones, flat nose and crinkly hair. They are generally agriculturists, living in well-ordered communities.

The Hamites are a subdivision of the Caucasian race who probably migrated into Africa from Asia. They are mostly pastoral people and have the gift of ruling.

Where we find Hamitic people tilling the soil or negro tribes with nomadic or pastoral habits we can trace an intermixture of tribes belonging to the two racial groups.

With these racial groups correspond, generally speaking, the fundamental language groups.

The only pygmy language that is still known is that of the bushmen in South Africa. The other pygmy tribes have adopted the language of the negroes with whom they live.

The language of the negroes in the course of time has become separated into two chief groups known as the Bantu and the Sudan languages.

The Hamitic peoples, the Berbers of North Africa, the Somali, Galla and others, have their own languages, but throughout North Africa the common language for centuries has been Arabic.

The confusion of tongues in Africa has baffled traders, explorers and missionaries from time immemorial, and it formed as effective a barrier between the people of tropical Africa and the outside world as that raised by climatic and political conditions inimical to the foreigner.

The successive civilizations centered round the Mediterranean never penetrated south of the line that can be drawn from the Abyssinian highlands to the Gulf of Guinea. French, English and Portuguese traders visited African coast lands from the thirteenth century onward.

Chinese, Indians and Arabs traded with the East Africans, as Phoenicians and Egyptians had done long before by sea and by land.

For Europe, Africa was the dark continent until recent days. African languages remained a confused mass of unintelligible speech. There was no interchange of ideas, and no understanding was possible between the peoples of Europe and of central Africa.

Early in the seventeenth century Portuguese missionaries studied African languages on the east and west coats, and other missionaries from every part of Europe have done so ever since, but it is only quite lately that philologists have been able to throw light on the languages of Africa and bring some order into an apparent confusion of languages and dialects.

For many years it has been the policy of African governments to make language study obligatory for their officers and to encourage it in cooperation with the missionaries, who had already done the spade work.

The necessity for wider, even for international, cooperation has been recognized, and with the assistance of the tropical African governments has resulted in the establishment in London of the International Institute of African Languages and Cultures, which aims at becoming a clearing house for information from all parts of the world on the study of African languages.

ILLITERACY IN FOREIGN COUNTRIES.

Albania—In the school year 1927-1928 there were 530 public schools, with 955 teachers and 30,766 pupils; there were 54 private schools, with 122 teachers and 2,892 students.

Argentina—Elementary education, 6–14 years, is compulsory. At the last national census, in 1914, the percentage of literacy was 62.1, and, for each nationality, was—Argentine, 64.0; German, 91.0; Austro-Hungarian, 69.0; Spanish, 69.5; French, 83.0 English, 92.0; Italian, 61.5. The percentage of literacy was highest in the Province of Buenos Aires—67.0.

Among army recruits the average of illiteracy is approximately 25 per cent.

Australia—Elementary education is compulsory. The (census) percentages of those able to read and write are—(1921) 84.8; (1911) 84.5; (1901) 80.0; (1891) 75.4; (1881) 70.7; (1871) 62.4. Able to read only—(1921) 0.03; (1911) 0.04; (1901) 0.21; (1891) 0.34; (1881) 0.61; (1871) 1.07.

In 1921 the percentage of those over 5 yrs. who could not read was 4.3. The number of persons of school age and over unable to read is not accurately known, because the census percentages under that head "include a large proportion of children under five years of age." The percentage of marrying persons signing the register with a mark was—(1921) 0.17; (1911) 0.55; (1901) 1.32; (1891) 2.34; (1881) 5.56; (1871) 13.49; (1861) 24.60.

In Tasmania the percentage of literates was 87 per cent in 1921, as against 48 per cent in 1861.

Austria—Elementary education is compulsory. According to the 1924 census, illiteracy has been reduced to 4 per cent.

Belgium—The percentage of illiterates was—(1920) 9.3; (1910) 13.1; (1900) 19.1; (1890) 25.0; (1880) 30.26. In 1920 the literacy percentage for the whole population 5 yrs. and over was 89.3; for those 8 yrs. and over, 92.1; for those 15 yrs. and over, 96.7.

Bolivia—Elementary education is compulsory. In 1900 the percentage of illiteracy among the whole population, half of which is Indian, was 84.0. Of the total population of 1,816,271 the Indians numbered 920,864. In 1909 the percentage of illiteracy in the City of La Paz was 34.25.

Brazil—Elementary education is compulsory in 15 of the 22 states. By the 1920 census the percentage of illiterates in the whole population, including foreigners, was 75.5. The number of illiterates was 23,142,248 out of a population of 30,635,605. Of the native Brazilians 77 per cent were illiterate, while 48 per cent of the foreign population was illiterate. The highest percentage of illiteracy among Brazilians was in the State of Piauhy, where it reached 88, while the lowest, 40.5, was in the Federal District.

Bulgaria—Elementary education is compulsory. In 1920 the general percentage of literacy was 55.8 for males and 33.2 for females. Excluding Mussulmans, the percentages were 63.6 and 38.3 respectively. By separate nationalities the literacy percentages were: Turks, 9.0; gypsies, 6.0; Jews, 6.9; Armenians, 64.0; Rumanians, 28.0; Greeks, 41.0.

Canada—Elementary schooling is compulsory. According to the Dominion census of 1921, the percentage of illiterates in the whole population over 10 years (including Indians and other aboriginals, and foreign-born, and colored races) was—unable to read or write, 5.1; unable to read and write, 5.7. The percentage unable to read or write is raised from 1 to 5 by races other than English-speaking. The population over 10 years in 1921 numbered 6,682,072.

Canal Zone—Illiteracy percentages—native whites, none; foreign-born whites, 1.9; negroes, 10.2.

Ceylon—The percentage of illiteracy, all races, in 1901 was 78.3; among European residents, 11.9. In 1921 the percentage of literacy (whole population) was 48.6 for men, and 18.0 for women. The test was ability to read and write a short letter.

Chile—Elementary education has been obligatory since 1925, and reforms in the system are in progress. The percentage of those able to read, in the general population, has been—(1920) 50.3; (1907) 40.0; (1895) 31.8; (1885) 28.9; (1875) 22.9; (1865) 17.0; (1854) 13.5. In 1920 the percentage of literacy by sexes was—males, 51.2; females, 49.5.

China—Education on a Western basis since 1905 has spread among all classes of Chinese, but there are no recent figures on illiteracy. According to a statement in 1925 by the Chinese National Association of the Mass Education Movement, the percentage of illiterates then was 80.0.

Colombia—According to the census of 1918 the percentage of illiterates in the whole population (5,855,077, of whom 158,428 were Indians) was—read, but not write, 2.04; neither read nor write, 67.53.

Costa Rica—Out of a population of 471,524, as of May 11, 1927, there were 223,389 literates—47.4 per cent of the total population, or 64.5 per cent of the 346,198 persons 9 years of age or over. Illiterates (males, 52,602; females, 53,888) totaled 111,490—23.6 per cent of the whole population, or 32.2 per cent of those 9 years of age or over.

Cuba—Elementary education is compulsory. In 1919, the percentage of illiteracy in the whole population was 52.4; for those of 10 yrs. and over it was 39.0; for those of 20–24 yrs. it was 26.3 per cent.

Czechoslovakia—Education 6–14 years is compulsory. According to the 1921 census, the percentage of illiterates in the whole population was 7.7. It varied, as follows: in Bohemia, 2.4; in Moravia, 3.1; in Silesia, 3.7; in Slovakia, 15.0; in Sub-Carpathian Ruthenia, 50.2.

Denmark—Elementary school instruction, 7–14 years, is compulsory. There are no government statistics on illiteracy. The population in 1925 was 3,457,390 and the number of children at school was 495,952. The official Yearbook for 1927 says that on Jan. 1, out of 464,309 school children, 618 were without education on account of insanity.

Dominican Republic—Illiteracy officially estimated by the 1920 census at 70 per cent among those of 13 yrs. and over; for those of school age, 40.6 per cent. There are 856 schools in the country classified as follows: normal schools, 10; graduate schools, 72; primary schools, 688; vocational schools, 15; night schools, 40; semi-official schools, 29; reform schools, 2. According to the most recent report of the Department of Education, the total number of students attending schools in the country is 89,154.

Dutch East Indies—Percentages of literacy among those 15 yrs. and over: Europeans, men 841, women 78.9; natives, men 5.9, women 0.96; foreign Asiatics, men 32.86; women 7.01.

Ecuador—Public instruction is obligatory for children, 6–12 years. There are 1,572 primary schools, 2,992 teachers, and 120,412 pupils. Ranchers in remote districts must provide schools on their estates.

Egypt—Elementary instruction was made compulsory under the 1923 Constitution, and, since then, 500 to 700 new public schools have been built each year. In 1917, the percentage of illiterates in the general population was 92.1;—among Moslems, 94.7; among Orthodox, 82.9; among Catholics and Protestants, 53.1; among Jews, 56.2.

Estonia—Elementary education is compulsory. In 1926 the percentage of illiterates was 3.0; in 1922 it was 5.6.

Finland—Elementary education is compulsory. In 1920 the percentage of illiterates in the whole population over 15 years was 1.0 (1.1 for males, 0.9 for females). It was 0.5 in cities, and 1.1 in rural communities. Among Evangelical Lutherans it was 0.6; Baptists, 0.03; Orthodox Church, 23.2; Catholics, 1.0.

France—Elementary instruction, 6–13 years, is obligatory.

In 1921 the percentage of illiteracy among those 10 yrs. and over was 8.2 per cent, approximately.

The percentage of persons married in 1926 who signed the name with a cross was—males 0.8; females, 1.1. The percentage of illiterates among recruits was (1926) 9.39; (1925) 9.18; (1924) 8.89; (1920) 4.74; (1910) 4.28. The considerable increase for the Class of 1924 is attributed to the fact that many were deprived of four important years of schooling during the war period 1914 to 1918. When all the available male population was serving with the colors, boys from 10 to 14 years of age were employed in the fields. There are now in France, 3,091,052 pupils in the elementary schools.

The number of persons in France, 15–60 years, who could neither read nor write was—(1910) 2,055,000; (1900) 3,097,000; (1870) 10,008,000. In 1924–5, there were 3,736 elementary ("infant") schools, with 366,797 pupils.

Germany—Elementary instruction, 6–14 years, is compulsory. Based on an estimated population of 64,000,000 in 1927, the percentage of illiteracy in the whole population, 6 years and over, is approximately 0.03. This estimate is from an official source. There are no government figures on illiteracy since 1918. In 1922 there were 52,763 public elementary schools, with 8,894,486 pupils; and 675 private schools, with 35,584 pupils.

Greece—Elementary education is compulsory. In 1907 the percentage of illiterates was 57.2.

Guatemala—By the law of 1928 primary education for 3 yrs. is compulsory in rural parts; in urban places 3 yrs. elementary and 3 yrs. complementary. In 1921, by the general census, 89.08 per cent of the whole population was illiterate.

Guiana (British)—Literacy percentages among the whole population: men, 40.4; women, 49.6. This means those who can read.

Haiti—Illiteracy approximates 85 to 90% in the general population.

Honduras—Education is free and in theory compulsory but illiteracy is very extensive although the Government is endeavoring to improve and extend primary education. There are about 80,000 children of school age, less than half of whom ever enter the primary schools. The instruction in primary and secondary schools is said to be good. There is one University of limited scope due to lack of funds and equipment.

Hungary—Elementary school attendance, 6–12 years, is compulsory. By the 1920 census, the percentage unable to read and write was 15.2

India (British)—Elementary education is obligatory. According to the census of 1921, the number of illiterates, unable to read and write, was 142,623,691 males out of a total male population of 162,465,129, and 150,807,889 females out of a total female population of 153,590,102.

This was a total of 293,431,580 illiterates in a total population of 316,055,231 in that part of India in which illiteracy was under inquiry. There were 2,387,249 persons enumerated in tracts where literacy was not recorded, including Burma, Kashmir, the Northwest Frontier Province, and the Andamans and Nicobars.

The percentage of literates 5 years and over, by religions, in 1921, was—Hindu, 7.5; Sikh, 6.8; Musulman, 5.4; Christian, 28.5. The persons with a knowledge of English numbered 2,500,000.

Ireland—Education is compulsory for children 6–14 years. There are no separate illiterate data for northern Ireland or for the Irish Free State; and none for Ireland as a whole since the 1911 census. In the 1926 census the subject was not covered by the questionnaire. In Ireland as a whole the percentage, since 1841, of children 10–14 years, unable to read or write, was: (1841) 46.0; (1851) 44.5; (1861) 28.2; (1871) 21.5; (1881) 12.8; (1891) 5.9; (1901) 2.9; (1911) 1.4. The percentage of illiterates among the whole population 5 years and over were: (1841) 53.0; (1851) 46.8; (1861) 38.7; (1871) 33.4; (1881) 25.2; (1891) 18.4; (1901) 13.7; (1911) 11.9. In all of Ireland (1911), 3 per cent of the whole population of 4,390,219 could not write but could read.

In the Irish Free State, in 1926, 2.2 per cent of the grooms and 1.3 per cent of the brides signed the marriage register with a mark.

Italy—The percentage able to read was: (1871) 31.0; (1881) 38.0; (1901) 51.0; (1911) 62.0; (1921) 73.0. Thus, by the census returns, illiteracy has decreased in the last fifty years from 69 per cent to 27 per cent. In 1921 the number of persons 6 years and over who could read was 24,822,070 out of 34,223,361. The percentage of males who could read was 76; of females, 70. In 1911 the percentage was, males 67, females 58. In that year the percentage of illiteracy ranged from 11.0 in Piedmont to 69.6 in Calabria. Elementary education is compulsory and illiterates are under various disabilities.

Japan—Elementary education is compulsory, the ordinary elementary course extending over six years. The middle and higher schools, owing to the number of applicants, can admit only about ten per cent thereof. This is done by selective examination. In 1923 the percentage of illiteracy was 0.94.

Jugo Slavia (Kingdom of the Serbs, Croates, and Slovenes)—Elementary education is nominally compulsory (from 6 to 10 years). At the last national census, in 1921, the percentage of literacy was 51; 57 per cent for males and 39 per cent for females. At the beginning of the school year 1923-24 there were 961,470 children enrolled in primary schools (585,048 male and 387,422 female), 80,981 children in secondary schools (58,257 male and 22,724 female) and about 11,000 students in the three Universities at Belgrade, Zagreb and Ljubljana. All education is free. Official data indicate that there were at that date 17,570 teachers in primary schools (9,230 male and 8,180 female); 3,355 teachers in secondary schools (2,689 male and 666 female) and 604 professors of University.

King Alexander, on March 22, 1929, ordered the use of the Latin alphabet to replace the archaic complicated Cyrillic characters which have been in use without change for the last thousand years.

Latvia—According to the census of 1925, the percentage of illiteracy in the provinces was: Vidzeme (excluding Riga City,) 4.53; Riga, 4.89; Kurzeme, 7.62; Zemgale, 12.26; Latgale, 35.99; average for all Latvia, 14.72; Latgale lies along the Russian frontier.

Lithuania—Elementary instruction in Lithuania (7 to 14 years) is compulsory only in a few districts. The percentage of illiteracy in Lithuania, excluding the Memel District, is 44.1 based on a population of 2,028,971 in the year 1923. There are no statistics on illiteracy available since 1923. On January 1, 1928, there were 2,400 state elementary schools with 124,547 pupils and 80 private elementary schools with 3,191 pupils in Lithuania, not including the Memel District. There were 236 elementary schools with 15,162 pupils in 1926 in the Memel District.

Luxemburg—Education, 6–13 years, compulsory. Illiteracy practically non-existent, it is officially stated.

Malay States (Federated)—Percentage of illiteracy in whole population of large towns in 1921 was 55.9; in the unfederated states, 68.6; in the Straits Settlements, 63.4.

Mexico—Elementary education is compulsory and by the constitution of 1917, is secular. Government statistics show the percentage of illiterates in the whole population in 1925 as 62.0, as compared with 80.0 in 1910. In 1925, schools numbered 11,704; pupils, 985,819.

Netherlands, The—Elementary education, 7–13 years, is obligatory. There are no official data on illiteracy in the general population. The percentage of illiterates among army recruits was—(1926) 0.17; (1925) 0.32; (1924) 0.27; (1923) 0.35. The percentage among navy recruits was—(1926) 1.50; (1925) 0.40; (1924) 0.70; (1923) 0.40. The percentage of persons signing in 1918 the marriage register with a cross was—males, 0.22; females, 0.41. Illiteracy is estimated (1927) in the general population, at 0.23.

Newfoundland and Labrador—By the census of 1921 the percentage of illiteracy was 22.7 in Newfoundland, and 40.0 in Labrador.

Nicaragua—Percentage of illiteracy in whole population in 1920 was about 72.0.

New Zealand—The census of 1916, the latest on literacy, showed the percentage of the whole population (exclusive of Mooris), 5 years and over unable to read or write any language at 4.48 for males and 3.86 for females; combined rate, 4.17. The percentage of illiterates 10 years and over (exclusive of Mooris) was 1.19 for males and 0.82 for females; combined 1.0.

The figures of illiterates include those whose lack of education arises from physical or mental ailments, and the proportion to the population of those who are physically or mentally capable of acquiring the rudiments of education. For fifty years a system of free, universal and compulsory education has been in force in New Zealand.

Nicaragua—Elementary instruction is obligatory. The education officials estimate illiteracy in the whole population at 40.0 per cent. There are no government statistics.

Norway—Elementary school attendance is compulsory. The percentage of those able to read and write is over 99.0 it is officially estimated.

Palestine—No official data. It is officially estimated that 90 per cent of Jews and Christians are illiterate. The Moslems are more generally educated. Elementary instruction is not compulsory but the government is extending a free public school system.

Panama—About 70% of the population is illiterate, the Ministry of Public Instruction estimates. There are 596 public schools, with 1,687 teachers. There are 55,866 children in the primary schools.

Persia—The law calls for universal compulsory elemental instruction. The attendance at schools in 1926 was 137,606. The whole population is about 10,000,000. There are no illiteracy statistics.

Peru—There are about 350,000 pupils in the primary schools, public and private; and there are approximately 50,000 students in the secondary schools, public and private. There are about 800,000 persons of school age in Peru.

Poland—Elementary education is compulsory. The census of 1921 gave a total population of 27,176,717, among which were 6,581,307 illiterates over 10 years of age. They were, by age groups—10 to 14 years, 1,051,490; 15 to 19 years, 751,749; 20 to 29 years, 1,023,911; 30 to 39 years, 918,137; 40 to 59 years, 1,835,302; over 60 years, 1,000,748.

Porto Rico—Elementary education is compulsory. In 1920 the percentage of illiterates was 55.0.

Portugal—Elementary instruction is compulsory. The percentage of illiteracy approximates 68.0 for all those of 5 yrs. and over.

Roumania—Education is compulsory. In 1909 the percentage of illiterates in the whole population over 7 years was 60.16. In 1910 the percentage of illiterate army recruits was 41.0. There are no census returns on the subject.

Russia, Soviet—Education is obligatory. In 1897 the percentage of illiteracy in the Russian Empire was 69.0. According to the census of 1896 it had been reduced to 48.7 per cent. The percentage among men was 34.6 and among women 63.3. The number of elementary schools at the close of 1926 was 108,424 and the number of pupils 9,903,000. The number of pupils was 40 per cent greater than before

the revolution. Above Soviet figures on illiteracy apply to all persons above 7 years.

The percentage of literacy in 1920 has been thus estimated for those 5 yrs. and over: European Russia, 33.0; in Trans-Caucasia 28.1; in Western Siberia, 21.8.

Salvador—Elementary education is compulsory in the republic. The Department of Public Instruction estimates that the percentage of illiterates in the whole population, including foreigners, is 55.0. The number of illiterates is 880,000 out of a population of 1,600,000. The mass of the population is native; there are very few foreigners in Salvador. The highest percentage of illiteracy is to be found in the Department of Santa Ana, while the lowest is in the Department of San Salvador.

Siam—The estimated population in 1921 was 9,221,000, of whom 833,972 males and 88,756 females could read and write. By these figures, the percentage of illiterates was 90.0. With the establishment of compulsory national education and the provision of modern primary and secondary schools with a central university—The Chulalankarana—in Bangkok, the capital, the latest returns of the ministry of Education, for 1926, give an illiteracy rate of 9.22% among the male population. The rate for women is being lowered, but is still higher than males.

Spain—Elementary instruction is compulsory. According to the 1920 census the literacy of the population as a whole was 46.3 per cent; for those 5 yrs. and over, 51.2 per cent; for those 10 yrs. and over, 55.6 per cent. In 1910 the percentage of illiteracy was—read but not write, 1.77; neither read nor write, 59.35. In 1860, over 75 per cent could neither read nor write.

Sweden—Elementary education, 7–14 years, is obligatory. In 1926 there were 665,032 pupils in elementary schools. Practically all army or navy recruits can read and write.

Switzerland—Elementary school attendance is compulsory. There are no government statistics on illiteracy. In 1923, out of 59,122 persons who became married, there were 22 who could not write (12 men and 10 women) and of these 5 were Swiss (4 men and 1 woman. Of the others, 12 were Italians, 2 were French, 1 was a Hollander, and 2 were Poles.

Syria—Illiteracy is estimated at 80 per cent Primary school education is "compulsory" in accordance with the Ottoman law of 1913, but in practice this law is not enforced, and not over 25 per cent of the boys and 6 per cent of the girls of primary school age are actually attending institutions, and not all of these regularly. Schools and institutions of higher learning are divided into three classes: official schools, maintained by the local governments; local schools, maintained chiefly by the various religious sects; and foreign schools, such as American, French, British, and Italian, maintained by private or governmental contributions from foreign countries. At the end of 1926, 131,704 students divided into 87,660 boys and 44,044 girls were attending these various institutions.

Turkey—As regards educational activities in Turkey, this work is directed by the Department of Public Instruction, the head of which is a Cabinet officer. The number of public schools coming under the direct administration and control of this Department amounts, according to the latest data published to 6,271, of which 6,060 are primary schools; attendance is compulsory. The total number of pupils in these schools and the number of teachers has been estimated at 455,627 and 14,756 respectively. In addition to the primary schools, Turkey possesses a university, a civil service school, an academy for fine arts, two teachers' colleges, twenty-three secondary teachers' schools, four commercial schools, nineteen lyceums, seventy secondary schools and sixty-nine kindergartens. In addition to the above, there are several private and foreign schools.

A new Turkish alphabet, composed of Latin characters, was adopted by the Grand National Assembly of Turkey, according to a law passed on November 1, 1928. The use of the new Turkish characters became obligatory from the date of publication of the law.

Newspapers, journals, etc., were required to be printed in the new characters beginning December 1, 1928, but the general and complete application of the law does not become effective until June 1, 1930.

The new Turkish dictionary, compiled as a result of the change from the Arabic to the Latin alphabet and the Ghazi's wish to delete from the language most of the Persian and Arabic words long in usage, reveals the number of Turkish words to be only 24,000. This is less than one-fourth the number in standard English dictionaries.

A Turkish expert has computed that the best Turkish scholars know only 10,000 words, ordinary educated Turks only from 2,500 to 4,000, lower class city folk 1,200, while the Anatolian peasant's vocabulary is limited to 800 words.

Union of South Africa—The census of 1918 showed the following literacy percentage in the European population 7 years and over—able to read and write, 94.57; able to read only, 1.50; able neither to read nor write, 1.99; unspecified, 1.94. The percentages of those Europeans 10 years and over able neither to read nor write was—(1918) 1.24; (1911) 2.34; (1904) 4.11. The bulk of the native population (negroes) is still illiterate, although education is making considerable progress among them.

United Kingdom—There are no recent official statistics on illiteracy, according to the Secretary of the Board of Education, London, which has supervision over England and Wales. The percentage is small. Education is compulsory in England and Wales between 5 and 14 years; in Scotland, up to 15 years. So far as England and Wales are concerned, the latest figures with regard to persons signing the marriage register by mark are for the year 1924, when, in a total of 296,416 marriages, 995 males and 1,041 females (percentage 0.34 men, and 0.35 women), signed the marriage register by mark. In Scotland in 1925, in a total of 32,456 marriages, 79 males and 99 females (percentage 0.24 men, 0.31 women), signed the register by mark.

Uruguay—Primary education is obligatory. In 1908 the percentage of illiteracy was 39.8 in the population other than aboriginal. Literacy among those contracting marriage averages about 88 per cent of the entire population, one in eleven is in school.

Venezuela—Education, 6-12 years of age, is compulsory. Total pupils enrolled, 96,440; teachers, 2,153. Illiterates number (1926) 1,748,743. The 1926 appropriation for instruction was $1.203,352. The percentage of the population in 1926 unable to read or write averaged 72.1, based on data from six representative states.

THE EVOLUTION OF MAN.

The following minute has been adopted by the Council of the American Anthropological Association:

In view of the dogmatic objections raised against the theory of evolution the council of the American Anthropological Association have thought it advisable to formulate the present position of scientific inquiry.

The plants and animals belonging to early periods of the earth's history show that the forms have not remained the same for any length of time. The changes that have occurred are of such character that we are compelled to consider the later forms as descendants of older forms.

No form of living being has remained the same through the ages. The evidence of past times is corroborated by the structural and developmental analogies observed in related forms, proofs of a gradual differentiation from common ancestral forms.

The minute structure of all living matter is alike and shows that all organisms, from the lowest to the highest, must be considered as a unit.

Man has succeeded in producing a variety of forms of domestic animals and cultivated plants which differ from their ancestors. Our success, accomplished in a very short period, indicates that in long periods nature will produce more fundamental changes.

Man is part of the animal world. In all respects his anatomical structure conforms to that of the rest of the animal world. His prenatal life closely parallels that of the higher mammals. The same influences that control their development after birth control him and he responds in a like manner to the environment in which he is placed.

Prehistoric archeology has shown that, in the course of the ages, man has undergone great changes in physical type and that ancient man differed from modern races, the more so the more ancient the remains.

Local types of man have developed on every continent and their existence proves that changes in the heritable characteristics of racial groups are effected in the course of time.

We must conclude that the bodily form of man as well as that of animals and plants has changed and is still changing, not in the course of centuries, but in long periods.

The exact cause of changes in the form of organisms and the conditions under which they occur, as well as the causes making for stability, are still imperfectly known. The principle of change has been so well established that it should become the common property of mankind.

POISONS AND THEIR ANTIDOTES.

(Revised by Medical Staff, American Red Cross, Washington, D. C.)

NOTE—When the poison is unknown, give stimulants and soothing liquids.

POISONS FOR WHICH A N EMETIC IS ALWAYS GIVEN FIRST.

The treatment is in addition to an emetic.

Alcohol—In any form—rum, gin, whiskey, proof spirits, etc., also methyl alcohol.

Symptoms—Giddiness, swaying of body, inability to stand. Face flushed, eyes red, skin clammy, weak pulse, may be convulsions and unconsciousness.

Treatment—Hot coffee or aromatic spirits of ammonia. Try to arouse, but if weak do not exhaust by making walk. Dash cold water on face and chest. When somewhat recovered, wrap warmly and put to bed.

Arsenic.—Found in rat poisons, vermin killer, Paris green, Fowler's solution. Sometimes in tinned fruits and beer.

Symptoms—Severe pain in stomach; purging; severe cramps in legs, vomiting, dryness of throat, cold sweats, profound shock.

Treatment—Much lukewarm water. Magnesia in large quantity or dialyzed iron in ½-ounce doses, repeated. Beaten-up eggs or castor oil and stimulants. Warmth and rubbing.

Carbon Monoxide.—It is in blast and coke furnaces and foundries; in leaky furnaces or chimneys; about gas stoves without flue connections.

The exhaust gases of gasoline automobiles contain from 4 to 12 per cent. of carbon monoxide.

Symptoms—Carbon monoxide exerts its extremely dangerous action on the body by displacing oxygen from its combination with hemoglobin, the coloring matter of the blood which normally absorbs oxygen from the air in the lungs and delivers it to the different tissues of the body.

Treatment—1. Remove patient from atmosphere containing carbon monoxide. 2. Administer oxygen as quickly as possible and in as pure form as is obtainable, preferably from a cylinder of oxygen through an inhaler mask. 3. If breathing is feeble, at once start artificial respiration by the prone posture method. 4. Keep the victim flat, quiet, and warm. 5. Afterward, give plenty of rest.

Iodine.—Owing to the now universal use of the Tincture of Iodine in the treatment of scratches, cuts and wounds, it is found in every household and as a consequence there are a great many cases where children and adults have taken it accidentally or otherwise.

The antidote for Iodine poisoning is to give immediately a large tea cup of starch, mixed with cold water, to about the thickness of good buttermilk. Then, produce vomiting by putting the finger in the throat or an ametic.

Lead.—Sugar of lead, lead paint, white lead.

Symptoms—Throat dry; metallic taste with much thirst, colic in abdomen, cramps in legs, cold sweat; sometimes paralysis of legs and convulsions.

Treatment—½-ounce Epsom salts in tumbler of water. Stimulants and soothing liquids.

Opium.—Laudanum, morphine, paregoric, some soothing syrups and cough mixtures.

Symptoms—Drowsiness, finally unconsciousness; pulse full at first, then weak; breathing full and slow at first, gradually slower and shallow; pinhead pupils; face flushed, then purple.

Treatment—May have difficulty in getting emetic to work; plenty of strong coffee. Try to arouse by speaking loudly and threatening, but do not exhaust by compelling to walk, etc. Stimulants and artificial respiration.

Phosphorus.—In matches, phosphorous paste in many rat poisons and vermin killers, often with arsenic.

Symptoms—Severe pain in stomach, vomiting. Skin is dark and may have odor of phosphorus. Bleeding from nose, bloody purging. Convulsions.

Treatment—Epsom salts, ½-ounce in tumbler of water, or magnesia. Stimulants. Soothing liquid best. Milk. Avoid fats and oils.

Ptomaine.—Poisoning by decayed meat, fish, milk, or ice cream.

Symptoms—Nausea, vomiting, purging. Skin cold and clammy. Pulse weak. Severe pain in abdomen, cramps, great prostration and weakness. Often eruption on skin.

Treatment—Purgative, castor oil or Epsom salts. Teaspoonful of powdered charcoal, and repeat.

Botulism—Poisoning from infected ripe olives, preserved fruits and food.

Symptoms—Very similar to ptomaine poisoning but may be delayed for several hours. Treatment same as ptomaine poisoning.

Poisonous Mushrooms or Toadstools and Fungi—

Symptoms—Vomiting, purging and watery diarrhea. Discharges, sometimes accompanied by blood. Pulse slow and strong at first but later weak and rapid. Saliva and sweat pour out.

Treatment—Give emetic at once and send for physician, who will administer sulphate of atropin, hypodermically in most cases.

Strychnine—Nux Vomica.—Strychnine is frequently used on meat to poison animals, and in some vermin killers.

Symptoms—Convulsions, very severe, alternating with cramps, affecting all muscles of body. Back is bowed up by spasms of muscles. Jaws are locked. Spasm of muscles is so great that it prevents breathing, so face becomes dusky.

Treatment—Powdered charcoal, if possible, in large quantity. Follow with another emetic.

POISONS FOR WHICH AN EMETIC SHOULD NOT BE GIVEN FIRST.

Mercury.—Corrosive sublimate, antiseptic tablets. Other salts of mercury much less commonly used.

Symptoms—Corrosive sublimate is very irritating, so when taken turns mouth, lips and tongue white. Mouth is swollen and tongue is shrivelled; always metallic taste in mouth. Pain in abdomen. Nausea and vomiting mucus and blood, bloody purging, cold, clammy skin, great prostration, and convulsions.

Treatment—First, give white of egg or whole egg beaten up; flour and water, but not so good. Emetics, soothing liquids, and stimulants.

Nitrate of Silver.—Lunar caustic.

Symptoms—Pain in mouth and stomach; mouth first colored white, then black; vomit first white, then turns black.

Treatment—Common salt dissolved in water, or milk very frequently. Then emetic. Afterward soothing liquids and stimulants.

POISONS FOR WHICH AN EMETIC SHOULD NEVER BE GIVEN.

Corrosive Acids.—1, Acetic; 2, Hydrochloric (spirits of salt); 3, Nitric (aqua fortis); 4, Sulphuric (vitriol).

Symptoms—Very severe burning pain in mouth, throat, and stomach. Wherever acid touches skin or mucous membrane they are destroyed. Frequently vomiting and purging. More or less suffocation from swelling of throat, great prostration and shock.

Treatment—An alkali to neutralize acid. Best, magnesia or chalk in water, given frequently and freely. Lime, whiting, baking soda, plaster, tooth powder, or even wood ashes may all be used for alkali, or ammonia, a tablespoonful to 2 cups of water, but those mentioned above are better as they are less irritating. Afterward, soothing liquids, milk, milk and egg, olive oil. Stimulants are practically always required. If acid has entered air passage, may inhale fumes of ammonia.

Oxalic Acid (salts of lemon or sorrel).

Symptoms—Much like corrosive acids just named, but not so much burning of lips, etc.

Treatment.—Magnesia, chalk, and water or lime water to neutralize acid. Then one ounce of castor oil and stimulants freely.

Carbolic Acid (Phenol)—(Very commonly used in attempts at suicide.)

Symptoms—It is also a powerful corrosive poison, which causes great pain and vomiting. Severe case: Unconsciousness very soon and early death. Usually easy to tell by odor of acid and burn, which with pure acid is white and with impure, black.

Treatment—Rinse mouth with pure alcohol. If grown person, should swallow three or four tablespoonfuls of alcohol mixed with an equal quantity of water. Follow this in five minutes with two tablespoonfuls of Epsom salts dissolved in a little water. Though not so good, limewater may be used to rinse mouth.

Caustic Alkalies—1, Ammonia: Strong ammonia, ammonia liniment, camphor liniment; 2, Lime: Quicklime; 3, Potash: Caustic potash; 4, Soda: Caustic soda.

Symptoms—Much like corrosive acids. Immediate severe burning, pain in mouth, throat, and stomach. Vomiting and purging.

Treatment—An acid to neutralize alkali. Vinegar, lemon or orange juice. Tartaric or citric acid in plenty of water. Soothing liquids, stimulants. If cannot swallow, may inhale acetic acid or vinegar from a pocket handkerchief.

HELP IN CASE OF DROWNING AND OTHER ACCIDENTS.

(Revised by Medical Staff, American Red Cross, Washington, D. C.)

Drowning, Electric Shock, Gas, Smoke and Other Suffocations—There are several methods of *artificial respiration* but the prone pressure method is considered the best, being widely used throughout the United States as well as in many foreign countries.

By this plan many human lives are saved each year by members of the American National Red Cross First Aid and Life Saving Service, who use it to the exclusion of all others.

This procedure has been approved by the following organizations: American Telephone and Telegraph Company; American Red Cross; American Gas Association; Bethlehem Steel Company; National Electric Light Association; National Safety Council; Bureau of Medicine and Surgery, Navy Department; Office of the Surgeon General, War Department; U. S. Bureau of Mines; U. S. Bureau of Standards; and U. S. Public Health Service. The directions are as follows:

1. Lay the patient on his belly, one arm extended directly overhead, the other arm bent at elbow and with the face turned outward and resting on hand or forearm, so that the nose and mouth are free for breathing.

2. Kneel straddling the patient's thighs with your knees placed at such a distance from the hip bones so as to apply pressure direct from shoulders to heel of hands. Place the palms of the hands on the small of the back with fingers resting on the ribs, the little finger just touching the lowest rib, with the thumb and fingers in a natural position, and the tips of the fingers just out of sight.

3. With arms held straight, swing forward slowly, so that the weight of your body is gradually brought to bear upon the patient. The shoulder should be directly over the heel of the hand at the end of the forward swing. Do not bend your elbows. This operation should take about two seconds.

4. Now immediately swing backward, so as to remove the pressure completely.

5. After two seconds swing forward again. Thus repeat deliberately twelve to fifteen times a minute, the double movement of compression and release, a complete respiration in four or five seconds.

6. Continue artificial respiration without interruption until natural breathing is restored, if necessary, four hours or longer, or until a physician declares the patient is dead.

7. As soon as this artificial respiration has been started and while it is being continued, an assistant should loosen any tight clothing about the patient's neck, chest, or waist. KEEP THE PATIENT WARM. Do not give any liquids whatever by mouth until the patient is fully conscious.

8. To avoid strain on the heart when the patient revives, he should be kept lying down and not allowed to stand or sit up. If the doctor has not arrived by the time the patient has revived, he should be given some stimulant, such as one teaspoonful of aromatic spirits of ammonia in a small glass of water or a hot drink of coffee or tea, etc. The patient should be kept warm.

9. Resuscitation should be carried on at the nearest possible point to where the patient received his injuries. He should not be moved from this point until he is breathing normally of his own volition and then moved only in a lying position. Should it be necessary, due to extreme weather conditions, etc., to move the patient before he is breathing normally, resuscitation should be carried on during the time that he is being moved.

10. A brief return of natural respiration is not a certain indication for stopping the resuscitation. Not infrequently the patient, after a temporary recovery of respiration, stops breathing again. The patient must be watched and if natural breathing stops, artificial respiration should be resumed at once.

11. In carrying out resuscitation it may be necessary to change the operator. This change must be made without losing the rhythm of respiration. By this procedure no confusion results at the time of change of operator, and a regular rhythm is kept up.

Caution—In removing victim from electric contact protect yourself by using rubber gloves, a newspaper, or woolen cap or garment wrapped on hands. Do not touch person's bare skin with your hands unprotected. The rescuer may take hold of some parts of the clothing, if dry, pulling it off quickly.

Remember that mechanical devices are dangerous in the hands of the inexperienced.

Do not place the body in a bath unless ordered to do so by a doctor.

Shock.—Present in all serious injuries and greatly increased by severe bleeding and pain. Pale face, cold clammy skin, rapid weak pulse, shallow breathing. Lay patient on back, head low, loosen clothing about neck, chest, and abdomen. Keep warm with blankets and hot water bottles, hot bricks or heated stones, being careful not to burn the person. If he can swallow, give him hot strong coffee, hot milk or hot water, half teaspoon aromatic spirits of ammonia in water. *Never pour liquid down the throat of an unconscious person.*

Hemorrhage.—Bleeding can usually be stopped by applying small pad of gauze and a tight bandage over wound or by pressure with thumb on main blood vessel between wound and heart, also elevating limb. Remember the points for pressure are—just in front of ear for bleeding from temple; inner side of arm below armpit about where inside seam of shirt comes; inner side of thigh near groin, and in the hollow place back of the knee. Failing by pressure, use bandage or handkerchief, in which a stone or other hard object is wrapped, as a tourniquet around the limb between the wound and the heart, twisting gradually with stick until bleeding stops. **Loosen every fifteen minutes.** To remain loosened if bleeding has stopped, watching closely, and tighten the tourniquet or bandage if necessary.

Open Wounds.—On scratches and slight wounds apply half strength iodine. Dirty or greasy wounds should first be cleansed with high grade benzine. All open wounds should be covered with gauze and bandage from first-aid kit.

Never wash or touch a wound with fingers, or that part of the gauze that comes in contact with the wound. Never use cobwebs, tobacco, waste, or oil, *as they may cause blood poisoning.*

Burns.—On slight burns apply common baking soda, dry or dissolved in water as a paste; picric acid gauze wet with water, or two per cent solution of picric acid on plain gauze. Cover extensive burns, preferably with gauze or clean soft cloth saturated with baking soda solution, carbolized vaseline, unguentine, or, in an emergency, any clean pure oil.

Fracture (*Broken Bones*).—Handle carefully to prevent sharp ends cutting through flesh. Apply narrow boards, heavy pasteboard, umbrellas, canes, fence railings, or any rigid appliances, as splints for the fractured limbs to permit the patient to be moved without pain or danger. Splints must be padded when applied next to skin, and be long enough to reach beyond the joints above and below fracture.

Three persons are necessary to place an injured person properly on a stretcher, one to lift head and shoulders, another the hips, and a third the legs. The stretcher should be placed alongside the injured, and the helpers should kneel on one knee on the side of the patient away from the stretcher lifting him in unison, first to their bended knees and then lay him gently on the stretcher.

Eye Injuries.—Loose particles may be removed from the eyelid with a clean handkerchief, or a bit of clean cotton rolled on a toothpick or a match stick. If not easily removed in this way, make no further attempt. Particles embedded in the lid or eye ball should be left to the surgeon. *Never violate this rule. Blindness may result.* In case of serious eye injury, cover with clean cloth compress wrung out in ice cold water and send patient to surgeon or hospital.

Sunstroke and Heat Exhaustion.—In sunstroke face is flushed, skin hot and dry. Patient may be delirious—should be cooled as quickly as possible. Apply cracked ice or cloths wrung out in cold water to various parts of the body, especially the head, which should be slightly raised. Patient may be placed in cool bath. **Heat Exhaustion**—Skin pale, cold and moist. Symptoms are same as shock and same treatment is required.

Fainting and Fits.—In fainting, place patient on back with head low; loosen clothing; get plenty of ventilation by opening windows, or fanning; keep crowd back; ammonia on handkerchief to the nostrils; do not attempt to hold patient down. Place rolled up handkerchief, lead pencil, clothes pin, or spoon between teeth. Prevent patient from injuring himself, and let him sleep after attack.

REMEMBER—That Safety is the best First Aid. That most accidents are preventable. That the majority of serious and fatal cases of blood poisoning occur from little cuts or scratches, so never neglect a little wound. Consult your doctor.

Lightning—Dash cold water over a person struck.

Sunstroke and Heat Prostration—In sunstroke there is a slow and full pulse, labored breathing, a dry and hot skin, red face and unconsciousness. Remove the patient to a dry and shady place, loosen his collar, necktie, and any tight clothing. Raise the head and upper part of the body. Pour cold water over the head and face, and if very hot rub the body with pieces of ice.

In heat prostration there is a pale face, clammy skin, shallow breathing, weak and rapid pulse, no unconsciousness. Give cold water to drink. Place the patient flat on his back and loosen his clothing.

Apply heat to the surface of the body and extremities. Bathe the face with warm water, into which a little alcohol has been poured.

In prostration from drinking too much ice water when overheated, loosen the patient's clothing, place him on his back with his head slightly elevated. Give hot drinks, apply heat to the spine and the extremities. Do not give alcoholic stimulants. Tea, coffee or warm milk may be used.

In exhaustion from heat due to hard work and confinement in a close, hot atmosphere, cover the body with blankets and apply heat to the extremities. Send for a doctor as soon as possible.

Stings of Venomous Insects, Etc.—Apply weak ammonia, oil, salt water, or iodine.

Frost Bite—Carry the patient to a closed room without fire and undress him carefully. Rub the frozen parts, or the whole body with snow or bits of ice, or put the patient in a cold bath, vigorously rubbing the surface affected. Give warm coffee or tea as a stimulant.

If the person has ceased breathing, use artificial respiration. When the patient revives, carry him to a room slightly warmer, and cover loosely with a blanket. Afterward, with a cloth wet in warm water rub the patient. Give beef tea, ordinary tea or milk as stimulants.

Mad Dog or Snake Bite—Tiee rubber ligature or a cord around the arm or the lg a short distance, above the bite. Enlarge the tooth punctures by cutting into them at least as deep as they are. Make two cuts over each, crossing one another. Suck the blood away, provided there are not cuts or fresh abrasions on the lips or in the mouth. If possible, wash the wounds and bathe them in a solution of permanganate of potash crystals. In the case of snake bite, inject snake anti-toxin, preferably into the skin of the abdomen. If weakness and giddiness develop, inject strychnine in the same way. Whiskey or brandy may be used in an emergency. Give a cathartic. Keep the wound clean and dress it with antiseptic gauze. In the case of bite by a mad dog the Pasteur serum should be administered as soon as possible by a physician.

COAL MINE GASES.

(By F. C. Bennett, in C. F. & I. Industrial Bulletin.)

Fire Damp is the most commonly known coal mine gas. It is an explosive mixture of Methane (Carbureted Hydrogen) and air. Methane is composed of one volume of carbon united with four volumes of hydrogen.

Methane is odorless, colorless, tasteless and non-explosive in its pure state, but when it is supplied with oxygen from the air it burns with a blue flame and is explosive when the mixture carries from 5 to 13 volumes of air to one volume of gas, the most violet explosion occurring when the mixture is 9½ volumes of air to one volume of methane.

Methane gas is formed by the decay of vegetable matter under water, and is also known as Marsh Gas. Bubbles seen in swamps and stagnant pools is methane escaping. It is not poisonous, but will not support life, as it contains no oxygen. Due to its lightness (about half as heavy as air) it accumulates in the high points of the mine workings, and the remedy is to force air through the workings to dilute the mixture below the ignition point.

Black Damp is the term used by miners to describe the condition of the mine air when it contains a sufficient quantity of Carbon Dioxide to extinguish or dim a light. Carbon Dioxide is 1½ times the weight of air, and settles at the lower points of the working places in the mines. It is colorless, with a slight acid taste and smell. It will not burn or support combustion and is not poisonous, but has a suffocating effect.

Carbon Dioxide is given off from the coal itself, also from the breathing of men and mules, but when found in large quantities in the mine it is usually the result of a mine explosion or mine fire. When found under ordinary conditions in the mine it is in the poorly ventilated sections. If a person locked himself up in an air-tight room, thus shutting off ventilation, black damp would be formed, as the air we exhale contains about four per cent carbon dioxide.

White Damp is the term given to the mine air when it contains Carbon Monoxide, the most treacherous gas of all. It is colorless, odorless, has about the same weight as air, and will explode when mixed with the proper amount of air; it is not found in mines in sufficient quantities to cause an explosion.

The danger in connection with Carbon Monoxide is due to the fact that it is extremely poisonous. When the air we breathe contains as much as one-half of one per cent of Carbon Monoxide, death results in a short time. The blood absorbs this poisonous gas a great deal faster than it absorbs oxygen. Carbon Monoxide is rarely found in coal mines, but is usually present following mine fires or explosions, and some times results from powder blasting where the combustion has not been complete.

This is the gas that has killed so many automobile owners who had started their engine in a small closed garage.

Stink Damp describes the condition of the mine air when it contains a sufficient amount of Hydrogen Sulphide to smell like rotten eggs. Hydrogen Sulphide is more poisonous than Carbon Monoxide, one-tenth of one per cent causing death; however, on account of the rotten egg smell, it is very easy to detect a very slight trace of it, and for this reason it is not so dangerous.

It is rarely detected in coal mines, but when found it is generally the result of decomposition of sulphur balls, in the presence of water, in abandoned areas of the mine where the temperature is higher.

After Damp is the general term given to the mine atmosphere following an explosion. It does not refer to any particular gas, but is a mixture of gases which varies according to the conditions of the explosion. In all cases, however, After Damp contains practically no oxygen and will not support life. It is largely Carbon Dioxide (Black Damp) and usually carries enough Carbon Monoxide (White Damp) to make it dangerous.

Dust Explosions. Coal mine explosions are not always due to an explosive mixture of gas; in fact, they are practically always aggravated or increased in force by coal dust. In the operation of a coal mine fine particles of coal dust are picked up by the air and deposited throughout the mine, forming a thin layer of pulverized dust.

If a small body of gas happens to be ignited, the force of this explosion will stir up the dust and throw it into suspension in the air. When this condition exists the dust is highly explosive and is ignited by the gas explosion. In this manner a small gas explosion may be the origin of an explosion which is carried throughout the entire mine.

Various safety measures are used to combat the danger of a dust explosion, such as keeping the mine well sprinkled and the dust wet. Another method is to spray rock dust throughout the mine in such proportions as to make the dust mixture non-explosive.

Anthracite dust is non-explosive; dust from semi-anthracite is not very dangerous; but the dust from the high grade bituminous coals of southern Colorado, especially the coking coal fields, is highly explosive under favorable conditions.

COMMON STAINS AND HOW TO REMOVE THEM.

Blood and meat juice. Use cold water; soap and cold water; or starch paste.

Chocolate and cocoa. Use borax and cold water.

Coffee and tea. (Clear.) Use boiling water; bleach if necessary. (With cream.) Use cold water, then boiling water, bleach if necessary.

Cream and milk. Use cold water, soap.

Fruit and fruit juices. Use boiling water; bleach.

Grass. Use cold water; soap and cold water; alcohol; or a bleaching agent.

Grease and oils. Use French chalk, blotting paper or other absorbent; or warm water and soap; or gasoline, benzine, or carbon tetrachloride.

Iodine. Use warm water and soap; alcohol; or ammonia.

Ink. Try cold water; then use an acid or bleach.

Iron. Use oxalic acid; hydrochloric acid; salts of lemon; or lemon juice and salt.

Kerosene. Use warm water and soap.

Lampblack and soot. Use kerosene, benzine, chloroform, ether, gasoline, or carbon tetrachloride.

Mildew. If fresh, use cold water; otherwise try to bleach with potassium permanganate.

Paint and varnish. Use alcohol, carbon tetrachloride, chloroform, or turpentine.

Perspiration. Use soap and warm water; bleach in the sun or with Javelle water or potassium permanganate.

Pitch, tar, and wheel grease. Rub with fat; then use soap and warm water; or benzine, gasoline, or carbon tetrachloride.

Scorch. Bleach in the sunshine.

Shoe polish. (Black.) Use soap and water; or turpentine. (Tan.) Use alcohol.

Stove polish. Use cold water and soap; or kerosene, benzine, or gasoline.

Vaseline. Use kerosene or turpentine.

Water. Steam or sponge the entire surface.

Wax. Scrape off as much as possible. Use French chalk, blotting paper or other absorbent with a warm iron; or use benzine or gasoline.

THE BRAIN OF FOSSIL MAN.

(From London Correspondence of the Journal of the Amer. Medical Assoc.)

Lecturing on the human brain at the Royal College of Surgeons, Sir Arthur Keith said that perhaps the most fruitful inquiry into the history of man's brain was provided by the fossilized skulls of extinct races. It was fortunate that a skull retained a more or less perfect impress of the brain.

Hence a cast showed the size, shape and many of the convolutionary markings of a brain which had passed into dissolution half a million years ago.

The best representative of an early stage of human evolution was *Pithecanthropus*—the fossil man of Java.

Could he speak?

Speech was not a matter of tongue or voice, but of brain; it was possible only when the brain became big enough and sufficiently elaborate to understand and remember what was seen and heard, to formulate thoughts, to make plans and to obtain conscious control over the muscles of the larynx, tongue and lips.

Had the brain of *Pithecanthropus* reached such a stage?

The cast taken from the skull indicated that speech was just becoming possible—primitive emotional speech. The brain of *Pithecanthropus* weighed about 30 ounces, the minimum compatible with human speech.

When the brain fell below 30 ounces it was incapable of conscious thought and speech. It was when a child's brain passed about the 30 ounce standard that it began to acquire speech. The faculty of speech involved cooperation of almost the whole of the brain's convolutions. In *Pithecanthropus* the essential parts of the brain could be identified.

Where it lacked was in the areas of association—the parts of which had undergone so great an expansion in the later stages of man's evolution, the seat of his higher mental activities. Various stages in the expansion of the association areas could be traced on brain casts taken from the fossil skulls, and also on the brains of the more backward of living races.

We could apply the "cast" method to the study of the brains not only of fossil man but also of famous men and women. In this way anatomists came to know about the brains of Sir Thomas Browne, Dean Swift, and many others.

There was, however, one difficulty. The brain might become "blanketed" by the cerebrospinal fluid, so that it no longer left a sharp impression of its convolutions on the skull. Certain parts of the brain were always blanketed, so that their convolutions could not be deciphered, but as a rule the larger part was clear and made sharp impressions on the skull.

Fortunately, in the skulls of primitive races, the essential convolutions were usually uncovered and left sharp impressions.

Men showed more variations in the weight and volume of their brains than in any other part. Nature seemed to be careless as to the amount of brain given, and in many cases she showed that men with small brains succeeded just as well as, or even better than, those with larger brains.

Some of the extinct races were large brained. Parts of the brain had been destroyed by accident or disease or removed by operation and yet in many cases no ultimate deterioration in ability had been observed.

Had man come by a bigger brain than he needed? How had he come by it? It could hardly be as a result of use, for human beings rarely used their abilities up to 50 per cent of their capacity. One could not conceive that mere use, through an infinity of generations, could convert an ape's brain into that of man.

Apes were not given to thinking.

Only one line of reasoning threw light on this curious problem—the overcapitalization of the human brain. Engineers in building bridges planned them to withstand a strain ten times that which was likely to fall on them (a "factor of safety").

All the organs and parts of living animals possessed a large factor of safety. Only athletes, and these for the briefest of spells, used their hearts and lungs to near the limit of safety; most of the time they utilized only from 10 to 15 per cent of their power.

Only once or twice in a lifetime did a man exert all the power of his muscles; the power lay latent awaiting an emergency which perhaps came only once in fifty generations. The same principle applied to man's brain; it had an enormous factor of safety.

This factor had made it possible for beings designed originally for a jungle life to come to have abilities of transcendent power.

DO TIGERS AND LEOPARDS HUNT BY SCENT?

(Brig. Gen. R. G. Burton, in the London Times.)

Mr. Hugh Copley, in the Journal of the Bombay Natural History Society, describes how five lions lay down within 20 yards of him without discovering his presence, and on another occasion a lion passed within 30 yards of where he was smoking, and did not observe him.

So much for Africa. My information on the subject is scanty, and I have no knowledge of hunting in that country; the question whether the African lion hunts by scent may be left to those who have that knowledge.

I have, however, considerable experience in hunting the great carnivora, exclusive of the lion, in India. My observations lead to the conclusion that tigers and leopards hunt almost exclusively by sight and sound, and that they possess very limited powers of scent.

I have never found it necessary to take precautions relating to the direction of the wind when hunting these animals, and I have on many occasions been in close proximity to tigers without their detecting my presence until they were disturbed by sight or sound.

They have displayed no sign of appreciating my presence by scent; I have taken off my boots and stalked within fifteen yards of a tigress which remained ignorant of my proximity until disturbed by a bullet.

The tiger is quick to detect the slightest movement, although slow to distinguish a stationary object. One stared at me for some moments with unseeing eyes at a distance of not more than thirty yards, until warned of the presence of danger by a movement.

I have walked right on to a slightly wounded tiger, which was lying down but did not detect my silent approach until I came within view at a distance of a few feet, when the tiger raised its head and recognition seemed to blaze into its eyes.

Frequently driven tigers, coming with slow and leisured tread, have passed close to me without betraying any sign of scenting danger, although quick to hear it and to see movement.

It is because these animals hunt by sight and not by scent that I have always made it a practice to picket the young buffaloes that served as bait in an open space, and not under cover or in dense jungle. I have on frequent occasions known a tiger pass within twenty yards and less of a picketed buffalo and fail to observe it either by sight or scent because the buffalo was lying motionless and asleep.

That its immunity was not due to suspicion or lack of hunger or desire to kill on the part of the tiger was evident from the fact that other animals picketed a few hundred yards farther on were immediately killed and preyed upon.

Hunters who have been in the habit of sitting in ambush in a tree or on the ground have always taken precautions against betrayal by sight or sound, but have generally ignored the question of scent, and have even found it unnecessary to refrain from smoking.

The same observations have been made with regard to leopards. It might be urged that these animals have become familiar with the scent of human beings, and therefore indifferent to it, from their habit of prowling in the neighborhood of villages in search of stray calves, goats, and dogs, but I have observed the same lack of power of smell in the unsophisticated leopards inhabiting remoter jungles.

I have smelt a leopard which I nearly trod upon, but the animal showed no signs of having scented me, and I have shot them at close quarters when they were unaware of my presence. One came at night to the carcass of a calf and set to work on its midnight feast within six feet of where I sat behind a screen of branches.

It stood up with its forepaws on the carcass, and stared at my ambush while I could see its jaws masticating the flesh; but it bent down again to resume the feast.

I have sat on a bullock-cart in company with a hunting leopard whose eyes were covered with a leathern hood. We drove up to within thirty yards of herds of antelope on several occasions, but the leopard showed no knowledge of their presence until the hood was removed, when it saw the antelope and sprang from the cart to give chase as the herd galloped off.

The tiger seeks prey along jungle paths or at waterholes, or lies in wait in some thick cover on the tracks frequented by game, whose approach is detected by the sound of their footfall or by sight when they come near.

SOME FAMOUS OLD PEOPLE OF 1929.

At what age is one to be classed as "old?"

Five centuries ago a man was called old at fifty. In the nineteenth century few under sixty would admit that they were old. With so many hale and hearty men well on in years to-day, it seems well to keep the limit set by the Psalmist of threescore years and ten in offering this list, by no means exhaustive, of famous old people of 1929. The age at the last birthday is given and the list is made up as of Sept. 1, 1929.

102—George Dessaulies, Canadian Senator.

100—John R. Voorhis, President of the Board of Elections, New York.

96—Prof. William F. Warren, former President of Boston University; William Watts Folwell, President Emeritus University of Minnesota.

95—James Brown Herreshoff, yacht builder, inventor.

94—Mrs. William H. Felton of Georgia, first woman to be appointed United States Senator.

93—Cardinal Vincenzo Vannutelli; Mme. Juliette Adam, French author; Dr. Georg A. Schweinfurth, scientist; J. Warren Keifer, former Speaker, only surviving Major-General of Civil War.

92—Dr. William Keen, surgeon and scientist.

91—Emile Loubet, President of the French Republic, 1899-1906; Gen. Valeriano Weyler, Spanish commander in Cuba in war of 1898; David A. Boody, former Mayor of Brooklyn, financier; Mme. Cosima Wagner.

90—John D. Rockefeller, founder of the Standard Oil Co.; William P. Clyde, steamship owner; Henry Phipps, philanthropist; Prince Saionji, last of the Japanese genro; Brig. Gen. J. Fred Pierson, Civil War soldier.

89—George F. Baker, banker, New York; Admiral of the Fleet Sir Edward H. Seymour, O. M.

88—Oliver Wendell Holmes, U. S. Supreme Court Justice; Georges Clemenceau, former Premier of France; Sir Edward George Clarke, British lawyer; Viscount Eiichi Shibusawa, capitalist.

87—Rev. Dr. Charles H. Parkhurst, Presbyterian minister; Prof. Ferdinand E. Buisson, Nobel peace prize winner.

86—Lord Trevathin, former Lord Chief Justice of England; Dr. F. L. Patton, former President of Princeton University; Cardinal Lucon, Archbishop of Rheims.

85—George Haven Putnam, New York publisher; Major Gen. A. W. Greely, U. S. A. Signal Service (retired), Arctic explorer; Francis E. Warren, U. S. Senator, Wyoming; Robert Bridges, poet-laureate of England; T. P. O'Connor, M. P., Irish journalist; Rear Admiral C. M. Chester, U. S. N. (retired); Charles P. Taft, editor; Capt. Robert Dollar, Shipping; Rev. Dr. George Alexander, Presbyterian Minister, educator.

84—Elihu Root, former Secretary of State; Rear Admiral William H. Brownson, U. S. N. (retired); Field Marshal Lord Methuen; J. Ranken Towse, dramatic critic; Harvey W. Wiley, chemist; Leopold Auer, violinist and teacher; Mrs. Thomas Whiffen, actress; Sir Horace Plunkett; Irish publicist.

83—The Earl of Harewood, father-in-law of Princess Mary of Great Britain; Charles P. Scott, Editor of the Manchester (England) Guardian; George Saintsbury, English critic; Count Albert Apponyi, Hungarian statesman; Edward Dean Adams, engineer, harnessed Niagara; Gen. Alexander von Kluck, German war commander.

82—Thomas A. Edison, inventor; Arthur Shelbourne Hardy, author, diplomatist; the Marquis of Aberdeen, English statesman; Annie Besant, theosophist; Field Marshal Paul von Hindenburg, President of the German Reich; Prof. John Bates Clark, economist.

81—Louis C. Tiffany, artist; Nat. G. Herreshoff, yacht builder, inventor; Vladimir de Pachmann, pianist; Nathan Straus, merchant, philanthropist; Leslie M. Shaw, former Secretary of the Treasury; the Earl of Balfour (Arthur J.), British statesman, former Premier; Rt. Rev. Dr. R. T. Davidson (Lord Davidson) former Archbishop of Canterbury; Rear Admiral W. W. Kimball, U. S. N. (retired); Robert W. De Forest, President Metropolitan Museum of Art; Lord Atholstan, Montreal editor; Princess Louise (Duchess of Argyll), daughter of Queen Victoria; Admiral Count Togo, defeated Russians in Japanese war; Charles DeKay; author, critic; August Heckscher, philanthropist.

80—Rear Admiral Seaton Schroeder, U. S. N. (retired); the Duke of Wellington; Prof. Edward S. Dana, scientist, educator; Austen G. Fox, lawyer; Lord Stamfordham, private secretary to King George V.; Field Marshal August von Mackensen, German General; Grand Admiral Alfred von Tirpitz, former head of the German Navy; Col. Robert W. Thompson, financier, President American Olympic Committee; Adolph Lewisohn, banker, philanthropist; Thomas B. Clarke, art collector; Dr. I. P. Pavloff, Russian scientist.

79—Cyrus H. K. Curtis, journalist; Dr. Thomas G. Masaryk, President of Czechoslovakia; the Duke of Connaught; Augustine Birrell, British statesman, author; Lord Shaw, English jurist; Dr. David Jayne Hill, former Ambassador, educator; Rose Coughlan, actress; Sir Thomas Lipton, merchant, yachtsman; Daniel C. Beard, artist, boy scout executive; Dr. William Lawrence, P. E. Bishop of Massachusetts; Gustav Lindenthal, bridge builder; Daniel Chester French, artist; Sir Basil Zaharoff; Dr. William H. Welch, pathologist; Henry W. Cannon, banker.

78—Dr. Felix Adler, lecturer, educator; Count George Noble Plunkett, Irish publicist; Richard Henry Dana, lawyer; Dr. David Starr Jordan, President Emeritus of Leland Stanford Jr. University; Fred Warde, actor; Sir Oliver Lodge, scientist.

77—Marshal J. J. C. Joffre, hero of the Marne; Edwin Markham, poet; Paul Bourget, French author; Lieut. Gen. the Earl of Dundonald, fought in Boer War; Rev. Dr. Henry van Dyke, author, diplomatist; George Foster Peabody, New York banker, publicist; George Moore, author; Timothy Cole, engraver; Emma Albani, D. B. E., singer; John Bach McMaster, historian; Melvil Dewey, librarian; Robert Grant, author; Pietro Cardinal Gasparri, papal Secretary of State; Rev. Dr. Henry Pereira Mendez, New York rabbi; D. Hipolito Irigoyen, President of Argentina; F. H. Gillette, Senator from Massachusetts.

76—Sir Hall Caine, novelist; David Belasco; Elihu Thomson, electrician; John F. Stevens, engineer; Will H. Low, artist; Maj. Gen. Hugh L. Scott, soldier, authority on Indians; Dr. A. A. Michaelson, scientist; Sir J. Forbes-Robertson, actor.

75—Dr. Adolph Lorenz, surgeon; George Eastman, head of Kodak Company and philanthropist; Charles F. Thwing, educator; Sir Robert Borden, Canadian statesman; Francis Wilson, actor; Rear Admiral Bradley A. Fiske, U. S. N.; Prof. Albert Bushnell Hart, historian; Sir William Flinders Petrie, Egyptologist; Gen. Tasker H. Bliss, U. S. Army (retired); John Sharp Williams, former Senator from Mississippi; Gabriel Hanotaux, French statesman, historian.

74—John Hays Hammond, mining engineer; Marshal Hubert Lyautey, soldier-builder of North Africa; John Philip Sousa, musician; J. J. Jusserand, Ambassador of France to U. S. for 22 years; Timothy M. Healy, ex-Governor-General of the Irish Free State; Andrew W. Mellon, Secretary of the Treasury; John Barton Payne, Chairman American Red Cross; Rear Admiral W. S. Benson, Dr. William T. Hornaday, zoologist; Sir Arthur W. Pinero, dramatist; Viscount Knutsford, English philanthropist.

73—William J. Henderson, author, musical critic; Dr. Arthur Twining Hadley, President-Emeritus of Yale; Henry Morganthau, diplomatist; Marshal H. P. Petain, commander of French Army at Verdun; Marshal Franchet d'Esperey, commander of allied armies in Near East; Prof. Sigmund Freud, psychoanalyst; George Bernard Shaw, author, dramatist; Dr. George F. Kunz, gem expert; Wilberford Eames, bibliographer.

72—Pope Pius XI; A. Lawrence Lowell, President of Harvard University; Sir E. A. T. Budge Wallis, Egyptologist; Princess Beatrice of Battenberg, daughter of Queen Victoria; Frank B Kellogg, ex-Secet'y of State; Louis D. Brandeis, Supreme CourtJustice; Prof. H Fairfield Osborn, paleontoiogist; Augustus Thomas, playwright; Lt. Gen. Robert, Lord Baden-Powell, founder of Boy Scouts; Earl of Lonsdale, sportsman; Sir Edward Elgar, composer; Rt. Rev. Dr. J. G. Murray, presiding bishop of the P. E. church.

71—Gustav V, King of Sweden; Dr. Michael Hainisch, President of Austria; Col. E. M. House, publicist; G. W. Wickersham, former Attorney-General; Adolph H. Ochs, newspaper proprietor; Samuel Untermeyer, lawyer; Former President William H. Taft, chief-justice of the U. S. Supreme Court; Queen Dowager Emma of the Netherlands.

70—Henri Bergson, French philosopher, Nobel prize winner; Raymond Poincaire, war president of the French Republic, former premier; William II, former German Emperor; Rev. Dr. W. H. P. Faunce, former president of Brown University; Miss Selma Lagerof, Swedish novelist, Nobel prize winner; Knut Hamsun, Norwegian novelist, Nobel prize winner; William Travers Jerome, former New York district attorney; Nathaniel L. Britton, botanist.

ABBREVIATIONS IN COMMON USE.

A1	First Rate (at Lloyd's)
A. A. G.	Assistant-Adjutant-General
A. B.	Bachelor of Arts; able-bodied seaman
A. B. C. F. M.	American Board of Commissioners for Foreign Missions
Abp.	Archbishop
A. C.	Ante Christum (before Christ)
A. D.	Anno Domini
A. D. C.	Ade-de-camp
Adj.	Adjutant
ad lib.	ad libitum (at discretion)
Adm.	Admiral
Advt.	Advertisement
Aet., Aetat.	Aetatis (aged)
A. E. F.	American Expeditionary Force
A. I. A.	American Institute of Architecture
A. I. M. E.	American Institute of Mining Engineers
A. M.	Ante Meridian (before mid-day); Anno Mundi (in the year of the world); Master of Arts
A. N. A.	Associate National Academician
Anzac	Australian and New Zealand Army Corps
A. O. H.	Ancient Order of Hibernians
A. P.	Associated Press
A. Q. M. G.	Assistant-Quartermaster-General
A. R. A.	Associate of the Royal Academy
A. U. C.	Anno urbis conditae (from the foundation of the city) (Rome)
B. A.	Bachelor of Arts
B. Arch.	Bachelor of Architecture
Bart., Bt.	Baronet
Batt., Batn.	Battalion
B. C.	Before Christ; British Columbia
B. C. L.	Bachelor of Civil Law
B. D.	Bachelor of Divinity
B. E.	Bachelor of Engineering
B. Litt.	Bachelor of Letters
B. LL.	Bachelor of Laws
B. M. A.	British Medical Association
B. Mus.	Bachelor of Music
Bp.	Bishop
Brig.	Brigade; Brigadier
B. S.	Bachelor of Surgery
B. Sc.	Bachelor of Science
B. Th.	Bachelor of Theology
B. V. M.	Blessed Virgin Mary
C., Cent.	Centigrade
C. A.	Chartered Accountant
Cantab.	Of Cambridge University
Cantuar.	Of Canterbury (Abp's sig.)
Capt.	Captain
Cav.	Cavalry
C. B.	Companion of the Bath
C. B. E.	Commander Order of the British Empire
C. E.	Civil Engineer
cf.	Compare
C. G.	Commissary General; Consul General
C. H.	Companion of Honour (Eng.); Court House
Chem. E.	Chemical Engineer
Chap.	Chaplain
C. I. E.	Companion of the Indian Empire
C. J.	Chief Justice
C. M. G.	Companion of St. Michael and St. George
C. O.	Commanding Officer
C. O. D.	Cash on Delivery
Col.	Colony; Colonel
Coll.	College; Collegiate
Comdg.	Commanding
Comdt.	Commandant
Com.-in.Chf.	Commander-in-Chief
Comm.	Commander
Comr.	Commissioner
Corp.	Corporal; Corporation
C. S. I.	Companion of the Star of India
C. SS. R.	Congregation of the Most Holy Redeemer (Redemptorist Order)
C. V. O.	Commander of the Royal Victorian Order
cwt.	hundredweight
D, Dem.	Democratic
D. B. E.	Dame Commander Order of the British Empire
D. C. L.	Doctor of Civil Law
D. C. T.	Doctor of Christian Theology
D. D.	Doctor of Divinity
D. D. S.	Doctor of Dental Surgery
deg.	Degree
del.	(L. delineavit) he drew
dele.	(L. deleatur) delete
D. Eng.	Doctor of Engineering
D. F. C.	Distinguished Flying Cross
D. G.	(Dei Gratia), by the grace of God
Ditto, do.	The same
D. L.	Deputy-Lieutenant
D.Litt., D.Lit.	Doctor of Literature
D. O. M.	Deo Optimo Maximo (To God the Best and Greatest)
Dom.	Dominus
Dr.	Doctor; Debtor
dr.	Drachm
D. Sc.	Doctor of Science
D. S. M.	Distinguished Service Medal
D. S. O.	Distinguished Service Order
d. s. p.	died without issue
D. Th.	Doctor of Theology
D. V.	(L. Deo volente), God willing
dwt.	Pennyweight
12mo.	Duodecimo (folded in 12)
Ebor.	(Eboracensis) of York (Abp's sig.)
Eccl.	Ecclesiastical
Ed. D.	Doctor of Education
Ed. M.	Master of Education
E. E. & M. P.	Envoy Extraordinary and Minister Plenipotentiary
e. g.	(L. exempli gratia), for example
Eng.	English
F., Fahr.	Fahrenheit
F. A. G. S.	Fellow of the American Geographical Society
F. A. M.	Free and Accepted Masons
F. B. A.	Fellow of the British Academy
F. G. S.	Fellow of the Geological Society
F. M.	Field-Marshal
Fo.	Folio (a sheet of paper folded once)
f. o. b.	Free on board
Fr.	French
F. R. A. M.	Fellow of the Royal Academy of Music
F. R. A. S.	Fellow of the Royal Astronomical Society
F. R. C. P.	Fellow of the Royal College of Physicians
F. R. C. S.	Fellow of the Royal College of Surgeons
F. R. G. S.	Fellow of the Royal Geographical Society
F. R. I. B. A.	Fellow of the Royal Institute of British Architects
Frl.	Fraulein (Miss) (Ger.)
F. R. S.	Fellow of the Royal Society
F. S. A.	Fellow of the Society of Antiquaries
F. Z. A.	Fellow of the Zoological Academy
F. Z. S.	Fellow of the Zoological Society
G. A. R.	Grand Army of the Republic
G. B. E.	Knight or Dame Grand Cross Order of the British Empire
G. C. B.	Knight Grand Cross of the Bath
G. C. I. E.	Knight Grand Commander of the Indian Empire
G. C. M. G.	Knight Grand Cross of St. Michael and St. George
G. C. S. I.	Knight Grand Commander of the Star of India
G. C. V. O.	Knight Grand Cross of Royal Victorian Order
Gen.	General
gen.	genus—kind
Ger.	German
Gr.	Greek
G. O. C.	General Officer Commanding
Gov.	Governor
Govt.	Government
G. P. O.	General Post Office
H. B. M.	His Britannic Majesty
H. E.	His Excellency; His Eminence
H. H.	His (or Her) Highness; His Holiness
H. I. H.	His (or Her) Imperial Highness
H. I. M.	His (or Her) Imperial Majesty
H. M. S.	His Majesty's Ship
h. p.	horse-power
H. Q.	Headquarters
H. R. H.	His (or Her) Royal Highness
H. S. H.	His (or Her) Serene Highness
Ib., Ibid.	Ibidem (in the same place)
i. e.	id est (that is)
ign.	ignotus (unknown)
I. H. S.	Jesus Hominum Salvator (Jesus the Saviour of Men), more correctly IHS, the first three letters in the name of Jesus in Greek
incog.	Incognito (in secret)
Insp.	Inspector
Inst.	Instant; Institute
I. O. G. T.	International Order of Good Templars
I. O. O. F.	Independent Order of Oddfellows
I O U	I owe you
Ital., It.	Italian
ital.	italics
I. W. W.	Industrial Workers of the World
J., JJ.	Judge; Judges
J. P.	Justice of the Peace
K. B.	Knight of the Bath (seldom used); Knight Bachelor, King's Bench
K. B. E.	Knight Commander of the British Empire
K. C.	King's Counsel; Knights of Columbus
K. C. B.	Knight Commander of the Bath

K. C. I. E.	Knight Commander of the Indian Empire
K. C. M. G.	Knight Commander of St. Michael and St. George
K. C. S. I.	Knight Commander of the Star of India
K. C. V. O.	Knight Commander of the Royal Victorian Order
K. G.	Knight of the Garter
kil.	Kilometre
kilo.	Kilogramme
K. K. K.	Ku Klux Klan
K. P.	Knight of St. Patrick
K. T.	Knight of the Thistle
Kt., Knt.	Knight
Lat.	Latin
lat.	latitude
lb.	pounds (weight)
L. C. C.	London County Council
L. C. J.	Lord Chief Justice
L. H. D.	(Literarum Humaniorum Doctor) Doctor of Literature
Lic. Med.	Licentiate in Medicine (Eng.)
Lit. D.	Doctor of Literature
Litt. D.	Doctor of Letters
LL. B.	Bachelor of Laws
LL. D.	Doctor of Laws
LL. M.	Master of Laws
log.	logarithm
long.	longitude

M. A.	Master of Arts
Maj.-Gen.	Major-General
Marq.	Marquis
Math.	Mathematics; Mathematical
M. B.	Bachelor of Medicine
M. B. A.	Master of Business Administration
M. B. E.	Member of the Order of the British Empire
M. C.	Military Cross; Member of Congress
M. D.	Doctor of Medicine
mdse.	merchandise
M. E.	Mining Engineer; Mechanical Engineer; Methodist Episcopal
Med.	Medical
M. Eng.	Master of Engineering
M. F.	Master of Forestry
Mgr.	Monsignor
Mlle.	Mademoiselle (Miss)
Mme.	Madame
Most Rev.	Most Reverend (of an Archbishop)
M. P.	Member of Parliament
M. S.	Master of Surgery
MS., MSS	Manuscript, Manuscripts
M. Sc.	Master of Science
Mus. B.	Bachelor of Music
Mus. D.	Doctor of Music
M. V. O.	Member of the Royal Victorian Order
M. W.	Most Worshipped
N. A.	National Academician
N. B.	L. Nota Bene, notice
N. C. O.	Non-Commissioned Officer
n. d.	no date
nem. con.	Nemine contradicente (no one contradicting); unanimously
net, nett	(It.) Netto (free from all deductions)
non seq	Non sequitur (it does not follow)
N. S.	New Style in the Calendar; National Society
O. B. E.	Officer Order of the British Empire
obit	obitur (he died)
O. F. M.	Order of Friars Minor
O. H. M. S.	On His Majesty's Service
O. K.	"All Correct" (slang)
O. M.	Order of Merit
O. M. I.	Oblate of Mary Immaculate
O. P.	Ordinis Praedicatorum—of the Order of Preachers (Dominican Ecclesiastical Title)
o. p.	opposite prompter
O. S.	Old Style in the Calendar (in Great Britain before 1752)
O. S. B.	Order of St. Benedict
O. S. F.	Franciscan (Capuchin) Order
oz.	Ounces
8vo	Octavo (folded in eight)
P. C.	Privy Councillor; Police Constable
p. c.	per centum (by the hundred); post card
Ph. B.	Bachelor of Philosophy
Ph. D.	Doctor of Philosophy
Phil.	Philosophical
Phys.	Physical
pinx.	(He) painted it
P. M.	Post Meridiem (after mid-day); Postmaster
P. M. G.	Postmaster-General
P. O.	Post Office; Postal Order
Pop.	Population
P. P.	Parish Priest
Pp.	Pages
P. P. C.	(Fr.) Pour prendre conge (to take leave)
P. R.	Prize ring (The)
Pres.	President
Prof.	Professor
Pro tem.	Pro tempore (for the time being)
Prov.	Provost; Provisional
Prox.	Proximo (next)
P. S.	Postscriptum (postscript); prompt side
pt.	Pint
Pte.	Private (soldier)
P. T. O.	Please turn over
Q. C.	Queen's Counsel
Q. E. D.	Quod erat demonstrandum (which was to be demonstrated), applied to a theorem
Q. E. F.	Quod erat faciendum (which was to be done); applied to a problem
Q. M. G.	Quartermaster-General
q. v.	quod vide (which see)
R., Rep.	Republican
R. A.	Royal Academician; Royal Artillery
R. A. F.	Royal Air Force
R. A. M. C.	Royal Army Medical Corps
R. Art.	Royal Artillery
R. A. S.	Royal Astronomical, or Asiatic, Society
R. B. S.	Royal Society of British Sculptors
R. C.	Roman Catholic
R. E.	Royal Engineers
Rear-Adm.	Rear-Admiral
Regt.	Regiment
R. F. A.	Royal Field Artillery
R. G. A.	Royal Garrison Artillery
R. H. A.	Royal Horse Artillery
R. H. G.	Royal Horse Guards
R. I.	Royal Institute of Painters in Water Colours
R. I. B. A.	Royal Institute of British Architects
R. I. P.	Requiescat in pace (May he or she rest in peace)
R. M.	Royal Marines; Resident Magistrate
R. M. A.	Royal Marine Artillery
R. M. L. I.	Royal Marine Light Infantry
R. N.	Royal Navy
R. N. R.	Royal Naval Reserve
R. N. V. R.	Royal Naval Volunteer Reserve
R. O. T. C.	Reserve Officers Training Corps
R. S. V. P.	Fr. Repondez s'il vous plat (Please answer)
Rt. Hon.	Right Honourable (Member of British Privy Council)
Rt. Rev.	Right Reverend
R. Y. S.	Royal Yacht Squadron
S. A. S.	Fellow of the Society of Antiquaries (U. S.)
Sc. B.	Bachelor of Science
Sc. D.	Doctor of Science
Sc. M.	Master of Science
scr.	scruple
sculps.	sculpsit (he engraved)
S. J.	Society of Jesus (Jesuits)
s. p.	sine prole (without issue)
S. P. C. A.	Society for the Prevention of Cruelty to Animals
S. P. Q. R.	Senatus Populusque Romanus (The Senate and People of Rome)
SS.	Steamship; Saints
S. S. M.	Society of the Sacred Mission
St.	Street; Saint
S. T. D.	Doctor of Sacred Theology
stet.	let it stand
T. N. T.	Trinitrotoluene
T. R. H.	Their Royal Highnesses
Temp.	Temperature; Temporary
tr.	transpose
U. K.	United Kingdom
ult.	Ultimo (last)
Univ.	University
U. S. A.	United States of America; Union of South Africa; United States Army
U. S. N.	United States Navy
U. S. P.	United States Pharmacopoeia
v., vid.	Vide (see)
V. C.	Victoria Cross
Ven.	Venerable (of an Archdeacon)
Vet.	Veterinary

Weights and Measures

THE METRIC SYSTEM.

(Data by the Bureau of Standards, Department of Commerce.)

UNITS OF WEIGHT AND MEASURE.

The fundamental units of the metric system are the meter—the unit of length, and the kilogram—the unit of mass.

The liter is defined as the volume of a kilogram of water at the temperature of its maximum density, 4° centigrade. All other units are the decimal subdivisions or multiples of these. These three units are simply related. For example, for all practical purposes 1 cubic decimeter equals 1 liter and 1 liter of water weighs 1 kilogram.

The metric tables are formed by combining the words "meter," "gram," and "liter" with the six numberical prefixed, as in the following:

Prefixes. Meaning.		Units.	Prefixes. Meaning.		Units.
milli- = *one-thousandth*...	.001		deka- = *ten*.....	10	
centi- = *one-hundredth*...	.01	"meter" *for length*	hecto- = *one hundred*.....	100	"liter" *for capacity.*
deci- = *one-tenth*.....	.1	"gram" *for weight*	kilo- = *one thousand*....	1000	
.....*Unit* = *one*.....	1.	*or mass.*			

METRIC CONVERSION.

Millimeters × .03937 = inches.
Millimeters ÷ 25.4 = inches.
Centimeters × .3937 = inches.
Centimeters ÷ 2.54 = inches.
Meters × 39.37 = inches.
Meters × 3.28 = feet.
Meters × 1.094 = yards.
Kilometers × .621 = miles.
Kilometers ÷ 1.6093 = miles.
Kilometers × 3280.8 = feet.
Square millimeters × .00155 = square inches.
Square millimeters ÷ 645 = square inches.
Square centimeters × .155 = square inches.
Square centimeters ÷ 6.45 = square inches.
Square meters × 10.764 = square feet.
Square kilometers × 247.1 = acres.
Square kilometers × .3861 = square miles.
Hectares × 2.471 = acres.
Hectares × .003861 = square miles.
Cubic centimeters ÷ 16.387 = cubic inches.
Cubic centimeters ÷ 3.70 = fluid drams (U. S. P.).
Cubic centimeters ÷ 29.57 = fluid ounces (U. S. P.).
Cubic meters × 35.314 = cubic feet.
Cubic meters × 1.308 = cubic yards.
Cubic meters × 264.2 = gallons (231 cubic inches).
Litres × 61.025 = cubic inches.
Litres × 33.81 = fluid ounces (U. S. P.).
Litres × .2642 = gallons (231 cubic inches).
Litres ÷ 3.785 = gallons (231 cubic inches).
Litres ÷ 28.317 = cubic feet.
Hectoliters × 3.53 = cubic feet.
Hectoliters × 2.84 = bushels (2150.42 cubic inches).
Hectoliters × .131 = cubic yards.
Hectoliters ÷ 26.42 = gallons (231 cubic inches).
Grammes × 15.432 = grains.
Grammes (water) ÷ 29.57 = fluid ounces.
Grammes ÷ 28.35 = ounces avoirdupois.
Grammes per cubic centimeter ÷ 27.7 = pounds per cubic inch.
Joule × .7376 = foot pounds.

Kilograms × 2.2046 = pounds.
Kilograms × 35.3 = ounces avoirdupois.
Kilograms ÷ 907.18 = short tons (2,000 pounds).
Kilograms per square centimeter × 14.223 = pounds per square inch.
Kilogram meters × 7.233 = foot pounds.
Kilo per meter × .672 = pounds per foot.
Kilo per cubic meter × .062 = pounds per cubic foot.
Kilo per cheval × 2.235 = pounds per horse power.
Kilowatts × 1.34 = horse power (33,000 foot pounds per minute).
Watts ÷ 746 = horse power.
1 Watt = .00134 horse power = 44.3 foot pounds per minute.
Calories × 3.968 = B. T. U. (British Thermal Unit).
Cheval vapeur × 0.986 = horse power.
Centigrade × 1.8 + 32 = degrees Fahrenheit.
Gravity, International Standard 980.665 centimeters per second.

Note.—*Joule:* C. G. S. unit of both mechanical and electrical energy. Equivalent to work done or heat generated in keeping up for one second a current of one ampere against a resistance of one ohm, or in raising the potential of one coulomb by one volt. Equal to 10,000,000 ergs or .73756 foot pound.

Calorie—One of two recognized units of heat, of which the greater calorie is amount of heat necessary to raise one kilogram of water 1° C.; the lesser or small calorie being the amount of heat necessary to raise one gram of water 1° C.

The U. S. Bureau of Standards advocates use of "Kilocalorie" and "calorie," respectively, for the greater and lesser calorie.

Foot pound, horse power, and cheval or cheval vapeur, as generally defined, vary from place to place by ½% because of variations in the intensity of gravity. The relations given here are for the international standard gravity, which gives an acceleration of 980.665 c m per second.

Units of Length.

Fundamental Units:

A meter (m) is a unit of length equivalent to the distance between the defining lines of the international prototype meter at the International Bureau of Weights and Measures when this standard is at the temperature of melting ice (0° C.)

A yard (yd.) is a unit of length equivalent to 91.44 centimeters.

Multiples and submultiples:

1 kilometer = 1000 meters.
1 hectometer = 100 meters.
1 dekameter = 10 meters.
1 decimeter = 0.1 meter.
1 centimeter = 0.01 meter.
1 millimeter = 0.001 meter = 0.1 centimeter.
1 micron = 0.000001 meter = 0.001 millimeter.

1 millimicron = 0.000000001 meter = 0.001 micron.
1 foot = 1-3 yard = 30.48 centimeters.
1 inch = 1-36 yard = 1-12 foot = 2.54 centimeters.
1 link = 0.22 yard = 7.92 inches.
1 rod = 5½ yards = 16½ feet.
1 chain = 22 yards = 100 links = 66 feet = 4 rods.
1 furlong = 220 yards = 40 rods = 10 chains.
1 statute mile = 1760 yards = 5280 feet = 320 rods = 1609 meters.
1 hand = 4 inches.
1 point = 1-72 inch.
1 fathom = 6 feet.
1 span = 9 inches = 1-8 fathom.
1 nautical mile { United States = 6080.20 feet. = 1.151553 statute miles.
1 sea mile
1 geographical mile { = 1853.249 meters.

Units of Area.

Fundamental Units:

A square meter is a unit of area equivalent to the area of a square the sides of which are 1 meter.

A square yard is a unit of area equivalent to the area of a square the sides of which are 1 yard.

Multiples and Submultiples:

1 square kilometer = 1,000,000 square meters.
1 hectare or square hectometer = 10,000 square meters.
1 are or square dekameter = 100 square meters.
1 centare = 1 square meter.
1 square decimeter = 0.01 square meter.
1 square centimeter = 0.0001 square meter.

1 square millimeter = 0.000001; 1 square meter = 0.01 square centimeter.
1 square foot = 1-9 square yard.
1 square inch = 1-1296 square yard = 1-144 square foot.
1 square link = 0.0484 square yard = 62.7264 square inches.
1 square rod = 30.25 square yards = 272.25 square feet = 625 square links.
1 square chain = 484 square yards = 16 square rods = 100,000 square links.
1 acre = 4840 square yards = 160 square rods = 10 square chains = .4047 hectare = 40.46 are.
1 square mile = 3,097,600 square yards = 640 acres = 259 hectares.

Units of Volume.

Fundamental Units:

A cubic meter is a unit of volume equivalent to a cube the edges of which are 1 meter.

A cubic yard is a unit of volume equivalent to a cube the edges of which are 1 yard.

Multiples and Submultiples:

1 cubic kilometer = 1,000,000,000 cubic meters.
1 cubic hectometer = 1,000,000 cubic meters.
1 cubic dekameter = 1,000 cubic meters.
1 stere = 1 cubic meter.
1 cubic decimeter = 0.001 cubic meter.
1 cubic centimeter = 0.000001 cubic meter = 0.001 cubic decimeter.
1 cubic millimeter = 0.000000001 cubic meter = 0.001 cubic centimeter.
1 cubic foot = 1-27 cubic yard.
1 cubic inch = 1-46656 cubic yard = 1-1728 cubic foot.
1 board foot = 144 cubic inches = 1-12 cubic foot.
1 cord = 128 cubic feet.

Units of Capacity.

Fundamental Units:

A liter is a unit of capacity equivalent to the volume occupied by the mass of 1 kilogram of pure water at its maximum density (at a temperature of 4° C, practically) and under the standard atmospheric pressure (of 760 mm). It is equivalent in volume to 1.000027 cubic decimeters.

A (U. S.) gallon is a unit of capacity equivalent to the volume of 231 cubic inches.

A (U. S.) bushel is a unit of capacity equivalent to the volume of 2150.42 cubic inches.

Multiples and Submultiples:

1 hectoliter = 100 liters.
1 dekaliter = 10 liters.
1 deciliter = 0.1 liter.
1 centiliter = 0.01 liter.
1 liquid quart = 1-4 gallon = 57.75 cubic inches.
1 liquid pint = 1-8 gallon = 1-2 liquid quart = 28.875 cubic inches = .528 liter.
1 gill = 1-32 gallon = 1-4 liquid pint = 7.21875 cubic inches.
1 fluid ounce = 1-128 gallon = 1-16 liquid pint.
1 fluid dram = 1-8 fluid ounce = 1-128 liquid pint.
1 minim = 1-60 fluid dram = 1-480 fluid ounce.
1 firkin = 9 gallons.
1 peck = 1-4 bushel = 537.605 cubic inches.
1 dry quart = 1-32 bushel = 1-8 peck = 67.200625 cubic inches.
1 dry pint = 1-64 bushel = 1-2 dry quart = 33.600-3125 cubic inches.
1 barrel (for fruit, vegetables and other dry commodities) = 7056 cubic inches = 105 dry quarts.

Units of Mass.

Fundamental Units:

A kilogram is a unit of mass equivalent to the mass of the international prototype kilogram at the International Bureau of Weights and Measures.

An avoirdupois pound is a unit of mass equivalent to 0.4535924277 kilogram.

A gram is a unit of mass equivalent to one-thousandth of the mass of the international prototype kilogram.

A troy pound is a unit of mass equivalent to 5760-7000 of that of the avoirdupois pound.

Multiples and Submultiples:

1 metric ton = 1000 kilograms.
1 hectogram = 100 grams = 0.1 kilogram.
1 dekagram = 10 grams = 0.01 kilogram.
1 decigram = 0.1 gram.
1 centigram = 0.01 gram.
1 milligram = 0.001 gram.
1 avoirdupois ounce = 1-16 avoirdupois pound.
1 avoirdupois dram = 1-256 avoirdupois pound = 1-16 avoirdupois ounce.
1 grain = 1-7000 avoirdupois pound = 10-4375 avoirdupois ounce = 1-5760 troy pound.
1 apothecaries' pound = 1 troy pound = 5760-7000 avoirdupois pound.
1 apothecaries' or troy ounce = 1-12 troy pound = 480-7000 avoirdupois pound = 480 grains.
1 apothecaries' dram = 1-96 apothecaries' pound = 1-8 apothecaries' ounce = 60 grains.
1 pennyweight = 1-20 troy ounce = 24 grains.
1 apothecaries' scruple = 1-3 apothecaries' dram = 20 grains.
1 metric carat = 200 milligrams = 0.2 gram.
1 short hundredweight = 100 avoirdupois pounds.
1 long hundredweight = 112 avoirdupois pounds.
1 short ton = 2000 avoirdupois pounds.
1 long ton = 2240 avoirdupois pounds.

DOUBLE CONVERSION TABLES FOR THE METRIC SYSTEM.

NOTE.—The central figures in **heavy type** represent either of the two columns beside them, as the case may be. *Examples:* One foot = 0.304801 meters; one meter = 3.28083 feet; one U. S. Mile = 1.609347 kilometers; one kilometer 0.621370 miles; one U. S. liquid quart = 0.94633 liters; one liter = 1.05671 U. S. liquid quarts; 1 pound avoirdupois = 0.4535924277 kilograms; one k logram = 2,204622341 pounds avoirdupois. The units are those of the United States Bureau of Standards.

HUMAN WEIGHTS AND MEASURES.

(By Arthur MacDonald, Anthropologist, Washington, D. C.)

	Grams.	Ounces.	Per C'nt		Grams.	Ounces.	Per C'nt		Grams.	Ounces.	Per C'nt
Brain...	1,400	49	2.37	Spleen..	170	6	0.346	Adrenals	10	0.35	0.014
Heart...	300	10	0.46	Liver...	1,600	57	2.75	Muscles.	30,000	1,050	43.09
Lungs...	1,175	41	2.0	Pancreas	200	7	0.346	Skeleton	11,500	400	15.35
Thymus gland.	5	0.13	0.0086	Kidneys.	300	10.5	0.44				

Per cent. means ratio to total body weight.

Every human death may be attributed to one of three causes: (1) Interference with respiration (asphyxia or apnea); (2) Interference with the heart's action (syncope), and (3) Interference with the nervous system (coma or shock). The number of distinct diseases producing death is limited.

The length of the humerus multiplied by 5.06, or the length of the femur multiplied by 3.66, equals the height of the man.

In height many may vary normally from 4 feet 1 inch to 6 feet 6¾ inches.

The extreme averages of different populations run from 4 feet 6 inches to 5 feet 10.5 inches.

The length of the trunk in man is more than one-third and less than two-fifths of the height.

From 11,000 brains weighed, Topinard finds an average weight of 1,361 grams for man and 1,290 grams for woman.

The gray substance represents 37 to 38 per cent. of the total weight of the brain.

Radium injected into the left arm of a normal person travels through the heart and lungs and reaches the right arm in from 15 to 22 seconds; but in disease may require 45 to 60 seconds to cover that course through the human system.

FOREIGN WEIGHTS AND MEASURES.

(Revised by the United States Bureau of Standards.)

Denominations.	Where Used.	American Equivalents.
Almude	Portugal	4.422 gals.
Ardeb	Egypt	5.6188 bu.

Wey	Scotland & Ireland	41.282 bu.

The *carat*, used as a gem unit, weighs over 3 grains (3.168), or 205 milligrams.
The *metric carat* of 200 milligrams is now very generally used. The word also is used to denote the proportion of alloy in a metal. Thus, pure gold is 24 carats fine.

ELECTRICAL UNITS.

The watt is the unit expressing electrical power as horsepower (hp) represents power in mechanics. It is equal to the product of the volts (pressure) times amperes (rate of flow). Thus, 2 volts times 2 amperes would give in a direct current circuit 4 watts. Electrical energy is sold at so much per watt hour or more generally at a given amount per kilowatt hour—which means 1,000 watt hours. This may represent 1 watt for 1,000 hours or 1,000 watts for 1 hour. 746 watts are equal to one horsepower or inversely 1 kilowatt (kw) is equal to about 1⅓ horsepower.

The horsepower represents the power required to lift a weight of 33,000 pounds 1 foot in 1 minute or 550 pounds 1 foot in 1 second.

The ohm is the unit of electrical resistance and represents the physical property of a conductor which offers a resistance to the flow of electricity, permitting just 1 ampere to flow at 1 volt of pressure. For example, 1,000 feet of copper wire of No. 10 B. and S. gauge has just 1 ohm of resistance and allows the flow of 1 ampere at 1 volt.

UNITED STATES WEIGHTS AND MEASURES.

Apothecaries' Weight: 20 grains = 1 scruple; 3 scruples = 1 dram; 8 drams = 1 ounce; 12 ounces = 1 pound.

Avoirdupois Weight (short ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 25 pounds = 1 quarter; 4 quarters = 1 cwt.; 20 cwt. = 1 ton.

Avoirdupois Weight (long ton): 27 11-32 grains = 1 dram; 16 drams = 1 ounce; 16 ounces = 1 pound; 112 pounds = 1 cwt.; 20 cwt. = 1 ton.

Troy Weight: 24 grains = 1 pennyweight; 20 pennyweights = 1 ounce; 12 ounces = 1 pound.

Circular Measure: 60 seconds = 1 minute; 60 minutes = 1 degree; 30 degrees = 1 sign; 12 signs = 1 circle or circumference.

Cubic Measure: 1,728 cubic inches = 1 cubic foot; 27 cubic feet = 1 cubic yard.

Dry Measure: 2 pints = 1 quart; 8 quarts = 1 peck; 4 pecks = 1 bushel.

Liquid Measure: 4 gills = 1 pint; 2 pints = 1 quart; 4 quarts = 1 gallon; 31½ gallons = 1 barrel; 2 barrels = 1 hogshead.

Long Measure: 12 inches = 1 foot; 3 feet = 1 yard; 5½ yards = 1 rod or pole; 40 rods = 1 furlong; 8 furlongs = 1 statute mile (1,760 yards or 5,280 feet); 3 miles = 1 league.

Mariners' Measure: 6 feet = 1 fathom; 120 fathoms = 1 cable length; 7½ cable lengths = 1 mile; 5,280 feet = 1 statute mile; 6,080.2 feet = 1 nautical mile.

Paper Measure: 24 sheets = 1 quire; 20 quires = 1 ream (480 sheets—now commonly 500); 2 reams = 1 bundle; 5 bundles = 1 bale.

Square Measure: 144 square inches = 1 square foot; 9 square feet = 1 square yard; 30¼ square yards = 1 square rod or perch; 40 square rods = 1 rood; 4 roods = 1 acre; 640 acres = 1 square mile; 36 square miles (6 miles square) = 1 township.

Time Measure: 60 seconds = 1 minute; 60 minutes = 1 hour; 24 hours = 1 day; 7 days = 1 week; 365 days = 1 year; 366 days = 1 leap year.

The Anglo Saxon acre was one furlong long and one chain wide.

One **Chain** (Engineers') = 100 ft.; = 6.0606 rods = 1.5151 *Chains* (Gunter's); = 0.01893 mile; = 30.4801 meters.

One **Link** (Gunter's) = 7.92 inches; = 0.66 ft.

175 troy pounds equal 144 avoirdupois pounds; 175 troy ounces equal 192 avoirdupois ounces.

KNOTS AND MILES.

The **U. S. and British Statute Mile** is 5,280 feet in length. On the Continent most of the old miles, which varied in length from about 3,300 feet to over 36,000 feet, have been replaced, officially at least, by the kilometre, which equals 0.62 statute mile or 3,280.8 feet.

The **Nautical** or **Sea Mile** at any place is considered, for purposes of navigation, to be equal to the length of one minute of latitude at that place. As the earth is not a perfect sphere the nautical mile varies with the latitude, and the arbitrary length adopted for the nautical mile is not the same in all countries.

The U. S. Nautical Mile is 6,080.27 feet in length and equal to one-sixtieth of a degree of a great circle of a sphere whose surface is equal in area to the area of the surface of the earth. The British Nautical Mile is 6,080 feet in length. The French, German and Austrian Nautical Mile is 6,076 feet in length.

The **Geographic Mile** is 6,087.1 feet in length and equal to one minute of longitude of the equator.

The **Knot** is a measure of speed; a speed of one knot being a speed of one nautical mile per hour.

A **Nautical Mile**—1.152 statute miles; a **Fathom**—6 feet; a **Cable**—0.1 nautical mile, or 608 feet; also, 120 fathoms or 720 feet.

To convert statute miles into nautical miles, multiply statute miles by 0.8684; to convert nautical miles into statute miles, multiply nautical miles by 1.1515.

STANDARD NEWSPAPER MEASURES.

Type is measured by the number of "points" in the height of the face thereof. A "point" is approximately one-seventy-second of an inch (actually .013837 inch). There are 996 "points" in 35 centimetres. Nonpareil type, the size generally used by newspapers, is a 6-point type, and therefore sets 12 lines to an inch, measuring up and down the column. Twenty-four lines of nonpareil type make what is commonly called a "stick." There are usually ten "sticks" of type in a newspaper column. The smallest type in ordinary use is ruby, which is 3½ points in height. Diamond type is 4 or 4½ points; pearl, 5 points; agate, 5½ points; nonpareil, 6 points; minion, 7 points; brevier, 8 points; bourgeois, 9 points; long primer, 10 points; small pica, 11 points; pica, 12 points; English, 14 points; great primer, 18 points. The news columns in The World are almost 2 and three-sixteenths inches wide, equal to 12½ "picas" or pica M-quads. Each size of type has its own M-quad, which is the square of the face of the capital M of that size of type. A quadrat, or quad, is the type without a letter on it, and is used in spacing between words and in filling out blank lines. The quad is usually of four sizes—N-quad, M-quad, 2M-quad, and 3M-quad.

ROMAN AND ARABIC NUMERALS.

I	1	VI	6	XI	11	XVI	16	XXX	30	LXXX	
II	2	VII	7	XII	12	XVII	17	XL	40	or XXC	80
III	3	VIII	8	XIII	13	XVIII	18	L	50	XC	90
IV	4	IX	9	XIV	14	XIX	19	LX	60	C	100
V	5	X	10	XV	15	XX	20	LXX	70	CC	200

CCC	300	DCCC	800				
CCCC	400	CM	900				
D	500	M or					
DC	600	cIc	1000				
DCC	700	MM	2000				

NOTE—A dash line over a numeral, multiplies the value by 1,000: thus, $\overline{X}$=10,000; $\overline{L}$=50,000; $\overline{C}$=100,000; $\overline{D}$=500,000; $\overline{M}$=1,000,000; $\overline{\text{CLIX}}$=159,000; $\overline{\text{DLIX}}$=559,000.

Other general rules in Roman numerals are as follows: (1), repeating a letter repeats its value—XX=20; CCC=300; (2), a letter placed after one of greater value adds thereto—VI=6; DC=600; (3), a letter placed before one of greater value subtracts therefrom—IV=4.

Arabic numerals are those now commonly in use—0, 1, 2, 3, 4, 5, 6, 7, 8, 9, etc.

MEDICAL SIGNS AND ABBREVIATIONS.

℞ (Lat. Recipe), take; āā, of each; ℔, pound; ʒ, ounce; ℥, drachm; ℈, scruple; ♏, minim, or drop; O or o, pint; f ʒ, fluid ounce; f ℥, fluid drachm; as, ʒ ss, half an ounce; ʒ i, one ounce; ʒ iss, one ounce and a half; ʒ ij, two ounces; gr., grain; Q. S., as much as sufficient; Ft. Mist., let a mixture be made; Ft. Haust., let a draught be made; Ad., add to; Ad lib., at pleasure; Aq., water; M., mix; Mac., macerate; Pulv., powder; Pil., pill; Solv., dissolve; St., let it stand; Sum., to be taken; D., dose; Dil., dilute; Filt., filter; Lot., a wash; Garg., a gargle; Hor. Decub., at bed time; Inject., injection; Gtt., drops; ss, one-half; Ess., essence.

UNITED STATES AND BRITISH WEIGHTS AND MEASURES COMPARED.

1 British Imperial bushel = 1.03205 U. S. (Winchester) bushel.
1 U. S. bushel = 0.96895 British Imperial bushel.
1 British quart = 1.03205 U. S. dry quarts.
1 U. S. dry quart = 0.96895 British quart.
1 British quart (or gallon) = 1.20094 U. S. liquid quarts (or gallons).
1 U. S. liquid quart (or gallon) = 0.83268 British quart (or gallon).

The British gallon, under the Act of 1878, is defined as the volume of 10 standard pounds of distilled water weighed in air against brass weights, both air and water at 62 degrees Fahrenheit with the barometer at 30 inches.

The British gallon contains 277.420 British cubic inches (277.418 U. S. cubic inches); and 8 gallons make 1 Imperial bushel 2219.36 British cubic inches (2219.34 U. S. cubic inches).

The difference between the British inch and the U. S. inch comes from the fact that the equivalents of the metre in terms of the British yard and the U. S. yard are slightly different, as follows:
1 British yard = 39.370113 inches.
1 U. S. yard = 39.37 inches.

ANCIENT GREEK AND ROMAN WEIGHTS AND MEASURES.

WEIGHTS.

Roman libra (pound) = 10 oz. 18 pwt. 13 5-7 gr., Troy.
Attic mina (pound) = 11 oz. 7 pwt. 16 2-7 gr., Troy.
Attic talent (60 minae) = 56 lbs. 11 oz. 0 pwt. 17 1-7 gr., Troy.

DRY MEASURE.

Roman modus = 1 peck 2-9 pint.
Attic choenix = 70 cu. in. = nearly 1⅛ pints.
medimnus = 3360 cu. in. = about 1½ bushels.

LIQUID MEASURE.

Attic cyathus = 2.9 cu. in. = nearly ⅛ gill.
Cotyle = 6 cyathus = 17.5 cu. in. = a little over ½ pint.
Chous = 12 cotyles = 210 cu. in. = .909 gall.

LONG MEASURE.

Roman foot = 11 3-5 inches.
Cubit = 17.4 inches.
Pace = 4 ft. 10 inches.
Furlong = 604 ft. 10 inches.
Mile = 4,835 feet.

LONG MEASURE.

Grecian cubit = 18.25 inches.
Furlong = 504 ft. 4 1-5 inches.
Mile = 4,030 feet.

MONEY

Roman quadrans = 1 1-10 mills.
As = 1 3-10 mills.
Sestertius = 2½ asses = 3.58 + cents
Sestertium = 1,000 sestertii = $35.80.
Denarius = 4 sestertii = 14.35 + cents
Aureus = $4.50.

Attic Obolus = 2.39 + cents.
Drachma (6 obols) = 14.35 + cents.
Mina (100 drachmae) = $14.35 +
Talent (60 minae) = $861.00.

The Greek stater weighed 134.75 grains avoirdupois and was worth $4; the Persian, $5.35. Each coin was of silver, composed of 20 drachmas, each drachma equal in value to 19½ cents, American money.

BIBLICAL WEIGHTS REDUCED TO TROY WEIGHT.

The Gerah, one-twentieth of a Shekel, 12 grains; the Bekah, half a Shekel, 5 pennyweight; the Shekel, 10 pennyweight; the Maneh, 60 Shekels, 2 lbs. 6 oz.; the Talent, 50 Manehs, or 3,000 Shekels, 125 lbs.

BUSHEL WEIGHTS IN POUNDS.

United States—Federal law for duties on imports—Apples (green or ripe), 50; barley, 48; corn (cracked), 56; corn (shelled), 56; flaxseed (linseed), 56; oats (hulled or unhulled), 32; peas, 60; rye, 56; wheat, 60.

Bushel weights (lbs.) under N. Y. State law—Barley, 48; beans, 60; bran, 20; buckwheat, 48; clover seed, 60; corn (shelled), 56; corn meal, 50; cottonseed (Sea Island), 44; cottonseed (upland), 30; flaxseed, 55; malt, 34; oats, 32; onions, 57; peas, 60; potatoes, 60; potatoes (sweet) 54; rye, 56; rye meal, 50; timothy seed, 45; wheat, 60; lime, 70; coarse salt, 70; fine salt, 56; carrots, 50; herds grass seed, 45; rough rice, 45; dried peaches, 33; dried apples, 25; bran or shorts, 20.

Dry measure in the United States is based on the old English Winchester bushel, containing 2,150.42 cubic inches, or 1.24 cubic feet; inside dimensions—18.5 inches diameter, 8 inches deep; the heap is to be in the form of a cone, as high as the commodity will admit without special effort or design. The United States Court of Customs Appeals decided in February, 1912, that a "bushel" under the tariff law means a *heaped* bushel, so far as apples are concerned, and that a *heaped* bushel should contain 2,747.715 cubic inches. Under this decision, a *heaped* bushel is 27.8 per cent. larger than a *struck* bushel. Heaped measure is used with bulky commodities, such as apples, pears, potatoes, onions, etc. In Maine and Texas, stricken measure is used.

A **bushel of coal** in Pennsylvania must contain 75 lbs. of anthracite, or 76 lbs. of bituminous, or 80 lbs. of stone coal.

The Standard Container Act of 1916 fixes standards for baskets and other containers for small fruits, berries, and vegetables of the following capacities: ½ pint, 1 pint, 1 quart or multiples of the quart, standard dry measure; and standards for Climax baskets for grapes and other fruits and vegetables of the following capacities: 2, 4, and 12 quart, standard dry measure.

The Standard Container Act of 1928 fixes standard hampers, round stave baskets, and splint baskets for fruits and vegetables. The standard hampers and round stave baskets shall be of the following capacities: ⅛, ¼, ½, ⅝, ¾, 1, 1¼, 1½, and 2 bushels.

The standard splint baskets shall be of the following capacities: 4, 8, 12, 16, 24 and 32 quart, standard dry measure.

For the purpose of this act a bushel, standard dry measure, has a capacity of 2,150.42 cu. in., and a quart, standard dry measure, has a capacity of 67.2 cu. in.

The U. S. standard barrel for fruits and vegetables (except cranberries) has a capacity of 7,065 cu. in.; the U. S. standard barrel for cranberries has a capacity of 5,826 cu. in.

States requiring sales by weight—Some States have laws requiring that all dry commodities be sold by weight, while others require that those for which a legal weight has been established be so sold. In the latter class when a unit of dry measure is called for, this must be determined by weight in accordance with the standard schedule of weight per bushel.

In Florida, Idaho, Indiana, Iowa, Kansas, Massachusetts, Michigan, Nebraska, Nevada, New Jersey, Ohio, Oregon, South Dakota, Tennessee, Utah, Virginia, Wisconsin and the District of Columbia, purchasers may demand that all orders be actually weighed before delivery and that full weight as specified in the State law be delivered.

States requiring definite weights—A number of States have statutes similar to each other in wording and apparently similar in legal effect, somewhat as follows: "The bushel shall consist of or will mean, a stated weight," sometimes with the qualification, "When sold by the bushel." This list includes: California, Delaware, Illinois, Kentucky, Minnesota, Missouri, Montana, New Hampshire, New Mexico, New York, North Dakota, Oklahoma, Pennsylvania, South Carolina, Texas, Vermont, West Virginia, Wyoming and the Territory of Hawaii.

In Alabama, Arkansas, Colorado, Connecticut, Georgia, Louisiana, Maine, Maryland and Rhode Island there is a legal or standard weight per bushel, without a provision for a special agreement clause.

In Mississippi and North Carolina there is a legal or standard weight but is binding only when the purchaser so specifies.

In Arizona and Washington there are no legal or standard bushel weights.

A cord of wood contains 128 cubic feet. The standard size of a piled cord of wood is 8 feet long, by 4 feet wide, by 4 feet high.

A board foot is 1 ft. x 1 ft. x 1 in.

Milk, at 68° Fahrenheit, weighs 8.60 lbs. a gallon, provided it contains 3 per cent of butter fat; cream, 8.37 lbs. a gallon, if it has in it 28 per cent of butter fat. When cream contains 40 per cent of fat it weighs 8.28 lbs. a gallon.

THE CHEMICAL ELEMENTS.

(Density figures show grams per cubic centimetre. Melting points are Centigrade.)

Hydrogen, one of the supposed *elements*, was shown, on Sep. 10, 1929, to exist in a double form—in reality two kinds, different as to melting and boiling points, heat conductivity, and spectra. The experiment was made at a meeting of the American Chemical Society, at Minneapolis.

Atomic weight is the weight of an atom of an element as compared with that of an atom of hydrogen.

To reduce *density* to pounds per cubic foot, multiply by 62.4.

RELATIVE HARDNESS OF THE ELEMENTS.

FACTORS AND PRIME NUMBERS.

Factors are such numbers as multiplied together will produce a required number; as 3 and 4, also 3, 2, and 2 are factors of 12; 3 and 15, also 5 and 9 are factors of 45.

A Prime Number is one that cannot be resolved into two or more factors; or, it is a number exactly divisible only by itself and unity; thus, 2, 3, 5, 7, 11, and 13, are prime numbers. 2 is the only even number that is prime.

A Composite Number is one that can be resolved into factors.

A Prime Factor is a prime number used as a factor.

To aid the pupil in determining the prime factors of a composite number we give the following

TABLE OF PRIME NUMBERS FROM 1 TO 1000.

1	41	101	167	239	313	397	467	569	643	733	823	911

INHERITANCE TAX ANNUITY TABLES.

VALUE OF AN ANNUITY OF ONE DOLLAR ON A SINGLE LIFE (WOLFE'S CALCULATIONS.)

To find the value of a life estate, find the annual income which is 5 per cent of the fair market value of the property so limited, and multiply it by the value of an annuity of $1.00 at the age of the life tenant at his nearest birthday at the time of decedent's death.

The remainder is found by deducting the value of the life estate from the market value of the property.

FIXED ANNUITY TABLE (LINCOLN'S CALCULATIONS.)

It is obvious that an annuity-certain or as it is sometimes called, an annuity for a fixed period of years, involves no mortality factor and the mortality tables cannot be used in determining their value, for the death of the holder of the annuity does not terminate it.

For the calculation of such annuities, therefore, a "Fixed Annuity Table" will be found below, giving the present value of an annuity of $1.00 for terms of years ranging from one year to eighty.

To find the value of an annuity for a fixed number of years, simply multiply the amount of the annual payment by the value of an annuity of $1.00 for the stated number of years as found in the table.

MULTIPLICATION AND DIVISION TABLE.

A figure in the top line (19) multiplied by a figure in the last column on the left (18) produces the figure where the top line and the side line meet (342), and so on.

A figure in the table (342) divided by the figure at the top of that column (19) results in the figure (18) at the extreme left; also, a figure in the table (342) divided by the figure (18) at the extreme left gives the figure (19) at the top of the column, and so on.

AREAS OF CIRCLES.

To find the circumference of a circle multiply the diameter by 3.14159265 (commonly expressed as 3.1416). To find the area of a circle multiply the square of the diameter by .785398 (usually expressed as .7854). To find the cubic contents of a cylinder or pipe, multiply the area by the height or depth. Thus, a pipe 1 foot in diameter and 1 foot in length contains .7854 cubic feet. To find how many gallons are contained in a pipe or cylinder, divide the cubic contents by 231, which is the number of cubic inches in a United States gallon.

CIRCLE AREAS IN EIGHTHS OF A UNIT.

A square is equal in area to a circle when the side of the square equals 0.88623 multiplied by the diameter of the circle; or when the diameter of the circle equals 1.12838 multiplied by the side of the square.

Any straight line extending from the centre of a circle to the circumference is called a *radius*.

FASTEST TRIPS AROUND THE WORLD.

1519 (Sept. 20)-1522 (Sept. 8), Magellan's ships sailed around the world from Seville, Spain, and back again; 1,083 days. One ship out of five returned to Seville, with 35 of 280 men surviving. Later 4 others got back. Magellan was killed in the Philippines.

1872 (Oct. 2-Dec. 20), a fictitious journey by Phileas Fogg in Jules Verne's novel; 80 days.

1889, by Nellie Bly, 72 days 6 hours 11 minutes.

1890, by George Francis Train of New York, in 67 days 12 hours 3 minutes.

1901, by Chief of Police Charles Fitzmorris of Chicago, in 60 days 13 hours 29 minutes.

1903, by J. Willis Sayre, of Seattle, Wash., in 54 days, 9 hours, 42 minutes.

1903, by Henry Frederick, 54 days 7 hours 2 minutes.

1907, by Col. Burnlay-Campbell, in 40 days 19 hours 30 minutes.

1911, by Andre Jaeger-Schmidt, 39 days 19 hours 42 minutes 38 seconds.

1913, by John H. Mears, 35 days 21 hours 36 minutes.

1924, by U. S. Army airplanes, in 175 days (14 days 15 hours of actual flying).

1926 (June 16, 1.30 A.M.-July 14, 4.06, 5 P.M.), by Edward S. Evans and Linton Wells for The World, in 28 days 14 hours 36 minutes 5 seconds. Their mileage was: by train and motor car, 4,100; by plane, 6,300; by steamer, 8,000.

1928 (June 29-July 22), John H. Mears and Capt. C. B. D. Collyer, circled the globe in 23 days, 15 hours, 21 minutes, 3 seconds. They left New York by seaplane and overtook the Olympic off Long Island. From Cherbourg, July 5, they flew by air across Europe and Asia, reaching Tokio on July 11. They got by steamer to Vancouver, B. C. on July 20 and flew thence to New York City.

1929, by Raffaele Maiullari, who left New York City on May 22, going east, and circled the globe, returning on June 25. His rival, Charles Olsen, left New York on June 7, going west, and got around and was back on July 17. A committee of the Bronx Chamber of Commerce fixed the elapsed time at—Maiullari, 34 days, 2 hours, 40 minutes; Olsen, 39 days, 19 hours.

1929, by the German dirigible balloon, Graf Zeppelin, in 21 days, 8 hours, 26 minutes, from Lakehurst to Lakehurst; *and in* 20 *days*, 4 *hours*, from Friedrichshafen to Friedrichshafen.

Following is the log, in Eastern Daylight Time, as reported by the Associated Press, on the voyage from Lakehurst to Lakehurst.

The Graf Zeppelin left Lakehurst on Sept. 1, at 8.18 A. M., and landed at Friedrichshafen on Sept. 4, at 3.52 A. M. That journey required 67 hours, 35 minutes.

Thursday, Aug. 8.

12:40 A. M.—Left Lakehurst, N. J., for Friedrichshafen.

Saturday, Aug. 10.

8:03 A. M.—Landed at Friedrichshafen, completing trip of 4,200 miles in 55 hours 23 minutes.

Wednesday, Aug. 14.

11:35 P. M.—Left Friedrichshafen for Tokio.

Monday, Aug. 19.

5:25 A. M.—Arrived over Tokio and landed at Kasumigaura Airport two hours later, completing 6,880 miles in 101 hours 50 minutes.

Friday, Aug. 23.

2:13 A. M.—Left Kasumigaura for Los Angeles.

12:00 Noon—Wirelessed position 1,500 miles east of Tokio, flying at altitude of 1,100 feet.

Saturday, Aug. 24.

8:00 A. M.—About 1,800 miles east-northeast of Tokio, Lat. 43.50 degrees N., Long. 174.10 degrees E.

10:00 P. M.—Most northerly point of Pacific flight, Lat. 46 degrees N., Long. 161 degrees W.

Sunday, Aug. 25.

2:25 A. M.—Lat. 45.30 degrees N., Long. 154 degrees W.

10:02—Sighted off San Francisco Bay.

Monday, Aug. 26.

9:11 A. M.—Landed at Los Angeles, completing flight of about 5,500 miles from Tokio in 78 hours 58 minutes.

Tuesday, Aug. 27.

4:14 A. M.—Left Los Angeles for Lakehurst, N. J 8:13 P. M.—Passed El Paso, Texas.

Wednesday, Aug. 28.

11:39 A. M.—Kansas City, Mo.; 6:25 P. M.—Chicago; 10:40 P. M.—Detroit.

Thursday, Aug. 29.

12:13 A. M.—Cleveland; 12-57 A. M.—Akron, Ohio; 1:56 A. M.—Newcastle, Pa.; 4:06 A. M.—Bellefonte, Pa.; 7:02 A. M.—Reached New York; 8:13 A. M.—Landed at Lakehurst, N. J.

TRADE ROUTES.

(By Jacques W. Redway in the N. Y. Sun.)

The great continental trails were creations of the Indian's predecessor, the bison. The bison required salt and the salt licks were many miles away from the grazing grounds. In their journeys to and from the salt licks herds of bisons sought the lowest passes across mountain ranges with unerring instinct.

The Indian took a lesson from the bison—and the iron horse now speeds over those same lines of the least lift against gravity discovered by the bison.

Parts of the Baltimore & Ohio, the Erie and the New York Central Railway lines follow old Indian trails that also were bison trails.

Not much about the character of the traffic over the Indian trails is definitely known.

A league of five strong tribes, the Iroquois Confederacy, was necessary to hold the strategic position in central New York, where continental trails from the east, south and west converged.

Portage paths were an echo of the shortage of furs required to keep humanity in Europe warm. The North American fur region was opened to traffic when the fur region of China had become well-nigh exhausted.

Indian trappers and European collectors transported their catches by canoe up stream to the head of navigation. From that point canoe and contents were carried to the headwaters of a stream flowing in an opposite direction.

Fort Stanwix, now the city of Rome, N. Y., was built to defend the portage path between Wood Creek and the Mohawk River. This portage connected canoe routes leading north and west with those pointing eastward. Almost within a stone's throw of old Fort Stanwix are now the terminals of two railways and the junction of two canals.

Another portage path had a great future. Up the Mississippi to the Illinois and up the Illinois to the Des Plaines, and up the Des Plaines almost in sight of Lake Michigan the fur catch from the lower country was paddled.

Then a very short portage—the shortest of all routes—to Chicago River and Lake Michigan marked the beginning of the end of a long journey from the heart of one continent to the heart of another.

Fort Dearborn was built to guard this portage path from marauders, and Fort Dearborn became the city of Chicago.

When the huntsman of the Stone Age discovered that jade would take a better cutting edge than could be imparted to flint, jade was imported from the Gobi in central Asia, and jade held supreme place as a cutting tool until in turn it was superseded by bronze. The traffic in jade created the beginning of a great trade route that continued up to the time of the Alexandrian conquest; then it gave way to less hazardous routes of trade.

The discovery of amber in the Baltic Sea region opened trade routes thereto as far back as the earlier Neolithic Age, and the amber found markets and buyers wherever there were human beings who loved ornaments. For a time amber was the principal article of traffic in the commerce of Europe.

The discovery of copper and tin in Cornwall, England, quickly led to the alloying of the two metals to make bronze; it made also an end to the later Stone Age, for tools of stone could not compare in usefulness with those of metal. As a result existing trade routes were greatly extended in all directions in order to fill the demand.

A very important traffic in salt grew into existence during the Bronze Age. The salt mines in the vicinity of Hallstatt, Salzberg, and Krakauvin, old Austria, furnished the article that passed over local trade routes in central Europe; indeed, for a time, salt was the most important factor of commerce.

The commerce of Europe began with the Neolithic trails that are comparable to the old Indian trails. They came into being for the same cause. In the creation of them they followed the same geographic principle.

As a rule they kept to the river valleys; they forced mountain ranges at the lowest passes, always seeking the least lift against gravity. There were portage paths between rivers flowing in opposite directions, and those of chief importance are now canals.

Traffic routes of the Bronze Age, internal or marine are parts of the traffic systems of today.

DIAMONDS AND OTHER PRECIOUS STONES.

The South African diamond fields were discovered, near Kimberley, in 1866, when a child picked up a stone weighing 21¼ carats, which was sold in the rough for $2,500. In 1868, a Hottentot negro found a diamond of 83½ carats. He sold it for $2,000 to a dealer who got $56,000 therefor. This stone has been valued since, at $125,000, and is the famous Star of South Africa, in the collection of the Earl of Dudley, of England.

Since 1866 the South African fields have yielded diamonds of the total value of $1,375,000,000.

The sale of diamonds is controlled by a syndicate working in agreement with the producing mines It is said the world market will not absorb more than $60,000,000 of diamonds each year, and the problem of governing output increases as the world source of supply becomes more widely spread. There was a time when the Union produced over ninety per cent of the world production, but in recent years new fields have been discovered in non-British parts of Africa and in South America. But the Union of South Africa has increased production in the last few years and still controls the world market.

The largest diamond ever found was the Cullinan, in 1905, in South Africa—3,024¾ carats, or about 1¾ pounds. The stone was bought in 1907 by the Transvaal Government and presented to King Edward. It was cut up, and is added to the collection of crown jewels in the Tower of London.

The diamond, says Charles Sprague, Jr., is found under many diverse conditions. The most important sources are in pipes or dykes known as "kimberlite," consisting of three organically different layers of earth.

The first is the oxidized yellow ground ranging from 35 to 140 feet below the surface; then the hydrated blue ground, commonly known as diamondiferous earth; lastly, the well preserved "hardenbank," dating back to prevolcanic days.

Then, the ancient conglomerates of the auriferous Witwatersrand. Next, the extensive river deposits in the basins of the Vaal, Harts, Orange and Kasai Rivers. The stones found in these basins have been washed down from the higher ground through countless centuries. The alluvial diamonds found in the river basins have, as a rule, been larger in size and of better quality than in the dry diggings.

The recovery of diamonds from the yellow ground is a simple process, but the treatment of blue ground presents difficulties owing to the greater density. The rock from the open mines is hauled in cable cars to the summit of an incline plane where it is emptied down a chute into the jaws of a gyratory crusher. It is then broken up between rollers two inches from each other.

The cutting of diamonds is a minutely careful process. Formerly the jewelers of Amsterdam solely performed this operation, but an increasingly large part is now being done in Kimberley, Johannesburg and Pretoria. The diamond is embedded in soft lead or babbit metal and held in an arm-like vise against a revolving friction disc treated with fine particles of sand. All the facies are ground in this manner under microscopic inspection.

Among other famous diamonds from South African fields is the largest of the Kimberley diamonds, 442 carats; and the largest stone from the De Beers mines, weighing 503 carats. This latter stone was found imperfect and it was necessary to cut it down to 228½ carats. The Porter-Rhodes diamond, while weighing less, 152 carats, is of greater value, estimated at more than $300,000.

$32,250,000 IN JEWELS BURIED WITH CHINESE EMPRESS.

The following is an official account of the jewels buried with China's last manchu Empress, the Dowager Tzuttsi, at Pekin, and looted in August, 1928, by Chang Tso's soldiers when they evacuated and fled to the north.

For her to rest on: a mattress of gold thread embroidered with pearls; over that a silk coverlet strewn with a layer of pearls; over this, lace with pearls woven into a figure of Buddha; at her head and feet jade carved as lotus leaves.

On her robe were strung pearls on gold thread; her jacket was embroidered with these gems from Eastern fisheries, and a rope of them circled her body nine times.

Eighteen pearl images of Buddha were laid by her arms. A chaplet of pearls was set on her head. Gold, jade and gem Buddhas, 108 of them, were laid by her side; 200 gems carved as peaches, pears, apricots, dates and three melons of jade were placed at her feet.

A gem portraying a growing lotus was at her left side; on her right was a coral tree. Interstices in the coffin were filled level with pearls and gems, a pearl network was over all.

One gem ornament of 8 galloping horses, another of 18 holy men of Buddha were contributed by "a certain prince" and tucked under the coverlet.

The appraiser's total of $32,250,000 did not include the 8 galloping horses, each carved from a separate gem, all different in color, nor the 18 holy men chiseled of various precious stones.

The Empress' tomb cost $4,000,000.

PERSIAN ROYAL GEMS.

A committee of French and Dutch jewelers, appointed by Riza Kahn, in 1929, has valued the Persian royal gems at $170,000,000. not including the Darya-i-Noor (Sea of Light) diamond, which the experts say is beyond price.

There are 10 lbs. of pearls, 12 lbs. of rubies, and 13 lbs. of emeralds, the largest valued at $175,000.

The Peacock Throne, taken from Delhi, India, is set down at $50,000,000.

The Shah's string of pearls worn at the Durbars, is estimated to be worth $250,000.

BIRTH STONES.

Month.	Ancient.	Modern.	Month.	Ancient.	Modern.	Month.	Ancient.	Modern.
Jan.	Garnet	Hyacinth	May	Agate	Emerald	Sept.	Chrysolite	Beryl
Feb.	Amethyst	Amethyst	June	Emerald	Agate	October	Aquamarine	Pearl
March	Jasper	Bloodstone	July	Onyx	Ruby	Nov.	Topaz	Topaz
Apr.	Sapphire	Diamond	Aug.	Carnelian	Topaz	Dec.	Ruby	Bloodstone

The National Wholesale Jewelers Association in convention at Providence, R. I., in June, 1927, urged that Chinese jade be substituted for topaz as the birth stone for November.

The *garnet* is credited with endowing the wearer with constancy and fidelity; the *amethyst* betokens sincerity; *bloodstone*, or *aquamarine*, courage and truthfulness; *diamond*, innocence; *emerald*, happiness; *pearl*, or *moonstone*, health and long life; *ruby*, a contented mind; *sardonyx*, or *peridot*, felicity; *sapphire*, wisdom; *opal*, or *tourmaline*, hope. *topaz*, fidelity; *turquoise*, or *lapis lazuli*, prosperity and success.

In the calendar year 1928, imports of diamonds into the United States were as follows (values in parenthesis)—rough, uncut, 291,302 carats ($11,935,-191); cut but not set, 440,437 carats, ($42.396,162); glaziers', engravers', and miners' stones, 38,342 carats ($2,756,895).

In 1928, pearls and parts, not strung or set, were imported to the value of $7,163,905.

Diamonds valued at $4,000,000,000 are worn in this country.

Cathode-ray tubes are used to detect synthetic, or imitation, gems, particularly diamonds and sapphires. The cathode-ray is faster than the x-ray.

The Turf.

(Years lacking in these tables indicate no race in those years. *Time* is expressed in minutes and seconds. *Value* means the winner's share of the purse.)

A *mile* is 5,280 feet, or 1,760 yards. A *furlong* is one-eighth of a mile, or 660 feet, or 220 yards.

BELMONT PARK.

THE FUTURITY STAKES (2-YEAR-OLDS).

THE FIRST INTERNATIONAL HORSE RACE—APRIL 25, 1829.

(From the London Times of Tuesday, April 28, that year.)

The long-talked-of match between Rattler, the American horse, and Miss Turner, the Welsh mare, for 400 sovereigns, was decided on Saturday, over ten miles of ground, between Cambridge and Godmanchester, commencing at the second milestone from Cambridge.

This was the first occasion on which the merits of Rattler had been brought into action in this country, although he had won all his matches in America.

The fame of Tom Thumb, his brother traveller from New York, who recently trotted 100 miles in little more than ten hours, had placed Rattler so high in the scale of excellence, however, that few persons could be found to bet against him.

By the articles it was stipulated that the mare should have a minute's start.

The mare was ridden by little Davy, in a jockey silk cap and jacket, boots and spurs.

Shortly after 12, all being in readiness, the road was cleared, and at a given signal the mare was started at a pace of at least 20 miles an hour.

A clear minute having elapsed, Rattler, who was all activity and impatience, as if perfectly conscious of the struggle he was about to be engaged in, was then let go, and almost instantaneously laid himself down to his work with extraordinary speed.

At the close of the tenth mile the horse was fully 60 yards in front, having completed the distance in thirty minutes and forty seconds.

POLO.

1929 National Indoor Matches.

Open—Brooklyn Riding and Driving—C. Pflug, J. Smith, W. Sackman.

Class A Optimists—R. Guest, W. Guest, S. Iglehart.

Class B Princeton—W. B. Duryea, A. B. Borden, W. Post.

TROTTING AND PACING ON THE ICE.

At Clayton, New York, in February, 1929, U. O. Webb. of Edwards, N. Y., drove his horse, Northern Baron, a mile over the ice in 2.08¾—an unofficial world record.

At Saranac Lake, on Feb. 22, George E., a 6-year-old pacer owned by Jack Gardner, Springfield, Mass., equaled the ice track official record by racing the final heat of the 2:19 trot and pace staged by the Saranac Lake Driving Club in 2:14¼.

Gardner, after taking two straight heats with George E., drove his horse around the first lap in 1:07 and was clocked in 2:14¼, crossing under the wire on the last lap. George E. left the other starters, Hal Boy and Alexander B., in the rear. They finished in the order named.

GRAND PRIX DE PARIS WINNERS—1 MILE 7 FURLONGS.

The Grand Prix de Paris is for 3-year-olds of all countries. The race dates from 1863. It is run at the Longchamps course, near Paris. The value of the purse in 1928 was $30,400, at current exchange.

Hotweed, winner of the 1929 Grand Prix de Paris, won, also, the 1929 French Derby.

Other 1929 winners in France were—*Christmas Handicap*, at Vincennes, Amazone; *Grand Prix de Nice*, at Nice, La Fleur; *Prix du Jockey Club* (French derby), at Chantilly, Hotweed; *Grand Hurdle*, at Auteuil, Largo; *Arc de Triomphe*, Teddy, at Longchamps, (650,000 francs.)

A brief but sensational career on the turf in Ireland and England was closed by Trigo on Sept. 18, 1929, when this three-year-old son of Bandford by Athasi captured the Irish St. Leger at the Curragh. Trigo, winner of the Epsom Derby and the St. Leger last week in England, has been retired to the stud.

Trigo won the Irish St. Leger by a short head from Visellus, with Aine Forest third, ten lengths back. The distance was a mile and three-quarters, as in the English classic, and ten ran. The race was worth about $9,000.

The Derby winner started an overwhelming favorite at 1 to 7.

Trigo closed his career on the same course he started as a two-year-old last year. His owner is W. Barnett, of Dublin.

The *Argentine Derby* (Grand Premier Nacional) at Buenos Aires, Oct. 13, 1929, (2,500 metres) was won by Lacio; 2.35 4-5.

Peruvian National Derby, 1 mile, 2 furlongs, won on Oct. 14, 1929, by Lucifer; 2.05.

HORSE RACING IN ENGLAND IN 1929.

Newmarket—*Two Thousand Guineas*, Mr. Jewks; *Two-Year Old Stakes*, Pepperminto; *One Thousand Guineas*, Taj Mah; *Jockey Club Stakes*, Cyclonic: The *Cesarewitch*, West Wicklow. *Cambridgeshire Stakes*, Doule Life.

Ascot—*Royal Hunt Cup*, Songe; *Ascot Gold Cup*, Inversbin; *Prince of Wales Stakes*, Lyme Regis (owned by King George); *Ascot Stakes*, Old Orkney.

Epsom—*Oaks Stakes*, Pennycomequick; *Coronation Cup Stakes*, Reigh Count (American horse).

Doncaster—*St. Leger Stakes*, Trigo (1929 Derby Winner); *Doncaster Cup*, Athford (brother of Trigo).

Lincoln—*Lincolnshire Handicap*, Elton.

Liverpool—(Aintree) *Spring Cup*, Adieu; *Grand National Steeplechase*, Gregalach.

ENGLISH EPSOM DERBY STAKES WINNERS.

(For 3-year-olds, colts and fillies; weight-for-age; colts, 126 pounds; fillies, 121 pounds; distance originally 1 mile, then 1 mile and 4 furlongs and 29 yards; about 1½ miles in 1921 and since.)

1928	Felstead	Sir Hugo C. Owen	H. Wragg
1929	Trigo	William Barnett	J. Marshall

* Dead heat; stakes divided.

Record time—2.34 2-5, over the new course, in 1927, by Call Boy, and in 1928 by Felstead, a son of Spion Kop; record over the older course, 2.34 4-5, in 1920, by Spion Cop. In 1922, Captain Cuttle ran the new course in 2.34 3-5.

Steve Donoghue won the Derby 6 times.

The 1929 Epsom Derby was run in 2:36 2-5. The purse was $73,000, of which the winner got $57,000. Trigo was a 33 to 1 bet. There were 26 starters in the race. Walter Gay, owned by Lord Woolavington, a 100 to 8 bet, was second; Brienz, at 50 to 1, was third. Cragadour, the favorite before the race, finished in the ruck.

The 1929 Calcutta Sweepstake, with three prizes totaling £135,000, or about $657,045 each; the London Stock Exchange, with two first prizes of £125,000, or about $608,375 each, and the Baltic Sweep, in which first money totaled nearly £100,000, or about $486,700, were the big pools.

EQUINE HIGH JUMPING,

The record breaking high jump of 8 ft. 13-16 in., made by Mrs. Stuyvesant Peabody's Great Heart at the South Shore Country Club, Chicago, June 8, 1923, draws attention again to this interesting feature of equine effort. When it is considered that the average height of a jumper is 16 hands, a leap of more than thirty inches higher, handicapped by the weight of saddle and rider, constitutes a feat not equaled in human competition. The eight greatest high jumpers of record have been Filemaker, Heatherbloom, Confidence, The Wasp, Hercules, Ironsides, Skyscraper, and Great Heart. Confidence held the record of 8 ft. 1-2 in. made at Ottawa, in 1912, for a little more than a decade, only to have it eclipsed by five-sixteenths of an inch during the past season.

Confidence duplicated this jump at Syracuse, N. Y., in 1916 with Dick Donnelly up, as was the case at Ottawa. Prior to Great Heart's jump this was the best on record for a public competition, although Heatherbloom is credited with clearing 8 ft. 2 in. in a practice jump before numerous witnesses and there are reports of 8 ft. 3 in. jumps made abroad.

---

*Against time. †Paced by runner to sulky carrying a wind or dust shield, the runner preceding the racer.

BASEBALL.

The first baseball diamond was laid out in 1839, at Cooperstown, N. Y., by General Abner Doubleday

The World Series baseball contest in 1929 was between the Philadelphia Athletics (American League), and the Chicago Cubs (National League).

The Athletics won 4 out of the 5 games—first (3-1); 2nd (9-3); 4th (10-8); 5th (3-2).
The Cubs won only the third game—3 to 1.

OOMPOSITE SCORE OF THE FIVE GAMES.

Philadelphia Athletics

In the 1929 Davis Cup Challenge Round, France defeated the United States 3 matches to 2.

The scores—July 26—Henri Cochet (F.) defeated Wm. Tilden (U. S.) 6-3, 6-1, 6-2; Jean Borotra (F.) defeated George Lott (U. S.) 6-1, 3-6, 6-4, 7-5; July 27—John Van Ryn and William Allison (U. S.) defeated Cochet and Borotra (F.) 6-1, 8-6, 6-4; July 28—Tilden (U. S.) defeated Borotra (F.) 4-6, 6-1, 6-4, 7-5; Cochet (F.) defeated Lott (U. S.) 6-1, 3-6, 6-0, 6-3.

Pre-Challenge Rounds—European Zone—*First:* Austria, 2; Czechoslovakia, 3; Belgium, 3; Roumania, 0; Denmark, 3; Chili, 0; Greece, 3; Jugoslavia, 1; Hungary, 3; Norway, 2; Monaco, 3; Switzerland, 2; Egypt, 4; Finland, 1; Holland over Portugal, by default.

Second: Germany, 3; Spain, 2; Italy, 5; Ireland, 0; Czechoslovakia, 4; Denmark, 1; Hungary, 3; Monaco, 2; Holland, 3; Egypt, 2; So. Africa, 5; Sweden, 0; Great Britain, 5; Poland, 0.

Third: Germany, 3; Italy, 2; Czechoslovakia, 4; Denmark, 1; Hungary, 3; Holland, 2; Great Britain, 3; So. Africa, 0.

Semi-final: Germany, 4; Czechoslovakia, 1; Great Britain, 3; Hungary, 2.

Final Germany, 3; Great Britain, 2.

In the American Zone the United States beat Canada, 5-0; then the United States beat Japan, 4-1, and Cuba beat Mexico, 4-1. The United States then beat Cuba, 5-0.

The United States team next beat Germany, 5-0, only to be beaten by France, 3-2, in the end.

English Championships—*Men's Singles*—Henri Cochet, France; *Men's Doubles*—Wilmer Allison and John Van Ryn, United States; *Women's Singles*—Miss Helen Wills, United States; *Women's Doubles*—Mrs. Phoebe Watson and Mrs. Peggy Saunders Michell, England; *Mixed Doubles*—Miss Helen Wills and Frank Hunter, United States.

French Championships—*Men's Singles*—Rene Lacoste, France; *Men's Doubles*—Rene Lacoste and Jean Borotra, France; *Women's Singles*—Miss Helen Wills, United States: *Women's Doubles*—Senorita Elia De Alvarez, Spain, and Miss Kea Bouman, Holland; *Mixed Doubles*—Miss Eileen Bennett, England, and Henri Cochet, France.

International Matches (at Mexico City, Oct. 13, 1929)—Jack Van Ryn, of East Orange, N. J., defeated Ben Gorchakoff, of San Francisco, U. S. intercollegiate doubles champion, in the fifth Mexican national championship, while Miss Marion Williams, of La Jolla, Calif., defeated Miss Marjorie Gladman, of Los Angeles, intercollegiate doubles champion of the United States, in two straight sets. The score in the Van Ryn-Gorchakoff final was 6—3, 4—6, 6—1, 6—8, 6—4. In the Williams-Gladman match it was 7—5, 7—5.

NATIONAL AMATEUR COURT TENNIS CHAMPIONS.

Singles—(1892) R. D. Sears; (1893) Fiske Warren; (1894-95) B. S. de Garmendia; (1896) L. M. Stockton; (1897) G. R. Fearing jr.; (1898-99) L. M. Stockton; (1900) E. H. Miles; (1901-04) Joshua Crane jr.; (1905) C. E. Sands; (1906-25) Jay Gould; (1926) C. S. Cutting; (1927) G. D. Huban; (1928-'29) H. Morgan.

Doubles—(1916) Jay Gould, W. H. T. Huhn; (1920-24) Jay Gould, J. W. Wear; (1925) Fulton Cutting, C. S. Cutting; (1926) Jay Gould, J. W. Wear; (1928-'29) J. Gould, W. C. Wright.

NATIONAL AMATEUR RACQUET CHAMPIONS.

(1890-91) B. S. de Garmendia; (1892) J. S. Tooker; (1893-94) B. S. de Garmendia; (1895) J. S. Tooker; (1896-97) B. S. de Garmendia; (1898) F. F. Rolland, Canada; (1899) Q. A. Shaw jr.

(1900) E. H. Miles, England; (1901) Q. A. Shaw jr.; (1902) C. H. Mackay; (1903) Payne Whitney; (1904) G. H. Brooke; (1905) L. Waterbury; (1906) P. D. Haughton; (1907) R. Fincke; (1908) Q. A. Shaw jr.; (1909) H. F. McCormick; (1910) Q. A. Shaw jr.; (1911-12) R. Fincke; (1913-14) L. Waterbury; (1915) C. C. Pell; (1916) S. G. Mortimer; (1917-22) C. C. Pell; (1923) S. G. Mortimer; (1924-25) C. C. Pell; (1926) S. G. Mortimer; (1927) C. C. Pell; (1928) C. C. Pell; (1929) H. D. Sheldon.

Gold Racquets Winners—(1911-12) J. G. Douglass; (1913) H. F. McCormick; (1914-23) C. C. Pell; (1924) S. G. Mortimer; (1925) C. C. Pell; (1927) C. C. Pell; (1928) S. G. Mortimer; (1929) C. C. Pell.

National Doubles Champions, 1926—R. A. Gardner, H. Linn; (1927) C. C. Pell and S. G. Mortimer, (1928) J. C. F. Simpson, C. N. Bruce (Eng.); (1929) C. C. Pell and S. G. Mortimer.

NATIONAL AMATEUR SQUASH (TENNIS) CHAMPIONS.

(1922-12) Dr. Alf. Stillman 2d; (1913) Geo. Whitney; (1914) Dr. Alf. Stillman 2d; (1915-17) E. S. Winston; (1918) F. V. S. Hyde; (19.9) J. W. Appel; (1920) A. J. Cordier; (1921) F. V. S. Hyde; (1922) Thos. Coward; (1923) R. E. Fincke; (1924) R. L. Farrelly; (1925) Wm. Rand jr.; (1926) F. V. S. Hyde; (1927-'28- 29) R. B Haines

Squash Racquets—(1925-'26) W.P. Dixon; (1927) Myles Baker; (1928) H. N. Rawlins, jr.; (1929) J. L. Pool 2nd.

SKI JUMPING.

At Brattleboro, Vt., on Feb. 22, 1929, Strand Mikkelson of the Greenfield (Mass.) Outing Club was crowned the new national senior ski jumping champion, wresting the title from Lars Haugen of the St. Paul (Minn.) Athletic Club in the National Ski Association championships conducted by the Brattleboro Outing Club.

Mikkelson jumped 141 and 131 feet while Haugen's two jumps measured 136 and 130 feet.

The jumpers were rated on both form and distance, the percentages being based on the new international metric system. About 3,500 attended the events.

The Class B title went to Guttorm Paulsen of the Norge Ski Club of Chicago, who jumped 132 and 127 feet. Ray Mikkelson of the same club was second. He is a brother of the Class A winner.

Casper Oimen of the Norge Ski Club was looked upon as likely winner of the Class A title but he fell after jumping 155 feet, and sprained a shoulder. He did not compete further.

Alfred Olsen of the Swedish Ski Club outscored a field of nine entries and captured the interstate ski jumping tournament with 19.06 points. The event, which was contested under ideal weather conditions on the 800-foot chute on the slope of Bear Mountain, N. Y., was witnessed by 5,000 persons.

R. P. Gendron, also of the Swedish Ski Club, who was in second place with 18.83 points, shared with Olsen the honor of making the longest jump, 105 feet. Gendron jumped this distance on both of his tries, while Olsen did 104 feet on his first jump.

Lars Olsen, another Swedish Ski Club contestant, gained permanent possession of the Swedish Ski Club Challenge Trophy, when he scored his third successive victory in the eleven mile metropolitan cross-country ski race conducted in the morning. Olsen completed the distance in 1:01:57, twenty seconds faster than the time of Algot Larson, his teammate. Eight of the nine starters finished the course.

SLED DOG RACES IN 1929.

American Dog Derby—At Ashton, Idaho, on Feb. 22, Fred Printz of Cascade, Idaho, won the American Dog Derby in 1 hour 58 minutes 19 seconds for the 25-mile course.

Delbert Groom of Rigby, Idaho, was second in 2 hours 5 minutes 37 seconds, and Warren Brown of McCall, Idaho, was third, in 2 hours 7 minutes 57 seconds.

At Colebrook, N. H., Feb. 22, Roland Lombard of Raymond, Me., was declared winner of the two-day sled dog race after his team had won first place in the second eighteen-mile-leg run. The time for Lombard's team for the thirty-six miles was 2 hours 26 minutes 29 seconds.

Harold Pendergast of North Conway won second place. His team's time was 2 hours 29 minutes 27 seconds.

Eastern International— An American from Alaska drove a team of seven Siberian sled dogs down Grande Allée, Quebec, Feb. 23, and won the Eastern International race and broke the record for the 123-mile course.

Leonhard Seppala, grim after three years of trying, not only beat young Emil St. Godard of Manitoba by about one hour but beat St. Godard's record to prove not only victory but the right to be king of the course.

It was the first time an American had won the race since it was moved to Quebec in 1923 from New Hampshire.

St. Godard was third. Frank Dupuis of Quebec took second place. Seppala's Siberians were fresh, in the opinion of the judges. They were so fresh that they received the condition prizes as well as the prize for speed.

Seppala started with seven dogs and he finished with seven. He drove with hardly a word and without a whip.

For the first time an American made his speech as Seppala took the $1,000 and the cup. The drivers and the total times for three days were as follows:

Drivers	H. M. S.	Drivers	H.M.S.
Sappala	11:06:33	Berube	13:06:07
Dupuis	11:23:12	Chevrette	13:08:09
St. Godard	12:07:14	Lapointe	13:44:43
		Alain	14:50-35

Dog Swim Against Time—On Sept. 25, 1928, Lucky, a German shepherd dog owned by John Schweighart finished a swim from Albany to New York in 44 hours 52 minutes, bettering by approximately five hours the record held by Geo. Creegan. The dog swam two hours at a stretch whereas the human record holder swam the distance in much longer stretches.

FENCING IN 1929.

National Championships: held at New York, May 24. Results: *Epee*: Frank S Righeimer, Yale, defeated Mijer and Nunes; Donald B. Waldhaus, Yale, defeated Nunes and Mijer; Peter Mijer, Washington Square Fencers, defeated Nunes; Leo Nunes, New York Athletic Club, lost three bouts. Righeimer and Waldhaus doublematched twice. In second fence-off Righeimer defeated Waldhaus.

Sabers: Leo Nunes, New York Athletic Club, defeated Huffman, 5—3; Dow, 5—2; Cohn, 5—4. Norman S. Cohn, Fencers Club, defeated Dow, 5—3; Huffman, 5—4. John R. Huffman, New York Athletic Club, defeated Dow, 5—2. Warren A. Dow, Buffalo, lost three bouts.

Foils: Joseph Levis, Fencers Club, defeated Calnan, 5—4; de Jong, 5—4, Righeimer, 5—1. Lieutenant George C. Calnan, U. S. N., defeated Righeimer, 5—0; de Jong, 5—4. Frank S. Righeimer, Yale, defeated de Jong, 5—4. Duris de Jong, New York Athletic Club, lost three bouts.

Intercollegiate Championships: held at New York, March 29. Results: *Individual*—Saber—Frederick Gidding, Army. Epée—Francis E. Righeimer, Yale. Foils—Francis E. Righeimer, Yale.

Team—Saber—Columbia. Epée—*Army. Foils—Navy.

Three-Weapon—*Yale. *Retains Championship.

Women's National Championship—Won by Mrs. Leon M. Schoonmaker. Women's Team Championship, won by the Fencers Club Team (N. Y.)

European Team Championship)—Won by Italy; second, Belgium; third, Hungary.

SURF CASTING.

For the first time in the history of surf casting, the world's championship at the art of heaving the four-ounce lead for the longest distance in official competition went, in 1929, to the Pacific Coast.

The new mark of 527 feet 5 inches was set in the East versus West telegraphic casting tournament on August 25, by August P. Libenars Jr., of the Pacific Rod and Gun Club.

The previous record, established by Fred Berger n competition was 495 feet 11 inches.

The average for the five-man team of the West was 441 feet 4 inches; the Easterners averaged 398 eet, 9 inches.

FRESH WATER CASTING.

The national records and their holders, are:

Quarter-ounce, distance bait—240 feet, average five casts, Fred Arbogast.

Half-ounce, distance bait—293 1-5 feet, average, five casts, Walter Newcombe.

Five-eighth-ounce, distance plug—244 feet, average five casts, Fred Arbogast.

Quarter-ounce, accuracy bait—100 per cent, V. Deane Reese.

Half-ounce, accuracy bait—99 8-10 per cent, William Stanley.

BASKETBALL IN 1929.

Amateur Athletic Union National Championship, Kansas City, March 11-16. Final Game:

The National Catholic High School Championships was won by De La Salle, of Chicago; St. Stanislaus, of Bay, St. Louis, Miss., second.

ICE SKATING.

The International Skating Union of America dissolved on Nov. 14, 1927, and was succeeded by the Amateur Skating Union of the United States, and the Amateur Skating Association of Canada.

The former is now allied with the Amateur Athletic Union of the United States, and is also allied with, and is a member of the Internationale Eislaur Vereinigung of Europe, which is the governing body over ice skating throughout the world.

There is an alliance also between the Amateur Skating Union of the United States, and the Amateur Skating Association of Canada.

These records have been approved by the Members of the Record Committee as in their opinion correct

The Daily News Silver Skates Derby (2 miles, on Conservatory Lake, Central Park, N. Y. City) was won, on Jan. 15, 1929, by Andrew Roesch of the Iceland Club, time—6:52 2-5.

At Davos, Switzerland, Jan. 19-20, 1929, the 5,000 metres (3 miles, 188.2 yds) was won by I. Ballangrud, of Norway, in 8 min., 24.2 sec. The 1,500 metres (1,640 yds.) was won by C. Thunberg, in 2 min., 19 sec. The 10,000 metres (6 miles, 376.3 yds.) was won by Ballangrud, in 17 min., 43.4 sec.

The North American Amateur speed skating championship, at Saranac Lake, N. Y., Feb. 7-9, 1929, was won by Jack Shea; Valentine Beales, 2nd.; Allen Patts, 3rd. The *Diamond Trophy* races there were won by Shea; Ross Robinson, Toronto, 2nd; Lloyd Guenther, Detroit, 3rd.

The Canadian Championship races, at Montreal Feb. 15-16, 1929, were won by Ross Robinson Willie Logan, St. John, N. B., 2nd; Alex. Hurd Hamilton, Ontario, 3rd

National Championship (N. Y. City, Feb. 19, 1929)—Winners—Men's Senior Singles, R. F. Turner, Boston; Women's Senior Singles, Maribel A. Vinson, Boston; Senior Pairs, Thornton Coolidge and Miss Vinson; Men's Junior Singles, George Hill, Boston; Women's Junior Singles, Mrs. Bruce S. Mapes, Brooklyn; Junior Pairs, R. L. Hapgood and Miss Dorothy Weld, Boston.

North American Championships (Boston, March 5, 1929)—Men's Singles, Montgomery Wilson; Women's Singles, Constance Wilson; Pairs, Constance and Montgomery Wilson.

TYPEWRITING CHAMPION.

Writing 8,129 net words in one hour, George Hossfield, of Paterson, N. J. former world's champion typist, regained his title in the international typewriting contest held at Toronto, Can., Sept. 28, 1929, defeating Albert Tangora, of Paterson, by four words a minute.

Hossfield struck the keys 41,697 times for 8,339 gross words. He had 21 errors, for which he was penalized 210 words. Tangora wrote 8,390 words in the same time but had fifty-five errors. Hossfield averaged 135 words a minute and Tangora 131.

Next came Bernard Stapert, of Paterson ,who wrote 125 words per minute.

Stella Willins, of Brooklyn, N. Y., was fourth with 124, and Irma Wright, of Toronto, was fifth with 112.

Chester Soucek, of Corapolis, Pa., won the amateur title, writing 118 words per minute. Richard Myers, of Bonner's Ferry, Idaho, was second with 115 and Lucy Harding, of Toronto, wrote 112 to take third.

FOOTBALL.

On Jan. 1, 1929, Georgia Tech. beat the University of California 8 to 7 at Pasadena.

In the game at Denver Oct. 19, Captain and Quarterback Earle Clark of Colorado College, made all the points for both teams. He grounded a bad pass back of his own goal for Denver University, and kicked a goal from field for 3 points for Colorado College. Final score: C. C. 3, D. U. 2.

SCULLING CHAMPIONS OF THE WORLD.

1880-1884, E. Hanlan; 1884-1887, W. Beach; 1888, P. Kemp; 1888-1889, H. E. Searle; 1890-1896, J. Stanbury; 1896, J. Gaudaur; 1901-1904, G. Towns; 1905, J. Stanbury; 1906-1907, G. Towns; 1907-1908, W. Webb; 1908-1911, R. Arnst; 1912-1914, E. Barry; 1919, A. Felton; 1920, E. Barry; 1921, D. A. Hatfield; 1922, J. Paddon; 1922, W. Hoover; 1923, J. Paddon; 1923, W. E. G. Gilmore; 1924, J. Paddon; 1925-1927, Major Goodsell; 1928. Bert Barry.

The crew of Browne and Nichols School of Cambridge, Mass., won the Thames Cup in the final of this event in the 1929 English Championship Regatta at Henley, England.

YACHTING. (All figures] mean *corrected* time.)

Sir Thomas Lipton challenged for the America's Cup during the summer of 1929, and the New York Yacht Club accepted the challenge which was made through the Royal Ulster Yacht Club.

The event will be the best three-out-of-five races, the first of which will be sailed off Newport, R.II. on September 13, 1930.

The challenging yacht (the keel of which was laid Oct. 30, 1929, at Gosport, England) will have a 76-ft. water line, with Bermudian rig.

ASTOR CUP RACES.

(Held at Newport, R. I., Aug. 16, 1929—Distance, 37½ miles.)

1885 (Sept. 14, 16) *First race,* Puritan (Amer.) 6h. 6m. 5s.; Genesta (Engl.) 6h. 22m. 24s. *Second race,* Puritan, 5h. 3m. 14s.; Genesta, 5h. 4m. 52s.

1886 (Sept. 9, 11) *First race,* Mayflower (Amer.) 5h. 26m. 41s.; Galatea (Engl.) 5h. 38m. 43s. *Second race,* Mayflower, 6h 49m.; Galatea, 7h. 18m. 9s.

1887 (Sept. 27, 30) *First race,* Volunteer (Amer.) 4h. 53m. 18s.; Thistle (Engl.) 5h. 12m. 41¼s. *Second race,* Volunteer, 5h. 42m. 56¼s.; Thistle, 5h. 54m. 45s.

1893 (Oct. 7, 9, 13) *First race,* Vigilant (Amer.) 4h. 5m. 47s.; Valkyrie II (Engl.) 4h. 11m. 35s. *Second race,* Vigilant, 3h. 25m. 1s.; Valkyrie II, 3h. 35m. 36s. *Third race,* Vigilant, 3h. 24m. 39s.; Valkyrie II 3h. 25m. 19s.

1895 (Sept. 7, 10, 12) *First race,* Defender (Amer.) 4h. 59m. 54 9-10s.; Valkyrie III (Engl.) 5h. 8m. 44s. *Second race,* Defender, 3h. 55m. 56s.; Valkyrie III, (disqualified on foul). *Third race,* Defender, 4h. 43m. 43s.; Valkyrie III (withdrew).

1899 (Oct. 16, 17, 20) *First race,* Columbia (Amer.) 4h. 53m. 53s.; Shamrock I (Irish) 5h. 4m. 1s. *Second race,* Columbia, 3h. 27m.; Shamrock I (disabled). *Third race,* Columbia, 3h. 38m. 9s.; Shamrock I, 3h. 44m. 43s.

1901 (Sept. 28, Oct. 3, Oct. 4) *First race,* Columbia (Amer.) 4h. 30m. 24s.; Shamrock II (Irish) 4h. 31m. 44s. *Second race,* Columbia, 3h. 12m. 35s.; Shamrock II, 3h. 16m. 10s. *Third race,* Columbia, 4h. 32m. 57s.; Shamrock II, 4h. 33m. 38s.

1903 (Aug. 22, 27, Sept. 3) *First race,* Reliance (Amer.) 3h. 32m. 17s.; Shamrock III (Irish) 3h. 39m. 20s. *Second race,* Reliance, 3h. 14m. 54s.; Shamrock III, 3h. 16m. 13s. *Third race,* Reliance, 4h. 28m. 6s.; Shamrock III (lost in fog).

1920 (July 15, 17, 20, 21, 23, 24, 26, 27) *First race,* Resolute (Amer.) (disabled); Shamrock IV, 4h. 25m. 12s. *Second race,* (yachts did not finish in 6-hour limit). *Third race,* Resolute, 5h. 24m. 44s.; Shamrock IV, 5h. 22m. 18s. *Fourth race,* Resolute, 3h. 56m. 5s.; Shamrock IV, 4h. 3m. 6s, *Fifth race,* Resolute, 3h. 31m. 12s.; Shamrock IV, 3h. 41m. 10s. *Sixth race,* (yachts did not finish in 6 hours). *Seventh race;* Resolute, 5h. 28m. 35s. Shamrock, IV, 5h. 48m. 29s.

DEFECTS IN COLLEGE ATHLETICS.

(From an Official Summary, issued in 1929, by the Carnegie Foundation.)

The fundamental causes of the defects of American college athletics are two: commercialsim, and a negligent attitude toward the educational opportunity for which the American college exists, says the Carnegie Foundation for the Advancement of Teaching, entitled "American College Athletics."

The authors of the study are Dr. Howard J. Savage, staff member of the Foundation, and Harold W. Bentley, John T. McGovern, and Dean F. Smiley, M.D., secretary of the American Student Health Association.

The Foundation's enquiry into American college sports, originally undertaken at the request of the Association of American Colleges, the National Collegiate Athletic Association, and other representative bodies, has consumed more than three and a half years, entailed personal visits to 130 American and Canadian universities, colleges, and schools, and involved the cooperation of more than 2,000 persons.

The recruiting and subsidizing of American college athletes has been comprehensively studied and specific facts presented concerning this abuse, which is termed "the darkest blot upon American college sport."

Only 26 of the more than one hundred universities and colleges studied were without trace of recruiting, and only 29 without subsidizing.

Of the thousands of individual cases of recruiting and subsidizing studied, alumni were responsible in only 30 per cent, college administrative officers in eight per cent, and athletic officers in 50 per cent. In many instances, the "nationwide commerce" is carried on through the cooperation of several groups or representatives.

Among the means whereby athletes are recruited, correspondence figures the most prominently. Once contact is established between the recruiter and the athlete, relations become closer, and the next step is usually personal persuasion or solicitation. Trips to visit the campus, financed by various methods, are much used in recruiting athletes.

Recruiting seldom, if ever, exists without the use of subsidies.

Subsidies take the form of scholarships, loans, nominal or disproportionately paid jobs, tuition allowances, favors of various kinds, and arrangements whereby athletes are "taken care of"; seldom is payment made in cash.

It is estimated that at least one college athlete in seven is subsidized. Secrecy aggravates both of these abuses, but does not cause either of them.

The prevalence of recruiting and subsidizing in college athletics has led to much "shopping round" by schoolboy athletes, a process of auctioning athletic skill to the highest bidder.

A selection of letters and other documents from the files of the enquiry is printed in the Appendix of the study to illustrate methods and procedures in "shopping round," subsidizing, and recruiting. The means employed by certain coaches and directors of athletics to evade conference rules against personal solicitation and the imitation of recruiting correspondence are also shown and discussed in detail.

In studying the hygiene of athletic training, the Foundation secured the cooperation of Dr. Dean F. Smiley, secretary of the American Student Health Association, in charge of this phase of the enquiry, and of Francis G. Benedict, Ph.D., director of the Nutrition Laboratory at Boston of the Carnegie Institution of Washington; E. V. MacCollum, Ph.D., professor of bio-chemistry in the Johns Hopkins University School of Public Health, Baltimore; President Livingston Farrand of Cornell University; Dr. Joseph E. Raycroft, professor of hygiene at Princeton; and Dr. Thomas K. Richards, instructor in surgery at the Harvard Medical School and chief surgeon of the Harvard Athletic Association, who acted as an advisory and consulting group. Some of the conclusions reached by this group are as follows:

Although there can be no doubt that athletics, if well conducted, may be made to contribute significantly to the physical health of college students, too few now receive their benefits and too many incur positive harm. Certain widespread athletic practices in training, coaching, and play actually jeopardize the physical health of participants.

The notion appears to be widespread that exercise in general and athletics in particular constitute a sort of panacea for all forms of ill health from flat foot to melancholia. As a matter of fact, says the Bulletin, athletics should be regarded as somewhat in the nature of a powerful medicament to be prescribed for one individual in one strength, for another individual in another strength, and for a third individual to be absolutely proscribed.

After a statistical study of 18,667 students in 111 representative universities and colleges, the authors find that the common notion that athetes in general are poorer students than non-athletes, is erroneous. On the other hand, they conclude that participation in sports that require very hard training and long practice hours probably impairs the academic standing of certain athletes.

The fact seems to be that athletes, who from scientific measurements and other data, appear to be the best endowed physically and mentally of all college undergraduates, fail to fulfil this promise of success in college work and do not greatly surpass, as they should their less active fellow-students.

Although in the past it has been generally insisted that athletics inculcate certain desirable traits, like courage, perseverance, and initiative, the study points out that, under proper conditions, athletics may possibly develop such of these traits as are present in a normal young man, but probably do not inculcate them at all.

On the other hand, college athletics, as they are conducted to-day, definitely fail in many cases to utilize and strengthen such desirable social traits as honesty and the sense of fair play, because of the deceit and chicanery with which sports are surrounded. If, therefore, the development of desirable social traits is one of the probable advantages of college athletics, the development of traits that impair the relation of the individual to society is one of the equally probable disadvantages.

The origins of American college athletics, say the authors of the study, go back to Colonial days and the decline of pioneer life. At that time, athletic skill was looked upon as somewhat beneath the dignity of a serious scholar. Certain colleges legislated against athletics as early as 1761. The Princeton faculty in 1787 voted formally that "there are many more amusements more honorable and more useful" for undergraduates than shinny.

Yale began to develop rowing in 1843. Baseball, before 1852, had little standing in colleges.

ASSOCIATION (SOCCER) FOOTBALL.

The 1929 soccer championship of the United States Football Association was won by the Hakoah Club of New York City, which got the final series from the Madison Kennel Club of St. Louis.

The first game was played at St. Louis, on April 1 and was won by Hakoah 2 to 0. The second was played at New York, April 7, and went to the Hakoah, 3 to 0.

PREVIOUS WINNERS.

1913-14—At Pawtucket, R. I., May 16, 1914; Brooklyn Field Club, 2; Brooklyn Celtic F. C., 1; referee, Charles E. Creighton, New York City.

1914-15—At Taylor Stadium, Lehigh University, South Bethlehem, Pa., May 1, 1915; Bethlehem Steel Co. F. C., 3; Brooklyn Celtic F. C., 1; referee, George Lambie, Boston, Mass.

1915-16—At Pawtucket, R. I., May 6, 1916; Bethlehem Steel Co. F. C., 1; Fall River Rovers F. C., 0; referee, David M. Whyte, Brooklyn, N. Y.

1916-17—At Pawtucket, R. I., May 5, 1917; Fall River Rovers F. C., 1; Bethlehem Steel Co. F. C., 0; referee, William Taylor, Pawtucket, R. I.

1918-19—At Harrison, N. J., May 19, 1918; Bethlehem Steel Co. F. C., 3; Fall River Rovers F. C., 0; referee, C. E. Creighton, New York City.

1919-20—At Fall River, Mass., April 19, 1920; Bethlehem Steel Co. F. C., 2; Paterson (N. J.) F. C., 0.

1920-21—At St. Louis, May 2, 1921; Ben Miller A. C. (St. Louis), 2; Fall River F. C. (Quincy, Mass.), 1.

1921-22—At Fall River, Mass., April 19, 1921 Robins Dry Dock F. C. (Brooklyn), 4; Scullin Steel F. C. (St. Louis), 2.

1922-23—At St. Louis, Mo., March 19, 1923; Scullin Steel F. C., 3; Todd Shipyard F. C. (Brooklyn), 2.

1923-24—At St. Louis, Mo., March 20, 1924 Fall River (R. T.) Football Club, 4; Vesper-Buicks, St. Louis, 2.

1924-25—At St. Louis, Mo., April 26, 1925; Boston F. C., 3; Ben Miller, St. Louis, 2.

1925-26—Bethlehem (Pa.) Steel F. C., 7; Ben Miller (St. Louis, Mo.), T. C., 2.

1926-27—Fall River F. C., 7; Carburetor F. C. (Detroit), 0.

1927-28—New York Nationals, 3; Chicago Bricklayers, 0.

MOTOR BOAT RACING.

AMERICAN POWER BOAT ASSOCIATION CHALLENGE CUP WINNERS.

This prize is commonly known as the Gold Cup Trophy.

Yr.	Boat.	Owner.	H. P.	Avg. Speed	Yr.	Boat.	Owner.	H. P.	Avg. Speed
1904	Standard	C. C. Riotte	....	23.6	1916	Miss Minneapolis	M. Minn. B. A.	250	49.7

1914	Baby Speed Demon II	Paul Blackton	180	50.49	1927	Greenwich Folly	G. H. Townsend	....	48.65
1915	Miss Detroit	M. Det. P. B. A.	250	48.5	1929	Imp	R. F. Hoyt	....	48.45

Speed figures register statute miles per hour. The Gold Cup race was not held in 1928.

HARMSWORTH TROPHY RACE.

The British International (Harmsworth) Trophy Race, held at Detroit, Mich., Aug. 31, and Sept. 2, 1929, was won by Gar Wood's Miss America VIII. The record, by years:

Year.	Place.	Name of Boat.	Owner.	Speed.	Club.
1903	Queenstown, Ireland	Napier I	S. F. Edge	19.96 knots.. 19.53 S. Mi.	Royal Motor Yacht Club.
1904	Solent, Eng	Trefle-A-Quatre	E. B. Thubron	23.13 knots.. 26.63 S. Mi.	Automobile Club de France.
1905	Arcachon, France	Napier II	S. F. Edge	22.61 knots.. 26.03 S. Mi.	Royal Motor Yacht Club.
1906	Solent, Eng	Yarrow-Napier	Lord Montagu and Lord. de Rothschild	13.44 knots.. 15.48 S. Mi.	Royal Motor Yacht Club.
1907	Solent, Eng	Dixie I	E. J. Schroeder	27.6 knots.. 31.78 S. Mi.	Motor Boat Club of America.
1908	Huntington Bay, L. I.	Dixie II	E. J. Schroeder	31.347 knots. 36.11 S. Mi.	Motor Boat Club of America.
1910	Huntington Bay, L. I.	Dixie III	F. K. Burnham	31.3 knots.. 36.04 S. Mi.	Motor Boat Club of America.
1911	Huntington Bay, L. I.	Dixie IV	E. K. Burnham	34.98 knots.. 40.28 S. Mi.	Motor Boat Club of America.
1912	Huntington Bay, L. I.	Maple Leaf IV	Sir E. Mackay Edgar	37.5 knots.. 43.18 S. Mi.	Royal Motor Yacht Club.
1913	Osborne Bay, Eng.	Maple Leaf IV	Sir E. Mackay Edgar	49.02 knots.. 57.45 S. Mi.	Royal Motor Yacht Club.
1920	Osborne Bay, Eng	Miss America	Garfield A. Wood	53.42 knots.. 61.51 S. Mi.	Motor Boat Club of America.
1921	Detroit	Miss America II	Garfield A. Wood	51.89 knots.. 59.75 S. Mi.	Motor Boat Club of America.
1926	Detroit	Miss America V	Garfield A. Wood	53.08 knots.. 61.118 S. Mi.	Yachtsmen's Asso. of America.
1928	Detroit	Miss America VII	Garfield A. Wood	51.594 knots. 59.325 S. Mi.	Yachtsmen's Asso. of America.
1929	Detroit	Miss America VIII	Garfield A. Wood	65.379 knots. 75.287 S. Mi.	Yachtsmen's Asso. of America.

The *President's Cup Race*, held at Washington, D. C., Sept. 15, 1929, was won by Imp, owned by Richard F. Hoyt; best lap speed, 48:301.

AMERICAN MOTOR BOAT RECORDS.

Mile Trials, (average of 6 one mile runs): Miss America VII, owned by Gar Wood, at Miami Beach, Fla., March 23, 1929. Built by Gar Wood, Packard motors. Speed 93.123 m.p.h.

Gold Cup Class, (625 cubic inch boats): Fastest heat (30 miles) Hotsy Totsy, owned by Caleb Bragg, Greenwich, Conn., 1927. Time, 35:06:83; speed, 51.261.

Fastest lap (3 miles), Imp, owned by Richard F. Hoyt, Manhasset Bay, 1926. Time, 3:22; speed, 53.58.

Total race (90 miles), Imp, owned by Richard F. Hoyt, Red Bank, N. J., 1929. Time 1:51:33;48, speed, 48.451.

Unlimited Hydroplane: Fastest Heat (30 miles), Miss America, owned by Gar Wood, Detroit, 1920, Time, 25:44; speed, 70.0.

Fastest lap (5 miles), Miss America, owned by Gar Wood, Detroit, 1920. Speed, 71.4.

Total race (90 miles), Miss America, owned by Gar Wood, Detroit, 1920. Time, 1:28:07; speed, 62.0.

Detroit Sweepstakes; Fastest lap (3 miles), Packard Chris Craft II, owned by Colonel J. G. Vincent, Detroit, 1925. Speed, 58.95.

Total race (150 miles), Packard Chris Craft II, owned by Colonel J. G. Vincent, Detroit, 1925. Time, 2:41:47.10; speed, 55.65.

British International Trophy, Unlimited Hydroplanes: Fastest heat (30 nautical miles), Miss America VIII, owned by Gar Wood, Detroit, Sept. 2, 1929. Speed, 75.287 m.p.h.

Fastest lap (5 nautical miles), Miss America VIII, owned by Gar Wood, Detroit, Sept. 2, 1929. Speed, 79.362 m.p.h.

24 Hours: Rainbow IV, owned by Harry G. Greening, Lake Rosseau, Canada, October 2-3, 1925. Total miles, 1218.88. Speed, 50.78.

1½ Liter Class, (*Trial Runs*): Newg, owned by Miss M. B. Carstairs, England, March 12, 1927 Speed, 39.45.

In competition, Little Spitfire, owned by J. H. Rand, Jr., Detroit, Sept., 3, 1927. Speed, 42.17.

151 Class—Unlimited: 1-mile straightaway, Spitfire V, owned by J. H. Rand, Jr., Albany, N. Y., July 5, 1927. Speed, 62.82

In competition, Spitfire V, owned by J. H. Rand, Jr., San Diego, Calif., Dec. 12, 1927. Speed, 55.42.

One lap in competition, Miss California, owned by Loynes-Harris, San Diego, Calif., Dec. 12, 1927. Speed, 59.68.

161 Class—Limited: In competition, Miss California, owned by Dick Loynes, at Sarasota, Fla., Mar. 8, 1929. Speed, 49.20 m.p.h.

Mile trials, Miss Rioco, owned by J. A. Talbot, Miami Beach, Fla., Mar. 19, 1928. Speed, 50.60.

340 Class: Miss California, owned by Loynes-Harris, Houston, Tex., July 2, 1927. Speed, 50.99.

510 Class: Miss Houston IV, owned by Frank H. Robertson. Louisville, Ky., July 5, 1926. 10 miles—in competition. Speed, 51.28.

7½ miles, Miss Kemah, owned by Henry Falk, Houston, Tex., July 4, 1927. Speed, 53.41.

One Mile Trials: Miss Houston IV, owned by Frank H. Robertson, Louisville, Ky., July 5, 1926. Speed, 53.43.

725 Class: 5 miles, Helen, owned by M. J. A. Mitchell, Louisville, Ky., July 5, 1926. Speed, 61.22.

Mile straightaway, Doc's II, owned by I. R. Van Sant, Peoria, Illinois, October 11, 1925, winning King of Belgians' Trophy. Speed, 61.77.

Single Engine Hydroplanes: 1 mile, Miss Chicago, owned by Sheldon Clark, Detroit, Sept. 3, 1921, Speed, 72.86.

15 miles in competition, Fore, owned by W. D. Foreman, Cincinnati, Ohio. Sept. 29, 1923. Speed. 64.75.

ENGLISH CHANNEL SWIMMERS.

Following is the record of the successful attempts to swim across the Channel between England and France, which at Dover is only twenty miles wide, but quite deep, and usually rough, with a high sweep of the tides.

1875—Capt. Matthew Webb of Eastbourne, England, Aug. 24-25. Dover Sands, England, to Sangatte Beach, France. Time, 21 hours 45 minutes. Estimated distance traveled, 39 miles.

1911—Thomas W. Burgess of London, England. Dover Admiralty Pier to Cape Gris-Nez, France, Sept. 5-6. Time, 22 hours 35 minutes. Estimated distance traveled. 39 miles.

1923—Henry Sullivan of Lowell, Mass. Dover Admiralty Pier to Cape Gris-Nez, Aug. 5-6. Time, 27 hours 23 minutes. Estimated distance covered, 45 miles.

1923—Sebastian Tirabocchi of Buenos Aires, an Italian. Cape Gris-Nez to Dover Sands, England, Aug. 11-12. Time, 16 hours 23 minutes. Estimated distance traveled, 27 miles.

1923—Charles Toth of Boston. Cape Gris-Nez to Dover Sands, Sept. 8-9. Time, 16 hours 54 minutes. Estimated distance traveled, 28 miles.

1926—Gertrude Ederle of New York City. Cape Gris-Nez to Dover, Aug. 6. Time, 14 hours 31 minutes. Estimated distance traveled, over 31 miles.

On June 15, 1925, she swam from the Battery, New York City to Sandy Hook, 21 miles, in 7 hours 11 minutes 30 seconds.

1926—Mrs. Clemington Corson (Millie Gade) of New York City. Cape Gris-Nez to Dover, Aug. 27-28. Time, 15 hours 32 minutes.

In June, 1921, she swam around Manhattan, 28 miles, in 15 hours 57 seconds. Also, in 1921, she swam from New York City to Albany, in laps, in 68 hours.

1926—Ernst Vierkoetter, a baker, of Cologne Germany, Cape Gris-Nez to beach near Dover, Aug. 30. Time, 12 hours 43 minutes. Estimated distance covered, 30½ miles.

1926—Georges Michel, a baker, of Paris, France. Cape Gris-Nez to shore of St. Margaret's Bay, Dover, England, Sept. 9-10. Time, 11 hours 5 minutes.

1926—Norman Leslie Durham, a mattress manufacturer, of London. Cape Gris-Nez to the shore of St. Margaret's Bay, Dover, Sept. 16-17. Time, 13 hours 57 minutes. He won a prize of $5,000 offered by Lord Riddell, owner of the News of the World, to the first British subject who would beat Miss Ederle's time across the Channel.

There were many attempts in 1926 to swim the Channel and one life was sacrificed—that of Luis Rodriguez Delara of Madrid, whose body was washed ashore Sept. 29, at Boulogne.

1927—Venceslas Spacek, newspaper mechanic, of Prague, in Bohemia; from a point on the French coast between Calais and Cape Gris-Nez, to Dover England, June 9, in 10 hours and 45 minutes.

1927—E. H. Temme, 22, a London insurance clerk; from Cape Gris-Nez to Lydden Spout, 2 miles west of Dover, Aug. 5, in 14 hours and 29 minutes.

1927—Miss Mercedes Gleitz, 26, London typist; from Cape Gris-Nez to a point between So. Foreland and St. Margaret's Bay, England, Oct. 7, in 15 hours, 15 minutes.

1927—Mrs. Ivy Gill, 24, a Sheffield, England, typist; from Cape Gris-Nez to Shakespeare Beach, Dover, Oct. 14-15, in 15 hours and 9 minutes.

1928—Miss Ivy Hawke of London; from Cape Griz Nez, France, to Hope Point, near Kingsdown, England; Aug. 18, 9.59 p.m.,—Aug. 19, 5.17 p.m. Time, 19 hours and 18 minutes.

1928—Miss Hilda Sharp, 18, nursemaid, Cape Griz Nez to the English coast, Aug. 24, 12.50 a.m., to 3.48 p.m—14 hours, 58 minutes.

1928—Ishak Helmy, Egyptian, Cape Griz Nez to Dover Cliffs, Sept. 1. Time, 23 hours, 40 minutes.

1929 DISTANCE SWIMS.

10-mile women's professional Wrigley Championship race at Toronto, Ont., August 23. Results: Martha Norelius, New York, first; Ruth Tower, Toronto, second; Mrs. E. Armstrong, Detroit, third. Time: 5 hrs. 24 m. 22 s. Prizes: first, $10,000; second, $3,000; third, $1,000.

15-mile men's professional Wrigley Championship race at Toronto, Ont., August 30. Results: E. F. Keating, New York, first; E. Vierkoetler, Toronto, second; Norman Ross, Chicago, third; S. Sponelor, Port Colborne, Ont., fourth. Time: 8 hrs. 15m. 13 1-5 s. 238 swimmers started. Prizes: first, $25,000; second, $5,000; third, $2,000; fourth, $1,500.

Lake Leman swim. Miss Corry Liebbrand, of Utrecht, swam Lake Leman from Lausanne to Geneva, a distance of approximately 37½ miles on August 14-15. Her time was approximately 23 hrs.

Golden Gate swim, held at San Francisco, Calif., September 15. Won by Dr. George Horsfall; second, C. Stevenson; third, R. Mason, all of San Francisco. Time: 46 m. 34s.

THE OLYMPIC GAMES.

1928 OLYMPIC TRACK AND FIELD RECORDS COMPARED WITH WORLD RECORDS.

Race.	Date.	Place.	Winner.	Country.	Time.	
400 metres relay	1928	Amsterdam	U. S. A.	U. S. A.	41 sec.

Class D, Division II: Uniplex, owned by W. B. Schulte and W. M. Fry at Detroit, Mich., Sept. 4, 1928. Speed, 32.70 nautical, 37.60 statute.

TRACK AND FIELD EVENTS (N. A. A. U.) IN 1929.

MEN'S SENIOR, OUTDOOR.

Held at Denver, Colo., July 3-5.

100 Yards—10s., Eddie Tolan, Univ. of Michigan; 2. Claude Bracey, Rice Institute.

220 Yards—21.9s., Eddie Tolan, Univ. of Michigan; 2. Frank Wykoff, Los Angeles A. C.

440 Yards—48.4s., R. F. Bowen, Univ. of Pittsburg; 2. William Storje, Olympic Club.

880 Yards—1m. 55.7s., Phil Edwards, New York Univ.; 2. Edwin Genung, Univ. of Washington.

One Mile—4m. 24.6s., Leo Lermond, Boston A. A.; 2. Rufus Kiser, Univ. of Washington.

Six Miles—33m. 47.7s., Louis Gregorie, St. Joseph's C. C.; 2. Harry Chauca, Los Angeles A. C.

Three Mile Walk—23m. 28.6s., Harry Hinkle, New York A. C.; 2. Harry Clark, Forest Hills, Mass., Unattached.

Two Mile Steeplechase—10m. 59.1s., David Abbott, Illinois A. C.; 2. Edward Parker, Denver A. C.

120 Yard Hurdles—14.9s., Steve Anderson, Univ. of Washington; 2. Charles Kaster, Olympic Club.

220 Yard Hurdles—24.1s., Steve Anderson, Univ. of Washington; 2. Richard Rockaway, Ohio State Univ.

440 Yard Hurdles—54.3s., Gordon Allott, Denver A. C.; 2. Morgan Taylor, Illinois A. C.

Running High Jump—6 ft. 3 5-8 ins., Henry Lasalette, Los Angeles A. C.; 2. Henry Coggeshall, Olympic Club.

Running Broad Jump—24ft. 4 1-4 ins., Edward Gordon, Univ. of Iowa; 2. George Martin, Olympic Club.

Running Hop, Step and Jump—48 ft. 6 3-4 ins., Robert Kelley, Olympic Club; 2. Sol Furth, Swedish-American A. C., N. Y.

Pole Vault—13 ft. 9 1-4 ins., Fredrick Sturdy, Los Angeles A. C.; 2. Thomas Warne, Northwestern Univ.

16-lb. Shot Put—50 ft. 2½ ins., Herman Brix, Los Angeles A. C.; 2. Eric Krenz, Olympic Club.

16-lb. Hammer—170 ft. 6 ins., Jack Merchant, Olympic Club; 2. N. G. Wright, New York A. C.

56-lb. Weight—35 ft. 9. in., P. J. McDonald, New York A. C.; 2. Casey Kazanjion, Olympic Club.

Discus—157 ft. 2 in., Eric Krenz, Olympic Club; 2. Ed. Moeller, Los Angeles A. C.

Javelin—204.975 ft., Jess Mortensen, Los Angeles A. C.; 2. Lee Bartlett, Albion College.

Point Score—Olympic Club (San Francisco), 44; Los Angeles A. C., 39; Univ. of Washington, 19; New York A. C., 16; Illinois A. C., 13; Boston A. C., 11; Univ. of Michigan, 10.

MEN'S JUNIOR, OUTDOOR.

100 Yard Dash—10s., Cy Leland, Texas Christian Univ.; 2. Raymond Alf, Denver A. C.

220 Yard Dash—21⅛s., Raymond Alf, Denver A. C.; 2. Maurice Guyer, Los Angeles A. C.

440 Yards Run—49s., Arnold Noyes, Boston A. A.; William Streng, Michigan Central A. C.

880 Yards Run—1m. 55 9-10s., Nelson Greer, Rice Institute; 2. E. B. Blake, Boston A. A.

One Mile Run—4m. 25 4-5s., Harold Manning, Univ. of Wichita; 2. Forest Harvey, Denver A. C.

Six Mile Run—35m. 45 9-10s., Wilton Ivie, Denver A. C.; 2. Clarence James, Denver A. C.

Three Mile Walk—24m. 17 5-10s., Harry L. Clark, Unattached; 2. Elmer Hawly, Illinois A. C.

Two Mile Steeplechase—11m. 24 5-10s., Edward Parker, Denver A.C.; 2. Arthur Honska, Denver A.C.

120 Yard Hurdles—14 9-10s., Jed Welsh, Los Angeles A. C.; 2. Lloyd Bourgeois, New Orleans A. C.

220 Yard Hurdles—24 7-10s., William Carls, Los Angeles A. C.; 2. Bernard Gridley, Wichita H. S.

440 Yard Hurdles—54 3-5s., Gordon Allott, Denver A. C.; 2. Clyde Blanchard, Los Angeles A. C.

Running High Jump—6ft. 4 7-8 ins., Bert Nelson, Butler Univ; tie for second, Howard Arthur, Los Angeles A. C., Lee Philips, Houston, Tex., Unattached and Robert Van Osdell, Los Angeles A. C.

Running Broad Jump—24 ft. 2½ ins., Richard Barber, Los Angeles A. C.; 2. Wilson Charles, Haskell Institute.

Run, Hop, Step and Jump—46 ft. 1¼ ins., Lloyd Bourgeois, New Orleans A. C.; 2. Lee Philips, Houston, Tex., Unattached.

Pole Vault—13 ft. 4¼ ins., Harold McAtee, Michigan State Coll.; tie for second, Marvin Harvey, Denver A. C.; and George Jefferson, Los Angeles A.C.

16-lb. Shot Put—46 ft., Clarence Schleimer, Los Angeles A. C.; 2. Manley Edwards, Los Angeles A. A.

16-lb. Hammer—152 ft. 3½ins., Earl Clark, Denver A. C.; 2. D. F. Lawrence, Denver A. C.

56-lb. Weight—31 ft. 1½ ins., H. Lee Merriman, Beaver Falls, Pa., Unattached; 2. Harry Bowman, Los Angeles A. C.

Discus—142 ft. 3 ins., D. Bealtio, Denver A. C.; 2. G. Corbett, B. Y. U.

Javelin—198 ft. 4 in., L. D. Weldon, Univ. of Iowa; 2. V. Kennedy, U. S. T. C

Point Scores—Denver A. C. 68; Los Angeles A. C., 49; New Orleans A. C., 8; Boston A. A., 8.

Decathlon—Ten Events, Kenneth Doherty, C. A. C., Detroit, Mich., 7,784.680 points; 2. V. Kennedy, U. S. T. C., 7,362.003 points; 3. W. Charles, H. T., 7,240.035 points.

Relay Championships—*880 Yards*—1m. 26 2-5s. Los Angeles A. C. (same team); 2. New York A. C.

1 Mile—3m. 17s., New York A. C. (Scholz, Kerr, Burke, Cuhel); 2. Denver A. C.

2 Miles—7m. 48 4-5s., Boston A. C. (Blake, Noyes, Martin, Lemond); 2. Los Angeles A. C.

4 Miles—18m. 47s., Illinois A. C. (Grubb, Abbott, Conger, White); 2. Denver A. C.

MEN'S SENIOR, INDOOR.

New York City on Feb. 23, 1929. Results:

60 Yards—6 3-5s., James Daley, Holy Cross; 2. Karl Wildermuth, Georgetown.

300 Yards—33 1-5s., Charles H. Engle, Yale Univ.; 2. H. Oestreich, Illinois A. C.

600 Yards—1m. 12s., Philip Edwards, New York Univ.; 2. Ed. Blake, Boston A. A.

1,000 Yards—2m. 13 1-5s., Ray Conger, Illinois A. C.; 2. Sam Martin, Boston A. A.

Two Mile Run—9m. 7s., Edwin Wide, Sweden; 2. Robert Dalrymple, Boston A. A.

Two Mile Steeplechase—9m. 55 2-5s., Eino Purje, Unattached,; 2. Ove Anderson, Unattached.

One Mile Walk—6m. 40 2-5s., H. R. Hinkel, New York A. C.; 2. Mack Weiss, Newark A. C.

70 Yard Hurdles—8 4-5s., E. M. Wells, Boston A. A.; 2. W. O. Baskin, New York A. C.

Standing High Jump—Harold Osborn, Illinois A. C., 5 ft. 2 in.; 2. H. Hedberg, Illinois A. C., 5 ft.

Standing Broad Jump—William Werner, Greenwood Track Club, 10 ft. 6¼ in.; 2. Allen Thomas, Penn A. C., 10 ft. 2½ in.

Running High Jump—Charles W. Major, B'klyn Harriers A. A., 6 ft. 3 in.; 2. Harold Osborn, Illinois A. C., 6 ft.

16-lb. Shot Put, H. Schwarze, Illinois A. C., 50 ft. 3 in.; 2. Dave Adelman, Georgetown Univ., 48 ft. 11½ in.

Pole Vault—Frederick Sturdy, Yale Univ., 13 ft. 9 in.; 2. B. Berlinger, Iniv. of Pennsylvania, 13 ft.

1 7-8 Miles Medley Relay, 7m. 44 3-5s., Brooklyn Central Y.M.C.A. (W. Enos, D. D'Auria, M. Wakely, S. Brown); 2. New York Univ. (H. Warwick, B. Robinson, W. Philips, J. Hickey).

Team Score—Illinois A. C., 29; New York A. C., 19; Boston A. A., 17; Yale, 14; New York Univ., 12; Georgetown Univ., 6; Holy Cross, 5; Newark A. C., 5; Univ. of Pennsylvania, 5; Brooklyn Harriers, 5; Central Y. M. C. A., 5; Greenwood Track, 5.

MEN'S JUNIOR, INDOOR.

Boston, Mass. on February 22, 1929. Results:

60 Yards—6 3-5s., George Morin, Holy Cross; 2. Guarina Pasquantonio, Boston College.

300 Yards—34 1-5s., Meyer Yavner, Unattached; 2. Charles Finn, Boston College.

600 Yards—1m. 15 2-5s., Max Wakely, Central Y. M. C. A.; 2. Harold Klumback, Holy Cross.

1,000 Yards—2m. 23 2-5s., R. K. Baltzer, Mass. Inst. Tech.; 2. William Maher, Holy Cross.

Two Mile Run—9m. 57 3-5s., Robert A. Dalrymple, Boston A. A.; 2. Robert M. Pickey, Tufts.

Two Mile Steeplechase—10m. 24 2-5s., Julius Gilbert, Boston A. A.; 2. F. J. Howard, Univ. of New Hampshire.

One Mile Walk—6m. 40 4-5s., A. W. Bell, Boston A. A.; 2. E. G. Wilson, Boston A. A.

70 Yards Hurdles—(5 hurdles, 3 ft. 6 in. hurdles, 10 yds. apart; 15 yds. to first hurdle; 15 yds. to finish) 9 1-5s., Eric Reidell, Boston Y. M. C. A.; 2. P. V. Toolin, Boston A. A.

Standing High Jump—C. Bradley, Boston Y. M. C. A., 4 ft. 10½ in.; 2. Walter Schwaner, Providence Y. M. C. A., 4 ft. 8 in.

Standing Broad Jump—O. Hokkanen, Quincy, 10 ft. 4½in.; 2. Harold Joyce, Coburn Classical, 10 ft. 2¾in.

Running High Jump—James Stafford, Boston A. A., 6 ft.; 2. Mayo A. Seekins, Colby, 6 ft. (The places were awarded by a jump-off.)

Pole Vault—B. M. Burbank, Boston A. A., 11 ft. 7 in.; 2. Earl Brooks, Univ. of New Hampshire, 11 ft. 4 in.

Putting 16-lb. Shot—Howard Morris, Haverford College, 44 ft. 4 in.; 2. Howard Welodyka, Fairhaven, 43 ft. 11¼ in.

1 7-8 Miles Medley Relay, 7m. 45 4-5s., Boston A. A. (Ingoldsby, Tobin, Rogers. Sansone); 2. Univ. of New Hampshire.

WOMEN'S SENIOR, OUTDOOR.

Chicago, Ill., on July 27, 1929. Results:

60 Yards—5 4-5s., Betty Robinson, Illinois Women's A. C., Chicago; 2. Loretta McNeil, Millrose A. A., N. Y.

100 Yards—11 1-5s., Betty Robinson, Illinois Women's A. C., Chicago; 2. Jessie Cross, Millrose A. A., N. Y.

220 Yards—27 2-5s., Maybelle Gilliland, Millrose A. A., N. Y.; 2. Ruth Waldner, Pennsy. A. A., Philadelphia.

80 Meter Hurdles—12 3-5s., Helen Filkey, Chicago; 2. Evelyn Hall, Illinois Women's A. C., Chicago.

440 Yard Relay—51 1-5s., Millrose A. A., New York; 2. Prudential A. A., Newark, N. J.

Running Broad Jump—17 ft. ¼ in., Nellie Todd, Illinois Women's A. C., Chicago; 2. Margaret Whitcomb, Dallas, Tex.

Running High Jump—4 ft. 9 7-8 in., Jean Shiley, Meadowbrook Club, Phila.; 2. Genevieve Valvado, South Parks, Chicago.

Throwing Baseball—248 ft. 1 in., Glora Russell, No. Calif. A. A., Eureka, Calif.; 2. Fay Langford, Dallas, Tex.

8-lb. Shot Put—42 ft. 3 in., Rena McDonald, Boston; 2. Eleanor Egg, St. Bonaventures, Paterson, N. J.

Javelin Throw—100 ft. 5 in., Estelle Hill, Prudential A. A., Newark, N. J.; 2. Fay Langford, Dallas, Tex.

Throwing Discus—113 ft. 4 in., Rena McDonald, Boston Swim. Ass'n.; 2. Dee Boeckmann, St. Louis, Mo.

WOMEN'S SENIOR, INDOOR.

Boston, Mass., on March 30, 1929. Results:

40 Yard Dash—5 3-5s., Mary Carew, Medford Girls' A. C.; 2. Katherine Mearls, Boston S. A.

220 Yard Dash—29s., Catherine M. Donovan, Prudential Ins. A. A.; 2. Florence MacDonald, Boston S. A.

50 Yard Hurdles—8s., Catherine M. Donovan, Prudential Ins. A. A.; 2. Marietta Ceres, Prudential Ins. A. A.

Standing Broad Jump—Katherine R. Mearls, Boston S. A., 8 ft. 2 ¾ in.; 2. Jean Shiley, Meadowbrook Club, 7 ft. 11 ½ in.

8 lb. Shot Put—Rena MacDonald, Boston S. A., 39 ft. 3 5-8 in.; 2. Bertha Poetschke, Warinanco A. C., N. J., 33 ft. 11 7-8 in.

Running High Jump—Jean Shiley, Meadowbrook Club, 5 ft. 3 1-8 in.; 2. Mildred O. Wiley, Boston S. A., 5 ft. ¼ in.

440 Yards Relay—54 1-5s., Millrose A. A. (Carrie Jensen, Jessie Cross, Loretta McNeil, Maybelle Gilliland); 2. Boston S. A. (Katherine Mearls, Olive Hasenfus, Pansy Madeira, Florence MacDonald).

Basketball Throw—Marietta Ceres, Prudential Ins. A. A., 85 ft. 5½ in.; 2. Rena MacDonald, Boston S. A., 81 ft. 8 ¾ in.

GYMNASTICS RECORDS IN 1929.

Amateur Athletic Union National Championships, held at Philadelphia, Pa., on April 27, 1929. Results:

Rope Climb—Manfred Kraemer, Newark A. C.

Free Calisthenics—Alfred Jochim, Swiss Turn Verein.

Long Horse—Adolph Zink, New York Turn Verein.

Side Horse—Frank Haubold, Swiss Turn Verein.

Horizontal Bar—Alfred Jochim.

Indian Clubs—Robert Job, Hudson Co. Turn Verein, Jersey City, N. J.

Parallel Bars—Alfred Jochim.

Tumbling—William Hermann, Jr., Overbrook High School, Philadelphia, Pa.

Flying Rings—Alfred Jochim.

All Around—Alfred Jochim.

Team Trophy, Swiss Turn Verein, 64 points; 2. New York Univ., 23 points; 3. Philadelphia, 21 points.

Intercollegiate championships held at Philadelphia, Pa., March 23, 1929. Results:

Horizontal Bar—D. O. Wells, Mass. Tech., 557 points; second, T. B. Hughes, Navy, 550.

Side Horse—F. M. Adamson, Navy, 594; second, P. Heller, Princeton, 560.

Parallel Barz—J. I. Stewart, Dartmouth, 584; second, C. G. Zey, Dartmouth, 565.

Flying Rings—W. H. Reynolds, Mass. Tec., 569; second, R. E. Lockwood, Navy, 566.

Tumbling—A. H. Gould, Dartmouth, 601; second, N. Dolloff, Mass. Tech., 583.

Rope Climb—W. J. Galbraith, Navy, 0:04 4-5; second, A. Lofthouse, Princeton, 0:05.

All-round Championship—John Menxies, Chicago, 2,565; second, T. B. Hughes, Navy, 2,488.

ARCHERY IN 1929.

The Forty-ninth Annual Tournament of the National Archery Association, which was held at Santa Barbara, California, July 30, 31, August 1, 2, 1929, established new records in the Single York Round, Double York Round, Single American Round Double American Round, Flight Shoot for both men and women, and Team Shoot for both men and women.

The new Double York Round record of 257-1,293, made by Dr. E. K. Roberts of Ventura, California, not only established a new N.A.A. record, but also broke the world's Double York Round record of 242-1,251, made by Horace Ford of England in 1857.

Dr. Roberts won the men's championship; Mrs. Audrey Grubbs of Los Angeles, Calif., the women's championship; Dr. G. A. Cathey of Portland, Ore., the men's Flight Shoot championship; and Mrs. H. Prouty of Portland, Ore., the Ladies Flight Shoot championship. The men's and ladies' Team Shoot was won by teams from the Santa Monica Archers.

Senior Division—*Men's Championship*—Dr. E. K. Roberts, Ventura, Calif., Single York Round, 129-655; Double York Round, 257-1,243; Single American Round, 90-658; Double American Round, 180-1,308.

Ladies' Championship—Mrs. Audrey Grubbs, Los Angeles, Calif., Single National Round, 63-329; Double National Round, 119-581; Single Columbia Round, 70-496; Double Columbia Round, 141-991.

Men's Flight Shoot Champion—Dr. G. A. Cathey, Portland, Ore., 353 yds., 10 in.

Ladies' Flight Shoot Champion—Mrs. Horace Prouty, Portland, Ore., 273 yds. 2 in.

Intermediate Division—*Girl Champion*—Miss Betty Jean Hunt, Los Angeles, Calif.; *Boy Champion*—Jack Selby, Los Angeles, Calif.

Junior Division—*Girl Champion*—Kathleen Thorburn, Los Angeles, Calif., *Boy Champion*—Brownell McGrew, Los Angeles, Calif.

Officers for 1930. *President*, Hermann L. Walker, Chicago; *Secretary-Treasurer*, Louis C. Smith, Old South Bldg., Boston.

Eastern Archery Association—*National Round Championship*—Mrs. Dorothy Cummings, Newton Center, Mass., 136-732; *Columbia Round Championship*—Mrs. Dorothy Cummings, Newton Center, Mass., 142-992; *York Round Championship*—P. W. Crouch, Newton Center, Mass., 235-1,091; *American Round Championship*—G. A. Clark, Waltham, Mass., 177-1,153.

INTERCOLLEGIATE TRACK AND FIELD EVENTS IN 1929.

The 53rd Annual Championship Meet of the Intercollegiate Association of Amateur Athletics of America was held at Philadelphia, Pa., May 31 and June 1, 1929. The leading point scores follow: Stanford, 45 3-8; So. California, 21; Pennsylvania, 18 7-8; New York Univ., 14; Yale, 13 5-8; Individual winners:

100 Yard—Karl Wildermuth, Georgetown, 0:10.
220 Yard—Richard G. Kent, Colgate, 0:21 1-10.
440 Yard—Reginald Bowen, Pittsburgh, 0:48 4-10.
**880 Yard*—Phil Edwards, N. Y. U., 1:5 22-10, new record.
One Mile—Joe Hickey, N. Y. U., 4:21 4-10.
**Two Miles*—James L. Reid, Harvard, 9:22, new record.
120 Yard High Hurdles—John S. Collier, Brown, 0:14 6-10.
**220 Yard Low Hurdles*—Sidney B. Kieselhorst, Yale, 0:23 3-10.
16 Pound Shot Put—Harlow Rothert, Stanford, 50 ft. 3 in., new record.
**Discus Throw*—Eric Krenz, Stanford, 153 ft. 4 in.
Javelin Throw—Leo P. Kibby, Stanford, 204 ft. 7 in.
Hammer Throw—Edmund Black, Maine, 163 ft.
Running Broad Jump—Jesse Hill, So. California, 25 ft. 7-8 in., new record.
Running High Jump—Ben Hedges, Princeton, 6 ft. 2¾ in.
Pole Vault—Fred Sturdy, Yale; Ward Edmonds, Stanford; and Jack Williams, So. California, tied at 13 ft. 9 in.
*Retained title.

National Collegiate Athletic Association Championships, Chicago, Ill., June 7-8, 1929. Point scores: Ohio State, 50; Washington, 42; Illinois, 35½; So. California, 32. Individual winners:

100 Yard—Simpson, Ohio State, 0:9 4-10, new world's record.
220 Yard—Simpson, Ohio State, 0:20 8-10, new N. C. A. A. record.
440 Yard—Walter, Northwestern, 0:47 9-10.
880 Yard—Genung, Washington, 1:55.
One Mile—Getz, Alfred, 4:19 4-10.
Two Mile—Abbott, Illinois, 9:30.
120 Yard High Hurdles—Rockaway, Ohio State, 0:14 7-10.
220 Yard Low Hurdles—Anderson, Washington, 0:23 5-10.
Running High Jump—Shelby, Oklahoma, 6 ft. 3 in.
Running Broad Jump—Gordon, Iowa, 24 ft. 8 in.
Shot Put—Rothert, Stanford, 50 ft. 3 in., new N. C. A. A. record.
Hammer Throw—Gwinn, Pittsburgh, 163 ft. 9¾ in.

Discus Throw—Rasmus, Ohio State, 159 ft. 1 7-8 in., betters accepted world's record.
Pole Vault—Edmonds, Stanford, and Warne, Northwestern, tied at 13 ft. 7 7-8 in., new N. C. A. A. record.

University of Pennsylvania Relay Intercollegiate Championships, held at Philadelphia, Pa., April 26-27, 1929: Results:

Two Mile College Championship—Chicago (Williams, Livingston, Letts and Gist); N. Y. U. (Gassner, Hickey, Veit and Edwards), second. Time—7:50.
Half Mile College Championship—Ohio State (Kriss, Strother, Rockaway and Simpson), time—1:27; Yale, second, time—1:27 4-5 (new Carnival record; old record, 1:27 4-5, made by Yale in 1926).
One Mile for College Freshmen—Georgetown (Carlin, Kelly, Briggs and Burke); Pennsylvania, second. Time—3:23.
Normal School One Mile Championship of America—Hampton (C. P. Harris, J. E. Early, G. Gary and J. A. Baldwin); Newark, second. Time—3:27 2-5.
One Mile College Championship—Dartmouth (Houston, Pratt, Ripley and Swope); Syracuse, second. Time—3:20 1-5.
Four Mile College Championship—Penn State (Meisinger, Rekers, Cox and Offenhauser); Indiana, second. Time—17:48 3-5. (New Carnival record; old record, 17:51 1-5, made by Cornell in 1916.)

Yale and Harvard vs. Oxford and Cambridge, International Track Meet, held at Boston, Mass., July 13. Won by Yale-Harvard. Results:

100 Yard—Sidney B. Kieselhorst, Yale; Thomas F. Mason, Harvard, second. Time—0:10 4-10.
120 Yard High Hurdles—Roland St. G. T. Harper, Oxford; Ian R. Mann, Cambridge, second. Time—0:15 6-10.
One Mile Run—David Cobb, Harvard; Charles E. C. Green, Cambridge, second. Time—4:23 8-10.
220 Yard Run—Charles Engle, Yale; George Wilkinson, Cambridge, second. Time—23 2-10.
Two Mile Run—James L. Reid, Harvard; John M. Pumphrey, Oxford, second. Time—9:42 8-10.
220 Yard Low Hurdles—Sidney B. Kieselhorst, Yale; R. M. N. Tisdall, Cambridge, second. Time—0:24 4-10 (new meet record; old record of 0:24 7-10 made by Lord Burghley of Cambridge in 1927).
440 Yard Run—Charles H. Engle, Yale; Frank Tchitcherine, Cambridge, second. Time—0:49 (equals meet record made by B. G. D. Rudd of Oxford in 1921).
880 Yard Run—Thomas Hampson of Oxford; Norwood P. Hallowell, Harvard, second. Time—1:57 6-10.
Pole Vault—Frederick H. Sturdy, Yale, 13 ft. 3½ in. (new meet record; old record of 13 ft. made by Sabin W. Carr in 1925 and equaled by him in 1927); Ashley Pond, Yale, 13 ft., second.
16 lb. Shot Put—John S. O'Gorman, Yale, 42 ft. 10½ in.; Joseph E. Uihlein, Yale, 42 ft. 9 in., second.
Running Broad Jump—R. W. Revans, Cambridge, 22 ft. 11 7-8 in.; Warren C. Rowe, Harvard, 22 ft. 5 ¾in., second.
Running High Jump—Colin Gordon, Oxford, and George W. Kuehne, Harvard, tied for first at 6 ft 2 in.; George V. A. Wolf, Yale, 6 ft. 1 in., third.

Princeton-Cornell vs. Oxford-Cambridge International Track Meet, New York City, July 20, 1929. Won by Princeton-Cornell. Results:

100 Yard Dash—Gorth Wilkinson, Cambridge; Ben H. Hand, Princeton, second. Time—0:10 4-10.
220 Yard Dash—Ben H. Hand, Princeton; Roger Leigh Wood, Oxford, second. Time—0:22 6-10.
440 Yard Run—F. W. Tchitcherine, Cambridge; Roger Leigh Wood, Oxford, second. Time 0:49 8-10.
One Mile Run—John E. Gore, Princeton; Charles E. C. Green, Cambridge, second. Time—4:23 (new meet record; old record, 4:23 8-10, made by H. B. Stallard, Cambridge, in 1921).
Two Mile Run—Orson C. Beaman, Cornell; John M. Pumphrey, Oxford, second. Time—9:33 8-10 (new meet record; old record, 9:44 8-10, made by T. C. Fooks, Cambridge, in 1926).
120 Yard Hurdles—Ben Hedges, Jr., Princeton; R. St. G. Harper, Oxford, second. Time—0:15 6-10 (equals meet record made by Lord David Burghley, Cambridge, in 1925 and 1926).
220 Yard Low Hurdles—John W. Lincoln, Princeton; Frank K. Beyer, Cornell, second. Time—0:26 6-10.
880 Yard Run—Thomas Hampson, Oxford; Robert L. Garland, Princeton, second. Time—1:56 (new meet record).
16 lb. Shot Put—Lawrence H. Levy, Cornell, 46 ft. 4 ins.; John F. Anderson, Cornell, 46 ft ½ in., second.
Running High Jump—Ben Hedges, Jr., Princeton, 6 ft. 2 in.; Colin E. S. Gordon, Oxford, 6 ft., second.
Pole Vault—Everett L. Colyer, Cornell, 12 ft. Ben Hedges, Jr., Princeton, 11 ft., second.
Running Broad Jump—Alson E. Woodruff, Cornell, 22 ft. 6 in.; Reginald Revans, Cambridge 22 ft. 5½ in., second.

BEST INTERCOLLEGIATE RECORDS (I. C. A. A. A. A.)

100-Yard Dash—9 7-10s., J. A. Le Coney, Lafayette, Cambridge, Mass., May 27, 1922, and H. A. Russell, Cornell, Cambridge, Mass., May 29, 1926.

THE TUNNEY TROPHY.

The Tunney-Muldoon Trophy, emblematic of the world's heavyweight championship, was unveiled with appropriate ceremony in Madison Square Garden on April 17, 1929 before 500 men prominent in all walks of life.

The bronze and marble statue, which is to be given to the heavyweight boxer recognized by the public and press as worthy of the ring's title mantle, was presented from its donors to the trustees for safekeeping.

It was entrusted to the Madison Square Garden Corporation, to stand in the Garden lobby as the symbol of high ideals in boxing. Gene Tunney, codonor of the trophy, which was designed by Mahonri Young, was unable to attend the exercises, being in Italy, but he cabled his congratulations.

Among the hundreds of notables present were three former heavyweight champions, as well as the "regulars" of boxing. They heard speeches by Mayor James J. Walker, William Muldoon of the State Athletic Commission; Jeremiah T. Mahoney, a member of the board of trustees, and Jack Dempsey.

The old menace of avarice and commercialism still jeopardizes professional boxing, Commissioner Muldoon declared in his address. The 83-year-old member of the State Athletic Commission and one of the donors of the trophy, deplored the existence of what he termed "the lust for money."

Commissioner Muldoon asserted that, although he had lived through the socalled good old days of boxing when men fought with bare knuckles and skin-tight gloves, the sport of today far surpassed that of former times. He said that exponents of the ring game were now better physical specimens and more intelligent than any class of men who ever before engaged in boxing.

"Today the greatest menace to boxing is avarice," he continued. "This is true of many things—not only boxing. It is the sport of a good many people to get all you can and give little in return.

"There is another menace to boxing and I would be doing wrong if I did not call it to your attention. That is the commercialism which is so entering the sport that we find it impossible to arrange matches between young men ready and willing to box. These young men have only an average of five years at the height of their ability, and they are ready to box, but their managers will not agree or make matches because of—money.

"Nine out of ten boxers today are willing to box anybody in their class and take any kind of a chance, but the managers will not let them do so.

AMATEUR ATHLETIC UNION BOXING CHAMPIONSHIPS.

Held at Boston, Mass., April 9-10. Results by classes:

112-Pound Class—Semi-Finals: James Kerr, Grand Rapids, defeated Anthony Sciolino, Buffalo, three rounds; Augi Curtiss, Los Angeles, defeated Joseph Wolf, Chicago, three rounds. Final, Kerr defeated Curtis, three rounds.

118-Pound Class—Semi-Finals: Mose Butch, Pittsburgh, defeated Frankie Wallace, Cincinnati, three rounds; Albion Holden, Providence, defeated Vitto Mazzeo, Cincinnati, three rounds. Final Holden defeated Butch, three rounds.

126-Pound Class—Semi-Finals: Martin Zuniga, Los Angeles, defeated Al Santora, New York, three rounds; Robert Merritt, Buffalo, defeated Wesley Ramey, Grand Rapids, three rounds. Final, Zuniga defeated Merritt, three rounds.

135-Pound Class—Semi-Finals: Joe Bernal, San Francisco, defeated Robert Stone, New York, four rounds; Steve Halaiko, Buffalo, defeated Dick Collins, Boston, three rounds. Final, Halaiko defeated Bernal, three rounds.

147-Pound Class—Semi-Finals: Leslie Baker, Boston, defeated Leo Jasinski, Grand Rapids, three rounds; Eric Lauson, New York, defeated Nick Debellis, Boston, three rounds.

160-Pound Class—Semi-Finals: Ray Lopez, Boston, defeated John Dixon, Philadelphia, three rounds. Ray Trambile, Rockford, Ill., stopped Ted McKay, Portland, Ore., in the third. Final, Lopez won from Trambile on a foul in the first round.

175-Pound Class—Semi-Finals: Martin Levandowski, Grand Rapids, defeated Frank Tucker, San Francisco, three rounds; Harry Allen, Brockton stopped Anthony Stropos, Philadelphia, in the first round.

Heavyweight Class—Semi-Finals: Ralph Ficucello, New York, defeated Clarence Doyle, San Francisco, three rounds; Elmer Howard, Philadelphia stopped Charles Hanson, New York, in the second. Final, Howard defeated Ficucello, three rounds.

INTERCOLLEGIATE BOXING CHAMPIONSHIPS.

Held at Penn State College, Pa., March 22-23.

Results: Team championships, Penn State; individual championships:

115 Pounds—Epstein, Penn State; 125 Pounds—Fitzgerald, Navy; 135 Pounds—Crosby, Western Maryland; 145 Pounds—Fish, Georgetown; 160 Pounds—*Wolff, Penn State; 175 Pounds—Klepac, Western Maryland; Unlimited—Hamas, Penn State.
*Retains title.

115-Pound Class—Semi-Finals: Fry, Navy knocked out Davis, Georgetown, in second round' Epstein, Penn State, defeated Peluse, Penn., decision, three rounds. Final: Epstein, defeated Fry; decision, three rounds.

125-Pound Class—Semi-Finals: Fitzgerald, Navy, defeated Schadel, Penn, decision, three rounds; Kolakoski, Penn State, defeated Glassey, Syracuse, decision, three rounds. Final, Fitzgerald defeated Kolakoski, decision, three rounds.

135-Pound Class—Semi-Finals: Saslow, Penn, defeated Williams, Navy, decision, four rounds; Crosby, Western Maryland, defeated Casoni, Penn State, decision, three rounds. Final, Crosby defeated Saslow, decision, three rounds.

140-Pound Class—Semi-Finals: Davis, Penn State, defeated Stucker, Penn, decision, three rounds; Fish, Georgetown, defeated Hall, Navy, decision, three rounds. Final: Fish defeated Davis, decision, three rounds.

150-Pound Class—Semi-Finals: Moret, Navy, defeated Clements, Georgetown, decision, three rounds; Wolff, Penn State, defeated Ekaitis, Western Maryland, decision, three rounds. Final: Wolff defeated Moret, decision, three rounds.

175-Pound Class—Semi-Finals: Tierney, Georgetown, defeated Hopkins, Penn, decision, three rounds; Klepac, Western Maryland, defeated McAndrews, Penn State, decision, three rounds. Final: Klepac defeated Tierney, decision, three rounds.

Unlimited Class—Semi-Finals: Hamas, Penn State, defeated Chapple, Navy, decision, four rounds; Livoti, Syracuse, defeated Downer, Western Maryland, decision, three rounds. Final: Hamas defeated Livoti, decision, three rounds.

3 A. A. U. NATIONAL CHAMPIONSHIPS.

Catch-as-Catch-Can championship helds, at New York City, April 19-20, 1929. Results final bouts only:

112 lbs.—G. R. Shoemaker, Lehigh Univ.; 2, I. Levine, Boys' Club, N. Y.
118 lbs.—T. McCrary, Cornell Univ.; 2, E. Naponen, Hurja A. C.; 3, Geo. Campbell, Sand Springs, Okla.
126 lbs.—Geo. Campbell, Sand Springs, Okla.; 2, L. Marford, Cornell College, Iowa.; 3, M. Rapaport, Boston, Mass.
135 lbs.—J. Eareckson, Baltimore, Md.; 2, R. M. Brick, Lehigh Univ.; 3, S. Hauck, Univ of Idaho.
147 lbs.—A. Tomlinson, Okla., A. & M. College; 2, N. Der Marderosiah, Mass. Tech.; 3, G. Hadzellis, New York City.
160 lbs.—B. Sheman, Portland, Ore.; 2, A. Cornsweet, Brown Univ.; 3, Chas. Humbert, N. Y. A. C.
175 lbs.—K. Knogh, Univ. of Chicago; 2, F. Maracci, Portland, Ore.
Heavyweight—E. George, Univ. of Michigan; 2, O. Marchione, E. A. A. C.; 3, E. Ots, New York City.

Greco-Roman Championships, held at New York City, April 4-5, 1929. Results, final bouts only:

118 lbs.—F. Bauch, Cooper A. C.; 2, G. Rasch, G. A. A. C.; 3, M. Beltmann, W. N. Y.
126 lbs.—A. Gaukler, G. A. A. C.; 2, H. Schulte G. A. A. C.
135 lbs.—R. Keltner, Cooper A. C.; 2, M. Meisenbach, G. A. A. C.; 3, J. Farmikitis, unattached.
147 lbs.—E. Bollman, Cooper A. C.; 2, G. Hadzellis, G. A. A. C.; 3, J. Greubel, G. A. A. C.
160 lbs.—O. Kapp, E. A. C.; 2, E. Knaup, G. A. A. C.; 3, O. Kohlemainen, F. A. A. C.
Heavyweight—J. Manger, G. A. A. C.; 2, K. Bucher, G. A. A. C.

National Collegiate Championships, held at Columbus, O., March 29-30.

Team scores: Oklahoma A. & M., 26; Michigan, 18; Oklahoma Univ., 13; Illinois, 11.

Individual winners by classes: 115 lbs.—Sapora, Illinois; 125 lbs.—Mantooth, Oklahoma Univ.; 135 lbs.—Minot, Illinois; 145 lbs.—Bancroft, Oklahoma A. & M.; 155 lbs.—Van Beeber, Oklahoma A. & M.; 165 lbs.—Caldwell, Oklahoma A. & M.; 175 lbs.—Stafford, Cornell Univ.; *Heavyweight—McCready Oklahoma A. & M.
*Retained title.

Eastern Intercollegiate Championships, held at Bethlehem, Pa., March 15-16.

Team scores: Lehigh, 26; Penn State, 20; Cornell, 20; Yale, 16; Princeton, 8.

Individual winners by classes: 115 lbs.—Josefson, Cornell; 125 lbs.—Wilson, Penn State; 135 lbs.—Dodd, Yale; 145 lbs.—Sargant, Yale; 158 lbs.—Graham, Princeton 75 lbs.—Stafford, Cornell; Unlimited Class—Miller, Lehigh.

A. B. C. highest records—Five Men Team Event (1927) Tea Shops, Milwaukee, 3,190; Two Men Team Event (1924), C. Thoma and E. Thoma, Chicago, 1,380; Individual Event (1924) H. E. Smyers, Pittsburgh, Pa., 749; All Events (1923), W. J. Knox, Philadelphia, Pa., 2,019; High Single Individual Game (1913), W. J. Knox, Philadelphia, Pa., 300.

World's Records—*All Events*—Mortimer Lindsey, New Haven, Conn., 2,031 for 9 games, averaging 225 6-9, in N. B. A. tournament at Paterson, N. J., 1912; James Smith, Buffalo, N. Y., 2,060 for 9 games, averaging 228 8-9, in Canadian Bowling Association tournament at Toronto, Ont., 1912.

Highest Woman's Score—Mrs. Nellie Lester, New York, 277, 1909.

Five Woman Team—3 games, 2,541, Birk Cola, Toledo, Ohio, May 3, 1922.

Two Men, Open — Knox-Satterwaite, Philadelphia, Pa., 537, Feb. 18, 1912.

Three Men, Open—Mortimer Lindsey, Glenn Riddell, Alex Dunbar, New York, 757, 1908.

Five Men, Open—All wooden balls—Algonquins, New York, Columbia Alleys, New York, 1,175; 1906; Vermonts, Chicago, 1,290, 1917.

Tournaments—Howard Majors, Chicago, 1,207, 1907; Koenig and Kaiser team, St. Louis, Mo., 1,207, 1908; Burkes, St. Louis, Mo., 1,207, 1909.

N. Y. State Bowling Tournament 1929 Champions at Schenectady—5-man, Vacarro Shoes, Rochester, 3,062; 2-man, Stein-Shaughnessy, Syracuse, 1,317; individual, W. O. Hearn, Lockport, 739; all events, Joe Falcaro, N. Y. City, 1,956.

At West New York, N. J., Feb. 18, 1929 the Lady Actives No. 1 made a single game score of 1,064, and a 3-game score of 3,001.

Andy Hiltenbrand captured, in 1929, two bowling championships. He took the metropolitan singles (N. Y. City) crown with a score of 739, rolling 248, 223 and 268 with the final squad and then took the all-events title with a score of 1,957.

Lawn Bowling—The third international lawn bowling cup match was played at Pasadena, Calif., in 1929, and was decided in favor of the Pasadena Lawn Bowling Club, which defeated the English club, 182 to 168.

PIGEON SPEED RECORDS.

(By Commander A. H. Douglas, U. S. Naval Air Station, Anacostia, D. C.)

After the World War many of the Naval Pigeons were shipped back from Europe and housed at the Naval Air Station, Anacostia, D.C.; very little being known about the strain and type of these birds. New records were established in place of the old ones that had been lost or destroyed. Stud records were built up and the breeding and flying of the birds underwent the experimental stage in order to obtain data for more efficient selection and breeding.

And at the present time birds are housed at the Anacostia loft which have flown successfully over every course leading into Washington, D. C.

When weather conditions are favorable, pigeons fly at an average speed of about a mile a minute.

The fastest speed ever recorded by a pigeon in a race was 3.317 yards per minute.

Under good weather conditions a pigeon makes a flight of five to six hundred miles from daylight to dark. Most speed and long-distance records of racing pigeons are made in the Middle West, where the country is level and changes in weather are not so frequent as in many other parts of the country.

The best thousand mile record is held in Fort Wayne, Indiana. The bird was bred and flown by C. W. Oetting. The time was 1 day, 10 hours, 22 minutes, 29 seconds.

The longest pigeon flight on record is 2,016½ miles. This bird was bred and flown by E. S. Peterson, formerly an Ensign in the U. S. Navy pigeon service and in charge of pigeons overseas during the World War.

"Aerial Lad," an outstanding bird at the Anacostia loft, flew the five hundred mile race from Nappanee, Indiana, to Washington, D. C., at an average speed of 1,234 yards per minute.

"Admiral" duplicated this performance two years later, making even a better speed, and this year a son of "Admiral" won the same race, making an average speed of 1,500 per minute.

The "Skipper" established a new record for any race flown in Washington when he flew 110 miles from Cumberland, Maryland, to Washington, D. C., in 86 minutes, or at a speed of 2,240 yards per minute.

However, these performances are surpassed by the record of U. S. Navy Pigeon 617 B.C.C. who, as a yearling was flown 300 miles, and as a two year old he flew two 500-mile races and one 600-mile race being the winner of the 500-mile race. He was the Navy bird in each of these races.

In 1929 he had his best year as he won firsts at 500 miles and at 600 miles, flying 500 miles four times and 600 miles twice.

His long-distance record to date is six 500-mile races, finishing three of these races on the same day and three 600-mile races all of which he finished on the second day.

About the middle of July, in any year, all the birds raised before and up to the end of May are old enough to be trained.

First they are taken about a mile from home, then two miles, and later the distance is increased slowly until they are trained to fifty miles.

After the fifty-mile training-fly they can be jumped to the hundred-mile station or to the two-hundred-mile station, depending on the method the fancier has adopted for flying his birds.

In the second year, as they enter their prime, their career usually begins, although some distinguish themselves as "Yearlings."

By the time they pass their second year they are seasoned old birds, and in America they are flown up to one thousand miles.

There are approximately 700 carrier pigeons in the Navy today, lofts being in operation at several points on the east and west coast of the United States, and Panama and Honolulu.

PRODUCTION OF GOLD AND SILVER IN THE WORLD SINCE 1870.

(The annual production of 1860 to 1872 is obtained from five-year period estimates compiled by Dr. Adolph Soetbeer. Since 1872 the estimates are those of the Bureau of the Mint.)

Grease (including soap stock) and tallow	62,925,675	30,095,271	29,012,698	3,817,706

Does not include value of canned sausage.

REPUBLICAN STATE CHAIRMEN AND VICE CHAIRWOMEN.

Alabama—Joseph C. Swann, Mobile.
Arizona—George W. Mickle, Phoenix; Mrs. Clifford Parsons, Tucson.
Arkansas—Andrew J. Russell, Little Rock.
California—Frank F. Merriam, Long Beach; Mrs. Mabel V. Socha, Los Angeles; Mrs. Mattie Chandler, Richmond; Headquarters, Palace Hotel, San Francisco.
Colorado—John R. Coen, Sterling; Mrs. Minnie H. Velhagen, Alamosa.
Connecticut—J. Henry Roraback, Hartford; Miss Katherine Byrne, Putnam.
Delaware—J. Warren Marshall, Wilmington; Mrs. Julia Hays Ashbrook, Wilmington.
Florida—(Vacancy, Sept. 10, 1929.) Mrs. Lora T. Edwards, Lakeland.
Georgia—Roscoe Pickett, Jasper.
Idaho—John McMurray, Oakley.
Illinois—Perry B. McCullough, Lawrenceville.
Indiana—Elza Rogers, Lebanon; Miss Mary Sleeth, Rushville.
Iowa—Willis L. Stern, Logan; Mrs. Gordon L. Elliott, Des Moines.
Kansas—Alfred M. Landon, Topeka; Mrs. Ida M. Walker, Norton.
Kentucky—R. W. Hunter, Providence; Mrs. Christine Bradley South, Frankfort.
Louisiana—M. E. Norman, Morgan City; Mrs. Lillian T. Martin, Ruston.
Maine—Daniel F. Field, Phillips; Mrs. Eva C. Mason, Dover-Foxcroft.
Maryland—Galen L. Tait, Baltimore; Mrs. Calvin Gabriel, Baltimore.
Massachusetts—Amos Taylor, Belmont; Mrs. Frank R. Batchelder, Worcester; Headquarters, 11 Beacon St., Boston.
Michigan—Howard C. Lawrence, Lansing; Mrs. Jacob Steketee, Grand Rapids.
Minnesota—Ludwig I. Roe, St. Paul; Mrs. Winifred N. Campbell, Slayton.
Mississippi—S. D. Redmond, Jackson.
Missouri—B. G. Voorhees, St. Joseph; Mrs. Dorys Farley, West Plains.
Montana—A. H. Brown, Billings; Mrs. Frank Bartos, Helena.
Nebraska—Edgar Ferneau, Auburn; Mrs. Lulah T. Andrews, Omaha.
Nevada—Noble H. Getchell, Reno; Mrs. F. E. Humphrey, Reno.
New Hampshire—Benjamin F. Worcester, Concord; Mrs. Elwin L. Page, Concord.
New Jersey—E. Bertram Mott, Morristown; Mrs. John D. Berry, Newark; Headquarters, Trenton.
New Mexico—E. L. Safford, Santa Fe; Miss Margaret Chadwick, Albuquerque.
New York—William J. Maier, Seneca Falls; Miss Sarah Schuyler Butler, New York City. Headquarters, 9 E. 41st St., New York City.
North Carolina—Brownlow Jackson, Hendersonville; Mrs. Lillian B. Rodgers, Wilmington.
North Dakota—J. A. Dinnie, Grand Forks.
Ohio—Arthur Nixon, Dayton; Mrs. Louise Ogden de Voe, Ashland.
Oklahoma—(Vacancy, Sept. 10, 1929.) Mrs. T. B. Ferguson, Watonga.
Oregon—Phil Metschan, Portland; Mrs. E. C. Giltner, Portland.
Pennsylvania—Edward Martin, Washington; Mrs. Chas. F. Stauffer, Lancaster; Headquarters, 15th and Chestnut Sts., Philadelphia.
Rhode Island—William C. Pelkey, Providence; Mrs. Louis A. Olney, Saylesville.
South Carolina—Joseph W. Tolbert, Greenwood.
South Dakota—A. A. Chamberlain, Huron; Mrs. E. F. Wilson, Huron.
Tennessee—Howard B. Shofner, Nashville; Mrs. R. M. Short, Oakdale.
Texas—Eugene Nolte, Seguin.
Utah—Carl Marcuson, Price; Mrs. Jesse F. Cannon, Salt Lake City; Mrs. Jeannette M. Morrell, Ogden.
Vermont—Leonard F. Wing, Rutland; Mrs. Margaret M. Tucker, Brattleboro.
Virginia—R. H. Angell, Roanoke; Mrs. Murray Boocock, Keswick.
Washington—Hinton D. Jonez, Tacoma; Mrs. E. C. Young, Spokane.
West Virginia—Chas. E. Carrigan, Moundsville; Mrs. Thomas H. Scott, Bluefield.
Wisconsin—
Wyoming—L. C. Hinkle, Cheyenne; Mrs. R. A. Morton, Cheyenne.
Dist. of Columbia—Samuel J. Prescott, Washington; Mrs. Virginia White Speel, Washington.

ARKANSAS OR ARKANSAW?

(From the Official Manual of that State)

From 1844 to 1848 the State was represented in the United States Senate by Chester Ashley and Ambrose H. Sevier.

Ashley, a New Englander by birth, always pronounced the name of the State phonetically as it is spelled, "Ar-kan-sas."

Sevier, a Tennesseean, the grandnephew of Col. John Sevier, the hero of King's Mountain and the Governor of the "State of Franklin," as Tennessee was then called, always gave to the last syllable of the name of his adopted State the pronunciation of the broad "a," as if it were spelled "Ar-kan-saw."

At that time Mr. Dallas was Vice-President, and in addressing Mr. Ashley, always said, "the Senator from Arkansas," while Mr. Sevier was always "the Senator from Ar-kan-saw."

The opinion of the people differed on this subject, as did the opinions of the Senators. Finally, to settle the disputation, the General Assembly of 1881 appointed a learned and able committee to investigate the whole subject.

This committee made a critical and exhaustive examination, and, based upon the report of this committee, the General Assembly unanimously adopted the following concurrent resolution, in March that year—

"Whereas, Confusion of practice has arisen in the pronunciation of the name of our State, and it is deemed important that the true pronunciation should be determined for use in oral official proceedings; and,

"Whereas, The matter has been thoroughly investigated by the State Historical Society of Little Rock, which have agreed upon the correct pronunciation, as derived from history and the early use of the American immigrants; be it, therefore,

"Resolved, by both houses of the General Assembly, That the only true pronunciation of the name of the State, in the opinion of this body, is that received by the French from the native Indians, and committed to writings in the French word representing the sound, and that it should be pronounced in three syllables, with the final 's' silent, the 'a' in each syllable with the Italian sound, and the accent on the first and last syllables, being the pronunciation formerly universally and now still most commonly used, and that the pronunciation with the accent on the second syllable with the sound of 'a' as in 'man' and the sounding of the terminal 's' is an innovation to be discouraged."

ADAM AND EVE.

To the Scriptural account of the creation and fall of Adam and Eve, the later Jewish writers in the Talmud have made many additions

According to them, the stature of Adam, when first created, reached to the heavens, while the splendor of his countenance surpassed that of the sun. The very angels stood in awe of him, and all creatures hastened to worship him.

Then the Lord, in order to show the angels his power, caused a sleep to fall upon Adam, and removed a portion of every limb. He thus lost his vast stature, but remained perfect and complete.

His first wife was Lilith, the mother of demons, but she fled from him, and afterwards Eve was created for him.

At the marriage of Adam and Eve angels were present, some playing on musical instruments, others serving up delicious viands, while the sun, moon, and stars danced together.

The happiness of the human pair excited envy among the angels, and the seraph Sammael tempted them, and succeeded in leading them to their fall from innocence.

According to the Koran, all the angels paid homage to Adam excepting Eblis, who, on account of his refusal, was expelled from Paradise. To gratify his revenge, Eblis seduced Adam and Eve, and they were separated.

Adam was penitent, and lived in a tent on the site of the Temple of Mecca, where he was instructed in the divine commandments by the Archangel Gabriel.

After two hundred years of separation, he again found Eve on Mount Ararat.

GOVERNORS AND U.S. SENATORS OF IDAHO.

The Government of the State of Idaho was established by the Constitution which went into effect on July 3, 1890.

Governors—George L. Shoup, 1890; N. B. Wiley, 1891-1892; William J. McConnell, 1893-1896; Frank Steunenberg, 1897-1900; Frank W. Hunt, 1901-1902; John T. Morrison, 1903-1904; Frank R. Gooding, 1905-1908; James H. Brady, 1909-1910; James H. Hawley, 1911-1912; John M. Haines, 1913-1914; Moses Alexander, 1915-1918; D. W. Davis, 1919-1922; C. C. Moore, 1923-1926; H. C. Baldridge, 1927—.

U. S. Senators—W. J. McConnell, 1891; George L. Shoup, 1891-1901; Fred T. Dubois, 1891-1897; 1901-1907; Henry Heitfeld, 1897-1903; Weldon B. Hayburn, 1903-1912· William E. Borah, 1907 ——· Kirtland I. Perky, 1912-1913; James H. Brady, 1913-1918; John F. Nugent, 1918-1921; Frank R. Gooding, 1921-1928; John Thomas, 1928—.

BUREAU OF BLUE SKY.

Idaho has in its Department of Finance what is officially known as the *Bureau of Blue Sky;* which analyzes applications to sell stock, shares or bonds in Idaho, and none may be sold by companies or corporations issuing them except on a permit issued by it.

This permit does not end the supervisory power of the bureau, which continues throughout, and the permit may be revoked at any time such companies do not meet with its requirements of supervision or change of unsafe plans.

HOW WAS SOUTH AMERICA PEOPLED?

The South American continent, according to Marshall H. Saville, was peopled from the north by two possible lines of migrations, namely, along the Pacific coast of Central America, and along the Mosquito coast of the Caribbean Sea; but the narrow Isthmus of Panama made it possible for either of these two route migrations to radiate in three streams after entering the southern continent.

The line of least resistance was the Pacific coast, for it is possible for frail crafts to navigate from Central America southward almost to the Equator without entering the ocean except at rare intervals, due to the inland waterways created by the almost continuous stretch of mangrove swamps and small islets.

The other southern route was through the inter-Andean valleys, while another line of migration was eastward along the northern coast of the continent.

The little explored culture areas of the northwestern Pacific coast present types of artifacts quite similar in character to those of Central America.

Many features of the archaeology of the region show decided Mayan and Chorotegan influences. Here the cultural relations are much closer to Central America than to the widely extended Peruvian complex to the south.

IOWA.

(Presidential vote, 1928, 1924.)

PAST VOTE OF KANSAS.

1872 (Pres.), Greeley, Dem. and Lib., 32,970; Grant, Rep., 67,048; O'Conor, Lab. Ref., 156.

1876 (Pres.), Tilden, Dem., 37,902; Hayes, Rep., 78,354; Cooper, Greenback, 7,770.

1880 (Pres.), Hancock, Dem., 59,801; Garfield, Rep., 121,549; Weaver, Greenback, 19,851.

1884 (Pres.), Cleveland, Dem., 90,132; Blaine, Rep., 154,406; St. John, Proh., 4,495; Butler, Greenback, 16,341.

1888 (Pres.), Cleveland, Dem., 102,745; Harrison, Rep., 182,904; Fisk, Proh., 6,779; Streeter, United Labor, 31,788.

1892 (Pres.), Harrison, Rep., 157,241; Weaver, People's, 163,111; Bidwell, Proh., 4,553. The Democrats fused with the People's Party.

1894 (Gov.), Dem., 26,709; Rep., 148,697; Pop., 118,329; Proh., 5,496.

1896 (Pres.), Bryan, Dem., and People's (Populist), 172,915; Palmer, Nat'l (Gold) Dem., 1,209; McKinley, Rep., 159,345; Levering, Proh., 2,318.

1900 (Pres.), Bryan, Dem., 162,601; McKinley, Rep., 185,955; Woolley, Proh., 3,605; Debs, Soc., 1,605.

1904 (Pres.), Parker, Dem., 86,174; Roosevelt, Rep., 212,955; Swallow, Proh., 7,306; Debs, Soc., 15,869.

1908 (Pres.), Bryan, Dem., 161,209; Taft, Rep., 197,216; Chafin, Proh., 5,033; Debs, Soc., 12,420.

1912 (Pres.), Wilson, Dem., 143,663; Taft, Rep., 74,845; Roosevelt, Prog., 120,210; Debs, Soc., 26,779.

1914 (U. S. Sen.), Dem., 176,929; Rep., 180,823; Prog., 116,755; Soc., 24,502; Proh., 9,885.

1916 (Pres.), Wilson, Dem., 314,588; Hughes, Rep., 277,658; Hanly, Proh., 12,882; Benson, Soc., 24,685.

1916 (Gov.), Dem., 192,037; Rep., 354,519.

1918 (U. S. Sen.), Dem., 149,300; Rep., 281,931; Soc., 11,429.

1920 (Pres.), Cox, Dem., 185,464; Harding, Rep., 369,268; Debs, Soc., 15,511.

1920 (U. S. Sen.), Dem., 170,443; Rep., 327,072; Soc., 13,417.

KANSAS CROPS—THEN AND NOW.

Kansas, in 1860, grew 168,527 bushels of wheat; 5,678,834 bushels of corn, and 80,744 bushels of oats.

In 1928, that State grew 177,860,700 bushels of wheat, 179,116,320 bushels of corn, and 37,727,752 bushels of oats.

In the United States, Kansas ranked first in wheat production in 1913, 1914, 1916, 1919, 1920, 1921, 1923, 1924, 1926, and 1928.

President (1928)—Thomas, Soc., 6,262; Foster, Workers, 2,464; Reynolds, Soc. Lab., 773.
U. S. Senator (1928)—Walsh, Dem., 818,055; Young, Rep., 693,563; Lewis, Soc., 7,675; Ballam, Workers, 5,621.
Governor (1928)—Allen, Rep., 769,372; Cole, Dem., 750,137; Mary Hapgood, Soc., 7,486; Bixby, Workers, 4,495; Cook, Proh., 3,098; Surridge, Soc. Lab., 1,374; Edith MacFadden, Ind., 928.
In 1928, sentiment in favor of repeal of the prohibition amendment was expressed by a majority of the voters in 33 of the 36 State Senate Districts of Massachusetts, while three districts returned a majority against repeal. The subject went before the voters in the form of a "question of public policy," which appeared on the ballots in all but four of the forty Senate Districts.
In 1928, also, Massachusetts voters legalized Sunday sports, leaving it to local Councils or other qualified officials to pass enabling ordinances.
President (1924)—Foster, Workers' Party, 2,637; Johns, Soc.-Lab., 1,668.
Governor (1926)—Gaston, Dem., 407,389; Fuller, Rep., 595,006.

U. S. Senator (1928)—Stephens, Dem., 111,180; no opposition.

Governor (1927)—T. G. Bilbo, Dem., won. In the second primary the vote was: Bilbo, 147,669; Murphree, 137,130.

U. S. Senator (1924)—Harrison, Dem., 97,243, unopposed.

Governor (1923)—Whitfield, Dem., was elected without opposition. In the Democratic primary election, Aug. 28, 1923, Whitfield got 111,565 votes, and former Gov. Bilbo received 95,023.

U. S. Senator (1922)—Stephens, Dem., 63,639; Cook, Rep., 3,632; Rose, Soc., 1,251.

PAST VOTE OF MISSISSIPPI.

1872 (Pres.), Greeley, Dem. and Lib., 47,288; Grant, Rep., 82,175.
1876 (Pres.), Tilden, Dem., 112,173; Hayes, Rep., 52,605.
1880 (Pres.), Hancock, Dem., 75,750; Garfield, Rep., 34,854; Weaver, Greenback, 5,797.
1884 (Pres.), Cleveland, Dem., 76,510; Blaine, Rep., 43,509.
1888 (Pres), Cleveland, Dem., 85,467; Harrison, Rep., 31,120; Fisk, Proh., 258.
1892 (Pres.), Cleveland, Dem., 40,288; Harrison, Rep., 1,342; Weaver, People's, 10,102; Bidwell, Proh., 995. The Republican vote was cast mostly for Weaver.
1896 (Pres.), Bryan, Dem. and People's (Populist), 63,793; Palmer, Nat'l (Gold) Dem., 1,071; McKinley, Rep., 5,123; Levering, Proh., 485.
1900 (Pres.), Bryan, Dem., 51,706; McKinley, Rep., 5,753.
1904 (Pres.), Parker, Dem., 53,374; Roosevelt, Rep., 3,187; Debs, Soc., 392.
1908 (Pres.), Bryan, Dem., 60,287; Taft, Rep., 4,363; Debs, Soc., 978.
1912 (Pres.), Wilson, Dem., 57,227; Taft, Rep., 1,595; Roosevelt, Prog., 3,645; Debs, Soc., 2,061.
1916 (Pres.), Wilson, Dem., 80,422; Hughes, Rep., 4,253; Benson, Soc., 1,481.
1916 (U. S. Sen.), Dem., 74,290 (unopposed).
1920 (Pres.), Cox, Dem., 69,277; Harding, Rep., 11,576; Debs, Soc., 1,639.

SPEED OF A FALLING BODY.

The popular belief that a person falling from a great altitude will be killed or rendered unconscious before reaching the ground has been exploded by Army fliers, says the War Department.

"The experimental department of Wright Field of the Army Air Corps," it declared, "can definitely state that a man falling from any altitude with a parachute pack attached never attains a velocity of greater than 118 miles per hour and does not lose consciousness."

A dummy of the size and weight of a 180 pound man, with a service parachute attached and unopened, attained, it was found, a velocity of 118 miles an hour within a period of eleven seconds and after falling 1,200 feet in quiet air, but from that time on no increase in speed was attained.

In the first second of its descent a body falls 16 feet; second second, 16+32=48 feet; third second, 16+64=80 feet; fourth second, 16+96=112 feet; fifth second, 16+128=144 feet; nth second, 16+32 (n-1) feet. The total distance fallen by a body at the end of the nth second is given in feet by multiplying the square of the time in seconds by 16.

Thus at the end of the first second it has fallen 16 feet, at the end of the second second $2 \times 2 \times 16 = 64$ feet, at the end of the third second $3 \times 3 \times 16 = 144$ feet; at the end of the fifth, $5 \times 5 \times 16 = 400$ feet. Conversely, to find the time in seconds to fall any distance, divide the distance in feet by 16 and extract the square root; thus to fall a mile divide 5,280 by 16 which gives 330 and the square root of 330 is a little over 18, the number of seconds which is the vacuum time to fall a mile. Owing to the resistance of the air it takes about 19 seconds for a bomb to reach the earth when dropped from an airplane a mile high.

As the air resistance encountered by a falling body depends on the shape and size of the body no general rule can be given for taking account of it, except to say that the air resistance increases with the velocity. The force of gravity on a body one mile above the surface of the earth is less than if the body were at the surface of the earth by about one-twentieth of one percent.

MISSOURI.

GOVERNORS OF MONTANA

TERRITORIAL GOVERNORS

Sidney Edgerton—June 22, 1864 to July 12, 1866.
Green Clay Smith—July 13, 1866 to April 9, 1869.
James M. Ashley—April 9, 1869 to July 12, 1870
Benjamin F. Potts—July 13, 1870 to Jan. 14, 1883.
J. Schuyler Crosby—Jan. 15, 1883 to Dec. 15, 1884.
B. Platt Carpenter—Dec. 16, 1884 to July 13, 1885.
Samuel T. Hauser—July 14, 1885 to Feb. 7, 1887
Preston H. Leslie—Feb. 8, 1887 to April 8, 1889
Benjamin F. White—April 9, 1889 to Nov. 8, 1889.

STATE GOVERNORS

Joseph K. Toole—Nov. 8, 1889 to Jan 2, 1893—Jan. 7, 1901 to April 1, 1908 (2 terms)
John E. Rickards—Jan. 2, 1893 to Jan 4, 1897.
Robert E. Smith—Jan. 4, 1897 to Jan. 7, 1901.
Edwin L. Norris—April 1, 1908 to Jan. 1, 1913.
S. V. Stewart—Jan. 1, 1913 to Jan. 1, 1921.
Jos. M. Dixon—Jan. 1, 1921 to Jan. 1, 1925.
J. E. Erickson—Jan. 1, 1925 to—.

WHAT SHOE SIZES MEAN.

By Seward M. Paterson, a Manufacturer, of Nashua, N. H.

All shoe measurements start with the last on which the shoe is made. Lasts are measured for length with what is known as a size stick.

This is a measuring device that has been in existence for a long time and we find by its use that the difference between sizes on lasts for length *is one-third of an inch.*

When we speak of the width of a shoe there are two things to consider. First, the girth of the last, second the width of the tread surface of the last.

The difference between widths on the girth of the last *is one-quarter of an inch.*

The difference between widths on the tread surface of the last at the widest point, which is the ball, is *generally one-twelfth of an inch,* although this tread surface is subject to the different ideas of the shoe manufacturer.

For example, if a manufacturer was working out a brogue-type last the tendency would be to have the differnce one-twelfth of an inch, whereas on a fine dress-shoe last the difference would not be over one-sixteenth of an inch.

What is known as blind or French sizes are marked on shoes so that the customer cannot readily tell what the sizes and widths are. It is done with the idea of making the customer happy.

To summarize—the difference between sizes on a shoe for length is one-third of an inch.

The difference in measurements between widths is one-quarter of an inch.

On half sizes the difference, of course, would be exactly one-half of the whole sizes

FOOT SIZES IN HOSIERY.

Size 8 in women's hosiery, for example, measures eight inches from the top of the toe to the end of the heel when measured according to the standard method adopted by the National Association of Hosiery and Underwear Manufacturers.

Each larger size is half an inch longer.

The sizes of men's hosiery are the same as those of women's.

In women's hosiery no distinction is made in the leg length for the different foot sizes.

NEBRASKA.

(Presidential vote, 1928, 1924.)

President (1924)—Johns, Soc. Lab., 2,223; Foster, Communist, 5,371.

150,194 VOTERS QUALIFIED IN 1928 IN NEW YORK STATE BY LITERACY TEST.

Total certificates issued, by years—(1924) 64,024; (1925) 33,956; (1926) 37,000; (1927) 48,605; (1928) 150,194.

Women receiving certificates—(1924) 15,540; (1925) 8,496; (1926) 8,976; (1927) 12,768; (1928) 53,349.

Men receiving certificates—(1924) 48,574; (1925) 25,460; (1926) 28,024; (1927) 37,837; (1928) 93,845.

The above figures concern only the literacy tests around election time

An act approved by Governor F. D. Roosevelt in 1929 provides that the domicile of a married woman shall be established by the same facts and rules of law as that of any other person, for the purpose of voting and office holding.

Another 1929 Act amends the Election Law, by providing for central registration of a voter, between June 1 and September 10, whose duties, business or occupation require him to be elsewhere, instead of "elsewhere in the United States," as now provided.

Pres. (1924) Faris, Proh., 13.

U. S. Senator (1926)—Overman, Dem., 218,934; Hayes, Rep., 142,891.

Governor (1924)—McLean, Dem., 294,441; Meekins, Rep., 185,627.

U. S. Senator (1924)—Simmons, Dem., 295,404; Whitener, Rep., 184,393.

PAST VOTE OF NORTH CAROLINA.

1872 (Pres.), Greeley, Dem. and Lib., 70,094; Grant, Rep., 94,769.

1876 (Pres.), Tilden, Dem., 125,427; Hayes, Rep., 108,417.

1880 (Pres.), Hancock, Dem., 124,208; Garfield, Rep., 115,874; Weaver, Greenback, 1,126.

1884 (Pres.), Cleveland, Dem., 142,592; Blaine, Rep., 125,068; St. John., Proh., 454.

1888 (Pres.), Cleveland, Dem., 148,336; Harrison, Rep., 134,784; Fisk, Proh., 2,789; Streeter, United Labr, 47.

1892 (Pres.), Cleveland, Dem., 133,098; Harrison, Rep., 100,565; Weaver, People's, 44,732; Bidwell, Proh., 2,630.

1896 (Pres.), Bryan, Dem; and People's, (Populist), 174,488; Palmer, Nat'l (Gold) Dem., 578; McKinley, Rep., 155,243; Levering, Proh., 681.

1900 (Pres.), Bryan, Dem., 157,752; McKinley, Rep., 133,081; Woolley, Proh., 1,009.

1904 (Pres.), Parker, Dem., 124,121; Roosevelt, Rep., 82,625; Swallow, Proh., 361; Debs, Soc., 124.

1908 (Pres.), Bryan, Dem., 136,995; Taft, Rep., 114,937; Debs, Soc., 378.

1912 (Pres.), Wilson, Dem., 144,507; Taft, Rep., 29,139; Roosevelt, Prog.,69,130; Debs., Soc., 1,025.

1912 (Gov.), Craig, Dem., 149,975; Settle, ReZ. 43,625; Meares, Ind., 49,930.

1914 (U. S. Sen.), Dem., 121,342; Rep., 87,101.

1916 (Pres.), Wilson, Dem., 168,383; Hughes, Rep 120,890; Hanly, Proh., 53; Berger, Soc., 509.

1916 (Gov.) Bickett, Dem., 167,761; Linney, Rep. 120,157.

1918 (U. S. Sen.), Dem., 143,524; Rep., 93,697.

1920 (Pres.), Cox, Dem. 305,447; Harding, Rep., 232,848; Watkins, Proh., 17; Debs, Soc., 446.

1920 (U. S. Sen.), Dem., 310,504; Rep., 229,343.

1920 (Gov.), Morrison, Dem., 308,151; Parker, Rep. 230,175.

GOVERNORS OF NORTH CAROLINA SINCE 1836.

E. B. Dudley, 1836; J. M. Morehead, 1841; W.A. Graham, 1845; Charles Manly, 1849; D. S. Reid, 1851; Warren Winslow, 1854; Thomas Bragg, 1855; John W. Ellis, 1859.

Henry T. Clark, 1861; Zebulon B. Vance, 1862; W. W. Holden, 1865; Jonathan Work, 1866; W. W. Holden, 1868.

T. R. Caldwell, 1870; C. H. Brogden, 1874; Z. B. Vance, 1877; T. J. Jarvis, 1879; A. M. Scales, 1885; D. G. Fowle, 1889; Thomas M. Holt, 1891; Elias Carr, 1893; D. L. Russell, 1897.

C. B. Aycock, 1901; R. B. Glenn, 1905; W. W. Kitchin, 1909; Locke Craig, 1913; Thomas W. Bickett, 1917; Cameron Morrison, 1921; Angus W. McLean, 1925; O. Max Gardner, 1929.

North Carolina, 1585-1587, was under the Governors of Virginia who were appointed by Sir Walter Raleigh.

Then the colony was under the Proprietors, 1663-1728; under the Crown, 1728-1775; ruled by presidents on the Provincial Council, 1775-1776; the Governors were elected by the Legislature, 1776-1835.

President (1928)—Thomas, Soc., 842; Foster, Workers, 936.

U. S. Senator (1928)—Frazier, Rep., 159,940; Burchard, Dem., 38,856; Knutsen, F.-Lab., 2,047.

Governor (1928)—Shafer, Rep., 131,193; Maddock, Dem., 100,205; Loesch, F.-Lab., 824.

State prohibition enforcement was upheld in 1928 when the people, 103,696 to 96,837, voted to keep the clause in the State Constitution.

Pres. (1924)—Foster, Workers, 370.

U. S. Senator (1926)—Burchard, Dem., 13,519; Nye, Rep., 107,921; Stone, Ind., 9,738; Nelson, Ind., 18,951; Lemke, Ind., 4,977.

PAST VOTE OF NORTH DAKOTA.

1892 (Gov.), Fusion, 18,995; Rep., 17,236.

1892 (Pres.), Harrison, Rep., 17,506; Weaver, People's, 17,700; Bidwell, Proh., 899. The Democrats fused with the People's Party.

1896 (Pres.), Bryan, Dem; and People's, (Populist), 20,686; McKinley, Rep., 26,335.

1900 (Pres.), Bryan, Dem., 20,531; McKinley, Rep., 35,898; Woolley, Proh., 735; Debs. Soc., 520.

1904 (Pres.), Parker, Dem., 14,273; Roosevelt, Rep., 52,595; Swallow, Proh., 1,140; Debs, Soc., 2,117.

1908 (Pres.), Bryan, Dem.' 32,885; Taft, Rep., 57,680; Chafin, Proh., 1,553; Debs, Soc., 2,421.

1912 (Pres.), Wilson, Dem., 29,555; Taft, Rep., 23,090; Roosevelt, Prog., 25,726; Debs, Soc., 6,966.

1914 (U. S. Sen.), Dem., 29,918; Rep., 48,583; Prog. 2,597; Soc., 5,468.

1916 (Pres.), Wilson, Dem., 55,206; Hughes, Rep., 53,471.

1916 (Gov.), Dem., 20,351; Rep., 87,665; Soc., 2,615.

1916 (U. S. Sen.), Dem. 40,988; Rep. 57,714; Soc., 8,472.

1920 (Pres.), Cox, Dem., 37,422; Harding, Rep., 160,072; Debs, Soc., 8,282.

1920 (Gov.), Dem.-Ind., 112,488; Rep.-Non-Partisan, 117,118.

1920 (U. S. Sen.), Dem., 88,495; Rep., 130,614.

BOY SCOUTS OF AMERICA.

(Incorporated Feb. 8, 1910; Chartered by Congress June 15, 1916.)

Headquarters, 2 Park Avenue, New York City.

National Council Officers—*Honorary President*—Herbert Hoover; *Honorary Vice Presidents*—Calvin Coolidge, William H. Taft, Colin H. Livingstone, Daniel C. Beard, and W. G. McAdoo.

President—Walter W. Head, Chicago; *Vice President*—Mortimer L. Schiff, Oyster Bay, N. Y.; *Vice President*—Milton A. McRae, Detroit; Mich. *Vice President*—Charles C. Moore, San Francisco, Cal.; *Vice President*—Bolton Smith, Memphis, Tenn.; *Vice President*—John Sherman Hoyt, N. Y. *National Scout Commissioner*—Daniel Carter Beard, Flushing, N. Y.; *International Commissioner*—Mortimer L. Schiff; *Treasurer*—George D. Pratt. *Chief Scout Executive*—James E. West.

BOY SCOUT MEMBERSHIP AS OF JAN. 1, 1929.

The outstanding events of the last year included (1) the extension of organization under Local Councils; (2) revision of Scout Requirements, so as to make them applicable to both boys in the country and in the city; (3) publication of a Handbook for Patrol Leaders; (4) development of the outdoor program; (5) care in safety activities; (6) attendance at the National Training School for professional Scout Leaders; (7) courses conducted for Volunteer leaders throughout the country; (8) publication of Service Library for Scout Leaders; (9) development of a National Committee on Health and Safety and the organization of local committees on this subject; (10) extension of Scouting to include direction for a vacation program for all Scouts.

The Harmon Foundation awards 52 Eagle Scouts scholarships annually. There was a "jamboree" of Scouts in England in 1929. A program is in effect for younger boys from 8 to 11 years of age.

There has been growth of Sea Scouting, that branch of the Scout Program that deals with water activities.

GEORGE WASHINGTON'S PRAYER.

Following are the words of George Washington's Prayer, which is framed and hangs in his pew in St. Paul's P. E. Chapel, Broadway and Vesey Sts. in New York City.

Almighty God, we make our earnest prayer that Thou wilt keep the United States in Thy holy protection; that Thou wilt incline the hearts of the citizens to cultivate a spirit of subordination and obedience to government; to entertain a brotherly affection and love for one another and for their fellow citizens of the United States at large.

And finally that Thou wilt most graciously be pleased to dispose us all to do justice, to love mercy, and to demean ourselves with that charity, humility and pacific temper of mind, which were the characteristics of the Divine Author of our blessed religion, and without an humble imitation of whose example in these things we can never hope to be a happy nation.

Grant our supplication, we beseech Thee, through Jesus Christ, our Lord. Amen.

The prayer, it is said, was made by Washington at St. Paul's Chapel, following his inauguration in the old Federal Building on the north side of Wall Street, facing Broad Street.

NATIONAL ACADEMY OF SCIENCES, WASHINGTON, D. C.

There are 246 living members, comprising investigators in many departments of science. The geographical distribution of members covers the United States, but this is not a factor in consideration of election, which is the result of outstanding work in science.

Carrying out the object for which the Academy was incorporated by Congress, to report upon matters in science or art whenever called upon, the Academy has often been of service to the Government.

From time to time trust funds have been established, the incomes of which are devoted to the award of medals or to grants for research.

The will of Alexander Dallas Bache, first President of the Academy, directed that the residue of his estate, after the death of his wife, should be paid over to the National Academy of Sciences for the "prosecution of researches in physical and natural science by assisting experimentalists and observers."

A recent gift was that of the Carnegie Corporation, $5,000,000, for a suitable building for the Academy and its agent the National Research Council, and an endowment for the purposes of the Academy and Research Council. The new building at B and 21st Streets was dedicated and opened to the public April 30, 1924.

TENNESSEE.

1920 (U. S. Sen.), Dem., 68,488; Rep., 217,069.

FEDERAL POWER COMMISSION.

(Headquarters, Interior Department Building, Washington, D. C.)

Commissioners—James W. Good, Secretary of War, chairman; Ray L. Wilbur, Secretary of the Interior; Arthur M. Hyde, Secretary of Agriculture. *Executive Secretary*—F. E. Bonner. *Chief Engineer*—Lieut. Col. Max C. Tyler, U. S. Army. *Chief Counsel*—Thad H. Brown. *Solicitor*—Chas. A. Russell. *Chief Accountant*—William V. King. *Chief Clerk*—F. W. Griffith.

MIXED CLAIMS COMMISSION.

United States and Germany—American Agency, 1511 K Street, Washington, D. C.

Edwin B. Parker, Umpire; Chandler P. Anderson, American Commissioner; Wilhelm Kiesselbach, German Commissioner; Robert E. Newby, Joint Secretary on behalf of the United States; Max Martin, Joint Secretary on behalf of Germany.

American Agency—Robert W. Bonynge, Agent; Harold H. Martin, Counsel and Assistant Agent; E. Russell Lutz, Attorney and Secretary.

German Agency—Karl von Lewinski, Agent; Wilhelm Tannenberg, Karl Storz, Friederich Roth, Counsel.

TRIPARTITE CLAIMS COMMISSION.

United States, Austria, and Hungary; U. S. Agency, 1511 K St., Washington.

Commissioner, Edwin B. Parker, 2001 24th Street, N. W.; Secretary, E. P. Bowyer;

American Agent, Robert W. Bonynge, 2400 16th Street, N. W.; Assistant American Agent, John J. Edwards, Argonne Apartments;

The work of the Tripartite Claims Commission, United States, Austria and Hungary, has been practically completed (Oct. 1, 1929) and the Austrian and Hungarian representatives have returned to their respective countries. Up to that date the Commission and the American Agency had not completed their reports concerning the work.

GENERAL CLAIMS COMMISSION, UNITED STATES AND MEXICO.

(Investment Building, 15th and K Sts., Washington, D. C.)

Presiding Commissioner—Commissioner appointed by the United States: Fred K. Nielsen, Nebraska; commissioner appointed by Mexico, G. Fernandez MacGregor, Mexico; secretary appointed by the United States, Benedict M. English, Nebraska; secretary appointed by Mexico, Dr. Jose Romero, Mexico; agent appointed by the United States, Clement L. Bouve, Maryland; agent appointed by Mexico, Dr. Bartolome Carbajal y Rosas, Mexico.

SPECIAL CLAIMS COMMISSION, UNITED STATES AND MEXICO.

Commissioner appointed by the United States, Ernest B. Perry, Nebraska; commissioner appointed by Mexico, F. Gonzalez Roa, Mexico; secretary appointed by the United States, Noble Warrum, Utah; secretary appointed by Mexico, J. Aspe Suinaga, Mexico; agent appointed by the United States, Clement L. Bouve, Maryland; agent appointed by Mexico, Sr. Lic. Don Aquiles Elorduy, Mexico.

GOVERNORS OF WEST VIRGINIA

Arthur I. Boreman, Rep., 1863-1869; Daniel D. T. Farnsworth, Rep., 1869; William E. Stevenson, Rep., 1869-1871; John J. Jacob, Dem., 1871-1877; Henry M. Mathews, Dem., 1877-1881; Jacob B. Jackson, Dem., 1881-1885; Emanuel W. Wilson, Dem., 1885-1890; Aretas B. Fleming, Dem., 1890-1893; William A. MacCorkle, Dem., 1893-1897; George W. Atkinson, Rep., 1897-1901; Albert B. White, Rep., 1901-1905; William M. O. Dawson, Rep., 1905-1909; William E. Glasscock, Rep., 1909-19.3; Henry D. Hatfield, Rep., 1913-1917; John J. Cornwell, Dem., 1917-1921; Ephraim F. Morgan, Rep., 1921-1925; Howard M. Gore, Rep., 1925-1929; William G. Conley, Rep., 1929-1933.

BELL TIME ON OLD-TIME SHIPS.

Time, A. M.	Time, A.M.	Time, A. M.	Time, A. M.	Time A. M.	Time, A. M.
1 Bell..... 12.30	5 Bells..... 2.30	1 Bell..... 4.30	5 Bells..... 6.30	1 Bell..... 8.30	5 Bells..... 10.30
2 Bells..... 1.00	6 " 3.00	2 Bells..... 5.00	6 " 7.00	2 Bells..... 9.00	6 " 11.00
3 " 1.30	7 " 3.30	3 " 5.30	7 " 7.30	3 " 9.30	7 " 11.30
4 " 2.00	8 " 4.00	4 " 6.00	8 " 8.00	4 " 10.00	8 " ..... Noon

The time, p. m., was the same as a. m.

On shipboard, for purpose of discipline and to divide the watch fairly, the crew was mustered in two divisions, the Starboard (right side, looking toward the head) and the Port (left).

The day commenced at noon, and was thus divided: Afternoon Watch, noon to 4 P.M.; First Dog Watch, 4 P.M. to 6 P.M.; Second Dog Watch, 6 P.M. to 8 P.M.; First Watch, 8 P.M. to Midnight; Middle Watch, 12 A.M. to 4 A.M.; Morning Watch, 4 A.M. to 8 A.M.; Forenoon Watch, 8 A.M. to noon.

This made seven Watches, which enabled the crew to keep them alternately, as the Watch which came on duty at noon one day had the afternoon next day, and the men who had only four hours' rest one night had eight hours the next.

This was the reason for having Dog Watches, which were made by dividing the hours between 4 P.M. and 8 P.M. into two Watches.

Time was kept by means of "Bells."

For the past several years practically all of the Maritime Nations have abandoned the use of the Sidereal Day in computing time for navigation purposes and are using the Civil Day instead.

The Civil Day commences at midnight and comprises the 24 hours until the following midnight.

In the American Nautical Almanac, beginning with the volume for 1925, the hours are counted in a continuous series from 0 to 24; but as ordinarily used in civil life, the hours are counted from 0 to 12 in two series, the first running from midnight to noon, and the second from noon to midnight, thus dividing the day into two periods of 12 hours each in which the hours are respectively marked A.M. (ante-meridian) and P.M. (post meridian).

WOMEN IN STATE LEGISLATURES.

In 1929 the names of 145 women were carried on the rosters of 38 state legislatures. This was a gain of 19 over the record established in the legislatures of 1927 and 1928, when 126 women served.

The political representation of the 1929 women legislators was: Republicans, 100; Democrats, 38; no party designation, 5; Non-Partisan, 2.

Outstanding results of the 1928 November election in regard to women law-makers were:

1. First woman elected to the Iowa legislature.
2. Connecticut elected 20 women, as compared to 15 in 1928.
3. Fifteen women are serving as state senators.
4. Twelve women were reelected to their fourth term.
5. Gains were made in Connecticut, Illinois, Indiana, Iowa, Kansas, Massachusetts, Minnesota, Nevada, North Dakota, South Carolina, Texas, Utah, Vermont, West Virginia, and Washington.
6. Losses were sustained in California, New Hampshire, New Jersey, North Carolina, Ohio, Oklahoma, Pennsylvania, South Dakota, and Tennessee.
7. Sixty-eight women who sat in the last legislature were reelected.

There were no women serving in the 1929 legislatures of the following states: Alabama, Delaware, Idaho, Kentucky, Louisiana, Maryland, Michigan, North Carolina, South Dakota, and Tennessee.

The legislatures of five states—Alabama, Kentucky, Louisiana, Mississippi, and Virginia—were not in session in 1929.

Since the taking of the Census of 1920 there have been several efforts in the House of Representatives to pass a reapportionment bill based on that census as provided for under Article I., Section 2, paragraph 3 of the Constitution. All had failed up to the end of 1927. If the present membership of 435 should be retained, and reapportionment based on that, these States would be entitled to additional representatives: California, 3; Connecticut, 1; Michigan, 2; New Jersey, 1; North Carolina, 1; Ohio, 2; Texas, 1; Washington, 1. These States would lose representatives: Indiana, 1; Iowa, 1; Kansas, 1; Kentucky, 1; Louisiana, 1; Maine, 1; Mississippi, 1; Missouri, 2; Nebraska, 1; Rhode Island, 1; Vermont, 1.

If reapportionment is arranged so that no States shall lose a representative it would be necessary to fix the ratio at 218,986 and increase the membership of the house to 483. Twenty-three State delegations would then be unchanged and the increases would be: Ala., 1; Ark., 1; Cal., 5; Conn., 1; Ga., 1; Ill., 3; Md., 1; Mass., 2; Mich., 4; Minn., 1; N. J., 2; N. M., 1; N. Y., 4; N. C., 2; Ohio, 4; Okla., 1; Ore., 1; Penn., 4; S. C., 1; Tenn., 1; Tex., 3; Va., 1; Wash., 1; W. Va., 1 and Wis., 1.

The House by a vote of 265 to 87 on April 8, 1926, on a vote regarding procedure refused to instruct the Census Committee to report a reapportionment bill.

Membership of House under census of 1850 was increased from 233 to 234 by act of July 30, 1852; membership under census of 1860 was increased from 233 to 241 by act of March 4, 1862; membership under census of 1870 was originally fixed at 283, but increased to 292 by act of May 30, 1872.

Representation such as shown in table was assigned after apportionment under censuses, as follows: (1790) Tenn.; (1800) Ohio; (1810) Ala., Del., Ind., La., Miss.; (1830) Ark., Mich.; (1840) Cal., Fla., Iowa, Texas, Wis.; (1850) Minn., Ore.; (1860) Neb., Nev.; (1870) Col.; (1880) Idaho, Mont., S. D., N. D., Wash., Wyo.; (1890) Utah; (1900) Okla.

Ariz. and N. Mex. were included in apportionment under 1910 census, in anticipation of becoming States.

Maine's apportionment of seven members under 1810 census was included in the 20 members originally assigned to Mass. but credited to Maine after it became a State, March 15, 1820.

The ratio under the Constitution was one Representative in Congress for each 30,000 of population. Thereafter, the ratios, as determined by the decennial censuses, were as follows: 1790 and 1800, one to each 33,000; 1810, one in each 35,000; 1820, one in each 40,000; 1830, one in each 47,700; 1840, one in each 70,680; 1850, one in each 93,423; 1860, one in each 127,381; 1870, one in each 131,425; 1880, one in each 151,911; 1890, one in each 173,901; 1900, one in each 194,182; 1910, one in each 211,877.

Of the thirteen Original States the present quotas are the same as under the Constitution in Connecticut, Delaware, Maryland, and Virginia. The original quotas in the other Original States were as follows: Georgia, 3; Massachusetts, 8; New Hampshire, 3; New Jersey, 4; New York, 6; North Carolina, 5; Pennsylvania, 8; Rhode Island, 1; and South Carolina, 5.

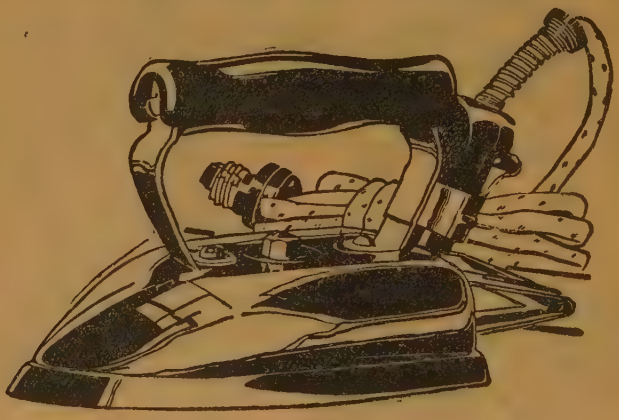
The Most Marvellous Iron Invention!

WESTINGHOUSE AUTOMATIC IRON



An Electric Iron That Minds Its Own Temperature

How many times have you wanted an electric iron that kept itself always at the right temperature for ironing? Here is such an iron. You turn on the electricity just as you do with an ordinary iron. The iron comes up to proper ironing heat and then the electricity is turned off. Then when the iron cools a few degrees the electricity is turned on again. The iron is always right for ironing because a little switch inside the iron watches the temperature for you.

This Is the Million Dollar Iron

Remember the stories in the newspapers and magazines some time ago about the young inventor who was paid a million dollars by the Westinghouse Company for an invention which made an automatic electric iron possible. This is that electric iron. When you use it a while you can see why Westinghouse was willing to pay that large sum for the invention. Hundreds of thousands of women are now using this iron. You will be too.

ASTHMA

Vapo-Cresolene makes a strong appeal to those afflicted with Bronchial Asthma, because the little lamp, used at night, is at work vaporizing the soothing remedy while the patient sleeps, and the difficult breathing is quickly relieved. A patient calls it a boon to sufferers from Asthma.

Vapo-Cresolene *"Used While You Sleep"*

Cresolene has been recommended and used with great success for 50 years for the relief of **coughs, nasal colds, bronchitis, spasmodic croup** and **whooping cough.** No home where there are children should be without a Cresolene Vaporizer.

Truth of the Stock Tape

By WILLIAM D. GANN

The best practical book giving successful trading methods on Stocks, Cotton and Grain. Enables you to stay away from the ticker and read the tape correctly. Contains rules that will enable you to determine the position of the various stocks and commodities and forecast their future course.

Four books under one cover, embracing: The Preparation and Knowledge Required; Methods of Operating and Determining Position of Stocks and Commodities. Pronounced by college professors and practical men as the greatest book ever written on the subject. First edition sold for $10.00 per copy. Price now reduced to $5.00 postpaid.

THE TUNNEL THRU THE AIR

Mr. Gann's latest book deals with the future war in the air; tells you about the cycles and rules found in the Bible for forecasting the future of nations and stock and commodity markets. It goes ahead until 1932, giving hints on the coming campaigns in stocks, cotton and grain. A fascinating, mysterious love story is interwoven with scientific knowledge, making this book interesting reading as well as instructive to men and women in every walk of life. Price $2.00, postpaid.

Play "JAZZ" on the Saxophone

BECOME a musician so quickly as to astound everyone. Learn by playing *real* music—instead of tiresome "exercises." You'll soon become the most popular person in your "set." Nothing else like it for thoroughness and rapidity. So simple that young and old find it easy to play with amazing skill. No "trick music"—but actual notes, learned right in your own home.

FREE BOOK and Demonstration Lesson

offer this wonderful musical opportunity. Send for them today before copies are exhausted. You'll be astounded by this easy, rapid way to become a veritable *master* of your favorite instrument. Instruments supplied when needed, cash or credit.

NO ONE LIKES TO GO TO A DENTIST

but the inconvenience and pain can be relieved by using DENT-ZEL-ITE. Not a toothache drop or a toothache gum but a temporary filling for the teeth.

DENT-ZEL-ITE carefully put in the cavity will remain for weeks and at the same time keep the tooth from aching, or if aching when applied, relieves it almost immediately. A marvel of relief until permanent filling can be secured.

Can be used for Children with Absolute Safety.
Sold by druggists or mailed on receipt of the price. **15c**

Vibraphones Reduce Head Noises

A new and scientific discovery stimulates the hearing processes by utilizing sound waves through small silver devices that fit the ears perfectly. The vibrators are built inside the sound chambers. The instruments are so small that your friends will seldom know you are wearing them. Comfortable, easily put in the ears or removed. No wires. No batteries. No head bands. Nothing like them. This new and scientific triumph produces marvelous results. Head noises are reduced. And hearing gradually improves. Don't be handicapped or embarrassed another day by deafness.

Write for complete details.

Body Chart

If you will mail the coupon below, this Anatomical and Physiological Chart will be mailed to you without one cent of expense. It shows the location of the Organs, Bones of the Body, Muscles of the Body, Head and Vertebra Column and tells you how the nerves radiate from your spinal cord to all organs of the body. This chart should be in every home.

Where Is That PAIN?

It may be in the neck, back, hips, stomach, liver, legs or arms. Wherever it is, the chart will help to show you the location and cause of your ailment. Hundreds of lives might have been saved if people had known the location and character of the pain.

Stop that Pain

By Relieving the Cause with

Ozone—Medical Electricity Violet Ray—Vibration

Great New Invention!

Elen Health Generators at last are ready for you! If you want more health—greater power to enjoy the pleasures and delights about you, or if more beauty is your desire—*write!* Ask for the book on these inventions which has just been prepared. It will be sent to you without cost.

Elen Electric Health Generators

These great new inventions generate Violet Ray, Vibration, Electricity and Ozone—combined or separate. They operate on the electric light in your home or on their own motive power at less than 50 cents per year. Send coupon below and get the Free Book!

Free Trial

MAIL COUPON for FREE BOOK

Don't go on as you are with pains and with almost no life and energy. You were put here to enjoy life—not just to drag through it. Do not delay another day—put your name on the coupon here. That will bring the whole story of these great new inventions. Do it today—now!

INKOGRAPH
PENCIL POINTED PEN

The Perfect Writing Instrument

It's All They Say It Is - And More!

WRITES as smoothly and easily as a lead pencil—but writes with ink on cheapest or finest paper without a miss, skip or blur. Never blots, balks, dries up, scratches, leaks or soils hands. Anyone can use your Inkograph as the round, smooth 14 Kt. gold writing point cannot be spread, injured or distorted by any style of handwriting.

Combines the best features of pen and pencil, minus their weak points, plus improvements over both.

Patent Automatic Feed prevents point from clogging. No complicated mechanism to get out of order.

Makes 1 to 4 carbon copies with original in ink. Ideal for salesmen's orders, private correspondence, office, sales and billing records or anything requiring exceptionally clear carbon copies.

Draws lines to a ruler without smear or smudge.

Beautifully made of finest quality, lustrous fountain pen material with 14 Kt. solid gold point and feed, safety screw cap, self-filling lever and clip, it is the equal of pens selling at a considerably higher price.

If dissatisfied with your fountain pen—try an Inkograph. If it does not prove entirely satisfactory, is not the handiest, best and smoothest writing instrument you ever used, return it to us and we will refund your money.

Take advantage of our free 10-day trial offer and join the many thousands who tell us that regardless of price the Inkograph is the best writing instrument they have ever used.

ALSO made in very attractive $3.00 styles, red, black or mottled hard rubber with 14 Kt. gold-filled band on cap, gold clip and gold self-filling lever. Same size as $7 and $8.75 fountain pens. Same colors and trimmings in ladies' size with gold ring on cap. $1.50 styles are black only, with self-filling lever and nickel clip or ring on cap.

Franklin Surety Co.
Assets over $1,000,000 guarantees fulfillment of all promises in this ad.

ONLY $1.50

$1000 REWARD to anybody who can prove that these testimonials were solicited by us.

Am a bank teller. Can pick up Inkograph any time in any position it writes immediately all words and numbers the same, try and do it with any other pen. Can honestly say I never found a pen so easy and tireless to write with. — C. R. Moorely, Allentown, Pa.

You don't have to prime it or pet it to get it started. Works great. — W. H. Brown, Tampa, Fla.

Have improved 50% in my handwriting since using your Inkograph. — J. R. Reed, Louisville, Ky.

Wrote 18 to 22 letters and addressed that many envelopes besides other writings with one filling. — H. L. Connelly, Evanston, Ill.

Writes smoothly, like point was greased. Makes no difference what kind of paper. Fine for shipping tags.—E. A. Simms, Jersey City, N.J.

Am tickled skinny. It's a darling, can make carbon copies of orders and send original in ink to factory instead of penciled sheet.—A. Watson, Elgin, Ill.

My Inkograph is simply a darling, I would own no other. —Miss Helen Ward, Laramie, Wyoming.

The Largest Institution in the World Devoted Exclusively to the Treatment of Rectal and Colonic Diseases

A Treacherous Affliction

Healed Without Surgery

THE old theory that surgery was the only method by which hemorrhoids (piles) could be successfully treated has been wholly disproved. This treacherous affliction, which slowly but surely undermines the health of its victims, can be healed without recourse to surgical aid.

As pioneers in the non-surgical treatment of hemorrhoids (piles), Dr. McCleary and his associates have established a wonderful reputation for their skill in treating all curable Colon and Rectal conditions. Their services have been sought by men and women from every state, from Canada, Cuba, Mexico and other foreign countries. Their reference list now contains the names of over 18,000 persons, including business men and women, farmers, bankers, teachers, ministers, in fact those from every vocation in life.

These Symptoms Are Warnings

Nature sets up danger signals to warn us. If these warnings are heeded in time much suffering and often grave danger can be avoided. If you have been troubled with headaches, nervousness, faulty nutrition, stomach and liver troubles, constipation, etc., and have been unable to overcome them, you should write at once for Free Book and learn if your symptoms are not due to some rectal or colonic trouble.

The McCleary treatment finds favor with men and women, young and old, for it entirely does away with harsh surgical methods of treating hemorrhoids or piles. All the discomfort and dangers of ether and chloroform have been eliminated.

Illustrated Book FREE!

We have just prepared a new book describing the McCleary treatment which is fully illustrated, printed in colors and copyrighted at Washington. It explains in a very interesting and instructive manner the various kinds of hemorrhoids (piles) and other rectal troubles and the mild McCleary treatment which has proved so successful. A copy of this book will be sent postpaid, free to anyone. Send your name and address in a letter or postal. So confident are we of results that we say to one and all alike, "If our treatment for your rectal trouble should not prove successful, you need not pay us one cent."

Are you one of the hundreds in every community who suffer from rectal trouble? If so, you should not delay. We are pleased to refer you to any of our former patients. Ask them about their experience here.
